## ATTEMPT TO WRECK PASSENGER TRAIN Watchman Kills Bandit and Receives Wound Which May Prove Fatal.

Mineral City, Ohio, Sept. 1.—A plot to wreck the Cleveland and Pittsburgh passenger train yesterday between here and Canal Dover, was frustrated today by Watchman John Mace, who is in a dying condition at Canal Dover following his brave action.  
Mace came on four train wreckers, who were laying explosives in a tunnel. A revolver duel followed in which Mace shot one of the bandits dead, wounded another and received wounds that may prove his death.  
Section hands, drawn to the tunnel by the shooting, came up and in a hand-to-hand encounter with the bandits, two of them were shot.  
The thugs fled after the shooting, leaving the dead comrade. A trail of blood left by a wounded bandit may aid the authorities in capturing the men. An attempt is being made to identify the dead train wrecker.

## TRIBUTE TO ECCLES.

Seattle, Wash., Sept. 1.—From 2 o'clock until 2.30 yesterday all the wireless stations of the United Wireless telegraph service were silent out of respect for George Eccles, the wireless operator on board the Ohio when she was wrecked, and who lost his life while at his post calling for aid.

## GIRL EXPIRES IN ARMS OF HER BROTHER Dies Suddenly While on a Visit to the A.-Y.P. Ex- position.

Seattle, Wash., Sept. 1.—With a heavy snore and light snoring words of admiration for the beautiful things she was seeing, Edna Clark, an eighteen-year-old school girl of Bellingham, fell over backwards into the arms of her father, who was standing in the Italian section of the Oriental building on the fair grounds yesterday, and before help could arrive, was dead, a victim of heart disease, which less than six months ago had claimed the life of her mother with equal suddenness.  
Miss Clark was a daughter of Harry Clark, a Bellingham businessman, and was looking over the statutory in the Italian exhibit with Coleberg Clark, her brother, while they waited to meet their father. Not a word passed the girl's lips after she was stricken, and when the ambulance reached the Oriental building the last spark of life had gone. The young brother, when he learned that his sister was dead, collapsed completely and had to be cared for at the hospital.

When the father reached the meeting place arranged at the Washington State building, he was greeted by sad faced strangers, who told him of his misfortune that had stricken his family.  
"Just as her mother went," was all he could say, as he gazed at the pale little face on the hospital cot.  
The girl's body will be taken to Bellingham for burial.

## HARRIMAN'S CONDITION.

Railway Magnate Issues Statement Regarding His Illness.

Arden, N. Y., Aug. 31.—E. H. Harriman, urged by weary representatives of the press, who have camped about his mountain home since Wednesday, has issued a statement that he was all right.  
Mr. Harriman's statement follows: "I am urging the course laid out before I went abroad, and advised by the best medical advice I am able to give, as soon as my responsibilities would permit. My treatment abroad reduced my strength and weakened my digestion. The most expert physicians in which I was advised to take a vacation by surgeons as a matter of precaution. This has been done very carefully by Doctors Bromer and Chlie, in conjunction with Dr. Walter James and Dr. Lyle, and the whole result is that they find nothing serious, and re-new the advice previously obtained, that I should have a rest and not see many people at one time, and this I intend to do."  
"This covers the whole case, and later on, if the representatives of the press desire, and there is any purpose to be accomplished, I will see them here, but now I ask that the surveillance of the operations of my home be withdrawn, not so much on account of my family or myself, but that the coming and going of my friends may not be interfered with. I appreciate the interest in my welfare taken by the press and by friends in all sections; but if there was or should be anything serious, I will let the press know, and as I have never deceived them, I ask that the press now withdraw its representatives from my premises."  
The newspaper men, relying on his word, returned to New York last night.

## FATAL BRAWL.

Emerson, Man., Aug. 31.—As a result of a drunken brawl on Saturday night, the remains of John J. Overstone, now lies at the town hall here. Doctors May and Wallace made a post-mortem yesterday. The row took place at a Galician house immediately west of the skating rink close to the C.N.R. track. W. Chuliy and another Galician are said to have been involved in the fatal quarrel and the police are now looking for them.

## CONDUCTOR INJURED.

Nanaimo, Aug. 31.—Ernest Lott, employed as a conductor on the Anderson Logging Company's train at Union Bay, was injured yesterday while at work, sustaining injuries to his forehead and left arm which may render amputation necessary. He was taken to the hospital at Cumberland.

