ington to Discuss Effect of Chamberlain's Policy.

Detroit, June 5 .- A Washington special says: Senator Fairbanks has been asked to come to Washington as soon as possible to attend a conference of the Secretary of State and President Roosevelt, to discuss the effect of Great Britain's proposed tariff policy on Canadian-American commercial relations, particularly it is desired to talk over the prospects of a reciprocity treaty with Canada, and a meetirg of the Joint High Commission.

The prospect that efforts toward a commercial treaty may be abandoned has disturbed manufacturers and merchants in Chicago and the Northwest who have looked forward to closer commercial relations with our neigh-

Dorchester has just completed a series of experiments by which he is enable to control all the movements of able to control all the movements of a boat in midstream while sitting on STUDENTS DROWN TOGETHER. The device used is similar to the Mystery Surrounding Death of

wireless telegraph. The scene of his operations is at Milton, on the Nepon-set River. Here a long pole wound with two large coils of wire is set in the ground near an eight-volt battery, generator, and a transmitter. The boat, which is seven feet long, is fitted with an elaborate receiving apparatus.

By means of the transmitter on the shore the inventor sends wireless impulses to the boat and is able to make it weigh anchor, cast off, go ahead, back water, and perform all other movements of a real vessel.

Alden states that it will be easy to put such an apparatus into operation in a large hoat, the most and is the most of the suggestion of Rev. Dr. Carman that the legislature be quarantined. The air was foul enough, Mr. Whitney said, and he cid not think the situation had been improved by the coat of whitewash that had been just laid on.

Medical Student and Girl,

After renting a small boat they row ed in the direction of the Spanish boat.

Alden states that it will be easy to put such an apparatus into operation in a large boat, the only thing necessary being to direct and send the impulse from the transmitter on shore to the receiver on the boat.

The inventor is now at work on a model of a lifeboat to be similarly managed, which he believes he can put in practice on hir boats.

After renting a small boat they row ed in the direction of the Spanish boat. Miss Moore's hat and umbrella were found on the deck of the Pinta. One theory is that Miss Moore slipped on the deck and fell overboard, and that Miller, attempting a rescue plunged after her. They were found with arms tightly clasped about each other's neck. Miss Moore was from Davenport, Ia., and Mr. Miller from Lincoln, Neb. They had been boating together frequently.

The inventor is now at work on a mid silks.

We would call the attention of the ladies of Toronto to our stock of beautiful Irish linen table cloths, all sizes napkins, hemstitched and fringed browels, towellings, plain and fancy handlerchiefs, etc.; also a lovely range of bonnets, celebrated black taffetas and peau de soie silk. These goods will be disposed of at very low prices will be disposed of at very low prices.

DEATHS

TAYLOR IN ON TWO DEALS TOOK HALF THE PROFITS

Cap Sullivan Gave Him \$1900 Because They Were Good Friends.

Theodore C. Taylor was a clerk in the woods and forests branch of the Crown Lands Department at a salary

of \$1450 a year. He got half of the profits of "Cap." Sullivan's timber deal in Rutherford Township. He was allowed to share in the profits out of pure friendship. For this Mr. Taylor was suspended by,

the minister. Another deal is sworn to, Taylor getting \$1900 from the captain as his share, the captain having secured an option on a limit bought by Chew Bros. from the government, and disposed of it at a good price. This was also a matter of friendship-"pure,

unadulterated love." A fishing excursion in the Public Accounts Committee of the legislature yesterday morning brought another good-sized one to the net. Theodore C. Taylor, the clerk of the Depart-ment of Crown Lands, who was suspended on Tuesday after it developed in evidence that he had profited from the sale of the Shannon timber limit, told of sharing the profits of another transaction with Capt. John Sullivan, This bit of evidence came unexpected ly, as other things have come out while Conservative examiners have prodded their inquisitorial hooks into the affairs of the various departments.

The first witness called was J. M. Jellett of the Dominion Bank. He produced a list of Theodore C. Taylor's cheques. He will be called again on

Tuesday morning. Expert Testimony. Mr. White of Midland estimated the cut on the Shannon limit, from what he had seen at the Charlton mills, at 1,700,000, valued at \$17 a thousand. Col. Matheson asked if the lumber was No 1. clear, but the witness did not understand what was meant, and

not understand what was meant, and was told his ideas were hazy.

Mr. Conmee proceeded to get into the game. "Insulting the witness," he was quick to say, and the colonel observed that the member for Port Arthur was always on hand to make a row.

"This man has more than once insulted witnesses, and it's time it should stop," said Mr. Conmee. "He might as well say he was lying."

Mr. St. John took up the cudgels for

Mr. St. John took up the cudgels for the gallant colonel, and the cross-fir-Cap Sullivan's Warm Friend.
Then Theodore C. Taylor was called.
He is the friend of Cap. Sullivan, and got a whack of the Shannon timber ing got pretty lively. got a whack of the Shannon timber graft to the extent of \$4000, because of the regard Cap. Sullivan bore him. Sullivan, he said, told him if he put up \$250 he could make some money. First the Cap, estimated the value of the limit at \$1200; then he said it had
