

Parents and teachers of sabbath schools have been greatly cheered and encouraged. Our Sabbath Schools have been quickened, and the anniversary services have indeed been delightful seasons. Numbers have been added, and great liberality manifested in their support. The temperance cause has not been forgotten. Numbers have signed the pledge, and very remarkable conversions to God taken place among them. "All hail to the temperance cause!"

Our congregations have greatly increased. But for the gracious quickening, I know not what would have become of us at Cleveland. The lease of the land on which the chapel stands was nearly expired, and doubts were entertained about renewing it; but the owner being disposed to sell, and our friends alive to secure it at \$527, they soon raised \$127; the balance to be paid in four years. About \$1500 also have been subscribed towards the erection of a Brick Church there, which is to be commenced soon.

The present prospects of this station are cheering; we could open other places had we another preacher, but cannot do so at present, nor can we work those we have to advantage unless we get another, whom we greatly need, for which we earnestly pray, and whom, if sent, we will warmly support.

**WISCONSIN.** At the commencement of the year affairs looked rather gloomy, but they soon began to brighten. One new chapel has been built, which already has proved a blessing. Special services were commenced immediately after its dedication, and God poured out his Holy Spirit.— There services were continued at different places through the Mission for 29 weeks; the effects have been delightful, for about 200 have been hopefully converted. The pastor says: Many times we have been weary in the work, but not weary of it; believing if we wish extraordinary effects we must use extraordinary efforts. The mission cannot be worked efficiently without another preacher; and we want two to enter the doors which are opening before us.