## TWO RACE TRACK TOUTS IN TROUBLE Are Held by the Police at Van- couver on Charge of Theft.

Vancouver, B. C., Aug. 31.—The police made a good haul last night when they arrested John D. Staunton and Harry Overton, two confidence men and race track tout, on a charge of theft. The men had a roof fitted up in the vicinity of the Hotel Vancouver, furnished with a mock telephone, race track charts, etc. They went searching for the victim and secured one in the person of John Long, a retired rancher of Bellingham, who was here for the races. They framed up a deal whereby he was to give them \$5,000 on one race, but he had to put up \$5,000 to get the \$15,000 and again he fell for them, putting up a cheque for the \$5,000 drawn on a Bellingham bank.

A day passed when Long did some thinking, and suddenly he took a tumble. He reported his trouble to the police, and payment of the cheque was stopped by a wire to the Bellingham bank.  
The pair were locked up and this morning appeared on a charge of theft, but the case was remanded until Friday, when the police will appear in court to allow Mr. Long to testify as to the transaction some business in Bellingham and return here. His Worship refused to accept bail, as the charge was of too serious a nature.

## FIRE DESTROYS LAUNCH.

Man Is Missing and It Is Believed He Lost His Life in Flames.

San Francisco, Cal., Sept. 1.—The launch Pirate is in ruins following the explosion of an oil lamp which set the launch on fire and caused the death of Carl Schaefer, 20 years old, who had been working as a deck hand.  
The launch was towing a barge of oil and was opposite Pholo when the lamp exploded. Capt. Daniel Winkler and Ole Nelson, the mate, jumped to the barge, and fearing the blazing launch might start the barge to burning, the launch was cut. At the time it was thought Schaefer was on the barge, but later his form was seen silhouetted against the flames on the launch. Soon afterwards the launch exploded in the bay. No trace of the deck hand has been found and it is believed that he fell back into the flames and went to the bottom of the bay with the flaming craft.

## FINAL ESTIMATE OF WHEAT YIELD Placed at 118,109,000 Bushels for Western Canada—Sask- atchewan's Advance.

Winnipeg, Sept. 1.—Monday night was full moon and incidentally it was the coldest night of this season in Winnipeg. The mercury dropped to 34, white frost covering the ground, but the most tender garden stuff does not appear to be affected. What is a good deal more to the point, so far as can be learned, no frost occurred through the prairie west with the single exception of Pierson, Man., where four degrees were recorded. Quite 75 per cent. of the spring wheat is now beyond damage from anything, but very heavy frosts, say eight to ten degrees, and oats, being harder, are not affected, even though pretty green by light frost.

The Free Press yesterday issued its annual final estimate, which of recent years has nicked well with actual threshers' returns. This gives a general wheat average for Manitoba of 35 bushels per acre, or 35,130,000 bushels for the province; for Saskatchewan, 19 bushels average, totalling 70,130,000; for Alberta, winter wheat, average 29 bushels, total 1,240,000; and in the province of Saskatchewan, total spring wheat, average 25 bushels, total 7,500,000. This gives a grand total of 118,109,000 bushels of wheat for Western Canada, and is probably a little on the conservative side, allowing for being made for possible frost damage.

A noteworthy feature is that while the total wheat yield is twenty-five to thirty million bushels in excess of any previous year, this increase is almost entirely due to Saskatchewan, which province by increased acreage and high average yield for the first time becomes the dominating factor, robbing the old province of Manitoba of its lead.  
Other cereal estimates are as follows: Manitoba, oats, 43,798,752 bushels; barley, 18,000,000 bushels. Saskatchewan, oats, 87,600,000 bushels; barley, 8,800,000. Alberta, oats, 32,600,000; barley, 5,642,000.

## "IRON KING" INJURED IN AUTO ACCIDENT W. H. Singer, Head of Big Pittsburg Firm, May Not Recover.

Pittsburg, Aug. 27.—Wm. H. Singer, one of the best known of Pittsburg's "iron kings" and the head of the Singer-Nimick Company, is believed to be fatally injured to-day as a result of an automobile crash last night in which he was hurt.

The accident occurred near his summer home at Providence, R. I.  
The wealth of Singer a year ago was estimated at \$30,000,000. He is nearly 70 years old and has four children. Last year he visited all his children to dinner and on the plate of each was found a paper giving an absolute transfer of \$4,000,000. The dinner cost him \$16,000,000, one of the most expensive on record.

