It is only a few years since the enlargement of the Welland Canal was completed. At that time it was supposed that its capacity for business was such as to meet the increasing wants of the Western trade, for half a century. This capacity it has already been ascertained, is unequal to the demand for transit, and both the Welland and Erie Canals, with the two great lines of Railway through the State of New York, are taxed very nearly to their utmost. In view of these facts, it is evident that, as the transit business between the East and the West is every year increasing
