REEVE OF SUTTON HAS LEFT FOR THE WEST

Rain is Much Needed in Farming District — Will Be Back Next Month.

Reeve Arthur Pugsley of Sutton left the city last night for Indian Head, where the extensive holdings of the Pugsley Brothers are located. Mr-Pugsley stated before leaving that in the reports he had received from In-dian Head and the surrounding district rain was very much needed, espe-cially in view of the fact that high had this spring been very pre-

He was, however, hopeful that the rain reported as being fairly general over the western provinces, had precluded all danger of a drought. Reeve Pugsley will return in time for the June session of the York County Council.

much attention was being paid to Callish Pond in the west end, while they in the east could get no satisfaction in connection with the sewegae disposal. It was pointed out that experiments had been made for a considerable time in an endeavor to do away with the smell, but all to no avail and Commissioner Harris had admitted that nothing could be done.

Alderman W. D. Robbins stated that in three years' time the place would be filled up and was of the opinion that preparations should be made so that at that time the sewage could be carried away to some place outside the city.

A long discussion followed, which at times became very heated and references were made to the visit last year to Georgia by some of the city officials in connection with the sewage problem, which had avalled them nothing.

DECIDE TO SUBMIT ALTERED AGREEMENT

Conference Held Last Night Regarding Discussion Among Ward One Tories.

President J. Norris of the Central Conservotive Association, presided over the conference of committees from East York Federal Conservative Association. Ward One Association, and the executive of the central, who met in the Ryrie building last night to settle the trouble existing in the ward regarding the controlling powers of the riding of East York.

The old agreement between the East York Federal Association and the executive of the central, which was arrived York Federal Association and the executive of the central, which was arrived at some time ago, was brought up and provided a topic for a long discussion. It will be remembered that this agreement, was not favorable to the Ward One Association. It was taken up clause by clause, and after some alteration it was decided to submit it to the two associations as a basis of settlement.

It was decided to grant the East York Association powers to call a convention.

MANY CONNECTIONS

With Methodist Church-Liberal in Politics.

Further discussion regarding the "odor" from the Morley avenue sewage disposal plant took place at an open-air protest meeting held near the property last night under the auspices of the East End and Roden Ratepayers' Association. W. F. Bullock, president of the former association, acted as chairman. Practically everyone in the gathering, which included many storekeepers of the neighborhood, voiced their disapproval of the treatment which has been meted out to them by the city.

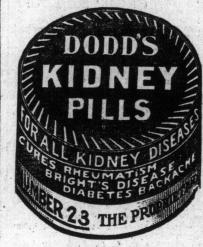

W. R. Bullock gave a history of the attempts which have been made by his association to have the nuisance abated. We was convinced that the smell was as bad this year as at any time previous and that it was injurious to the health of the people in the locality. At the last meeting of the association a communication of profest was sent to the International Waterways Commission calling attention to the fact that the water of the lake was being polluted by the sewage, which found an outlet to Ashbridge's Bay thru the piles.

He said as yet no answer had been received from the commission. The provincial health authorities were also notified of the nuisance and had replied, stating that they were looking into the fact and they were looking into the fact that they were looking int

Without the Doughty-Patent Process, Dunlop Traction Tread Bicycle Tires would still be the best buy, but with the Doughty-Patent Process exclusively applying to Dunlop Tires there is no discussion as to which tire excels the field.

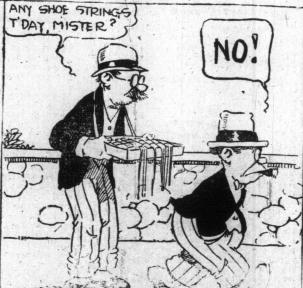

The Traction Tread gives the mileage and prevents side-slipping.

The Doughty Process insures uniformity of construction.