## MAY SELL CIGARS ON SUNDAY. Charge Against Toronto Restaurant- Keeper Is Dismissed.

Hereafter restaurant keepers and hotel-keepers may sell cigars to their hearts' content on Sunday without interference on the part of the police, says the Toronto News.  
This pleasing state of affairs from the smokers' standpoint, is the result of a case which was brought up in the police court by Staff Inspector Stephen.

Albert Williams, who operates several restaurants on Yonge street, was charged with a violation of the Lord's Day Act, in selling a cigar on Sunday. The evidence was given by William Beverly, a young man hired by the police. He stated that he had gone into the quick lunch restaurant at 101 Yonge street and purchased a cigar at the cashier's counter.  
"You had no meal there?" asked Mr. Corley.  
"No, I didn't."  
"And you were not a guest?"  
"What I want to know is—Is it any greater wickedness on the part of the proprietor of a restaurant to sell cigars to a man who comes in without buying a meal, than to one who buys a meal?"  
"I want your opinion on that point," said Inspector Stephen.  
"Oh, very well then. 'I'll dismiss this case.'"  
In speaking to the News later, Inspector Stephen stated that as far as he was concerned, he would not again attempt to prosecute a hotel-keeper or restaurant-keeper for selling cigars on Sunday. "The magistrate has given his decision," said he, "so the matter must end here."

## VISIT INDIAN SCHOOLS ON WEST COAST Officials Spend Several Days in Clayoquot Dis- trict.

Clayoquot, Aug. 30.—Rev. A. E. Green, inspector of Indian schools, has spent a couple of weeks visiting the Ahousket boarding and the Christie industrial schools.  
Rex T. Ferrier, of Brandon, superintendent of Methodist hospitals and Indian schools for Canada, together with Rev. J. Robson, Nanaimo, chairman of the Victoria district, spent four days looking into the Indian works at Clayoquot.

Mr. and Mrs. George Raynor of Wellington, Ont., came up to visit their son, Dr. M. Raynor, superintendent of the Clayoquot Methodist hospital.

A public meeting of the settlers was held here to discuss with Rev. Mr. Ferrier and Rev. Mr. Robson the question of the hospital and Sunday services for the white people.  
E. B. Garrow is spending a couple of weeks in Seattle and Victoria.  
Mr. W. T. Dawley, Mr. and Mrs. Carle and Mr. McLeod have returned here.

## ALBERTA MAN WINS THE GOVERNOR'S MEDAL Officers of Sixth Regiment, Vancouver, Take the Bar- low Match.

Ottawa, Aug. 27.—The Governor-General's match at the Dominion Rifle Association meeting was concluded today, the second stage consisting of 7 shots at each of the following ranges, 500, 300 and 1,000 yards. McInnis, Alberta, won the first prize, D. R. A. gold medal and \$200. In the grand aggregate Forrest, of Vancouver, was ninth, winning \$5; McHarg, Vancouver, 17th; \$5; Youhill, Vancouver, 21st; \$5; Boulte, Vancouver, 30th; \$5; Caven, Victoria, 52nd; \$4; Perry, Vancouver, 50th; \$5; Simpson, Vancouver, 67th; \$4; Richardson, 72nd; \$4.

The Barlow match for teams of four officers was won by the 6th regiment, Vancouver, with 361. The match was ten rounds at 500 and 600 yards.

Russell won the Blaisy aggregate with 356. Forrest scored 322; McHarg, 284; Boulte, 371; Perry, 375; Youhill, 374; Richardson, 372; Simpson, 368; Caven, 362.

## HAS NOT ABANDONED WORK.

Vice-President Mohler of Union Pacific, Declares Harriman's Condition Is Not Alarming.

Omaha, Neb., Sept. 1.—"Harriman has not been off the job," declared Vice-President Mohler of the Union Pacific here yesterday, replying to the question when Harriman would return to work.  
Mohler received a letter from Harriman to-day, which was mailed from his wizard's country home, where he is now confined. Mohler refused to give extracts out from the communication for publication, but said the magnate's physical condition is not alarming.

## GOMPERS BARRED.

Not Allowed to Participate in International Conference of Trades Unions.

Paris, Sept. 1.—Samuel Gompers, president of the American Federation of Labor, was barred from participating in the international conference of trades unions in session here yesterday by the adoption of a motion by Mr. Smith, as well as Sir John MacDonald and Sir Charles Tupper. Here the tenacity and self-reliant courage that had marked his life from youth was again apparent. Opposition to a railway scheme that struck many as quite disproportionate, was tremendous. But Donald Smith knew

## DISTINGUISHED GUEST IN CITY LORD STRATHCONA VISITS VICTORIA Romantic Career of Canada's High Commissioner at London.

(From Wednesday's Daily.)  
To-day Victoria is entertaining one of the most remarkable men of the times in the person of Lord Strathcona, High Commissioner of Canada in London.

