LXIX. Sums of the Pressures registered by estimation at every Second Hour, from December 1840 to November 1842	ci
LXX. Sums of the Pressures registered by the Anemometer at the several Hours, on the Average of the Two Years	cii
LXXI. Sums of the Pressures registered by estimation at the several Observation Hours, on the Average of the Two Years	cii
LXXII. Days on which the Greatest Pressure of the Wind was recorded by Osler's Anemometer, between December 1840 and November 1842	ciii
LXXIII. Amount of Rain in each Month of 1841 and 1842	civ

MAGNETICAL AND METEOROLOGICAL OBSERVATIONS.

Magnetical and Meteorological Term Observations, 1840	1
Barometer, 1840	24
Standard Thermometer, 1840	29
Wet Thermometer, 1840	34
Humidity of the Air, and Tension of the Atmospheric Vapour, 1840	39
Meteorological Journal, 1840	49
Declination, 1841	70
Horizontal Force, 1841	76
Vertical Force, 1841	88
Magnetical and Meteorological Term Observations, 1841	100
Barometer, 1841	126
Standard Thermometer, 1841	132
Wet Thermometer, 1841	138
Humidity of the Air, and Tension of the Atmospheric Vapour, 1841	144
Meteorological Journal, 1841	157
Declination, 1842	183
Horizontal Force, 1842	192
Vertical Force, 1842	210
Magnetical and Meteorological Term Observations, 1842	228
Barometer, 1842	225
Standard Thermometer, 1842	265
Wet Thermometer, 1842	275
Humidity of the Air, and Tension of the Atmospheric Vapour, 1842	284
Meteorological Journal, 1842	303
Observations of the Magnetic Inclination, 1840, 1841, 1842	327
Periodical Observations of Meteors, 1840, 1841, 1842	333

DIRECTIONS FOR PLACING THE PLATES.

Plan and Elevation of the Toronto Observatory	Introduction page 18
Term Observations, 1840	Between pages 22 and 23
Term Observations, 1841	Between pages 124 and 125
Term Observations, 1842	Between pages 252 and 253