Famous all over the British Empire, Lord Strathcona still retained office as if nothing had happened. He has since held the office of High Commissioner of Canada in London. During these years he attained to so many positions of financial trust that it would take an index to keep track of them. During the closing months of the Conservative administration early in 1896 he was appointed Canadian high commissioner in London. The appointment is a political one, but when Sir Wilfrid Laurier came into power shortly afterwards in the same year, Lord Strathcona still retained office as if nothing had happened. He has since held the office of High Commissioner of Canada in London.

The story of his life reads like a romance, and that is himself. As his great public endowments have had, so far as he could make them, a private character there can be no record of those relatively small gifts whereby he has gladdened many hearts and lightened much suffering. These are subjects upon which not even his intimate friends can speak to Lord Strathcona; he will put them aside, courteously always and with that odd mixture of urbanity and firmness that is the characteristic of his manner.

But there are several of his gifts that cannot be easily concealed and will be remembered by him so long as the city of Montreal shall remain upon her foundations. Jointly with Lord Mount Stephen he set apart one million dollars to erect a free hospital in Montreal to commemorate the jubilee of Queen Victoria in 1837. Later, when the building had been erected on the side of the mountain they gave equally in the sum of \$800,000 to endow the institution. There can be no finer story of a hospital in the world. It overlooks the whole city and the valley of the St. Lawrence. This hospital, the Royal Victoria, as it is called, is one of the best equipped institutions on this continent.

Victoria city has a monument to his beneficence at the Strathcona ward of the Royal Jubilee hospital.

He has given probably several million dollars toward the cause of education in Canada. Most of this has come to McGill university of Montreal. The foundation of the Royal Victoria college for the higher education of women is one of the most popular and useful bequests to this university.

One of the marked features of Lord Strathcona's character is his loyalty to every one and everything pertaining to the Hudson's Bay Company. If you wish to see him, brighten

it was essential to the west, and worked as such a man can work. The railway was built, a bond of steel that has helped to make the Dominion one of national importance.

In 1886 came Mr. Smith's first imperial honor. He was created a Knight of St. Michael and St. George, and ten years later he received a Knight Grand Cross in the same order. In 1897 he was raised to the peerage as Lord Strathcona and Mount Royal.

## WHEAT PROVES ATTRACTIVE SUBJECT Again Discussed by Experts at Meetings of British Association.

Winnipeg, Sept. 1.—Wheat received attention in nearly every section of the British Association yesterday. The engineering department had two papers on the subject, and no papers were followed with more interest. Sir William White, president of the section, was particularly interested and continually fired questions at the speakers.

The paper by Mr. Harcourt dealt with the development of the grain industry in Western Canada, and its future possibilities. He traced in detail the history of grain growing in the West and followed this with some interesting predictions as to the future. Of the country which is known he placed the area capable of producing grain at 220,000,000 acres. The total area in crop last year was 11,257,870 acres, producing a total crop of 240,000,000. This was not the end. There was a great northern area, the Mackenzie Basin, which was capable of producing grain. To all of this must be added the result of what science and experiment will bring in the way of earlier and more suitable varieties of grain.

Prof. Somerville, of Oxford University, followed with a masterly resume of the world's outlook for timber supplies, and he found the prospect to be not a reassuring one. A. Knechtel, of the Dominion forest service, then read a carefully prepared paper by R. H. Campbell, the Dominion forester, upon Canada's timber resources, which was well received and followed by an animated discussion.

The itinerary of the trip through the West has now been settled and practically all of the members will go through to the coast. The special train will leave at midnight on Thursday, and Victoria will be reached on Tuesday or Wednesday. On the return trip the scientists will come to Calgary, thence to Edmonton and over the C.N.R. to Winnipeg. A number of side trips also have been planned, one of the most interesting being that of Prince Rupert.

The special train will leave at midnight on Thursday, and Victoria will be reached on Tuesday or Wednesday. On the return trip the scientists will come to Calgary, thence to Edmonton and over the C.N.R. to Winnipeg. A number of side trips also have been planned, one of the most interesting being that of Prince Rupert.

The itinerary of the trip through the West has now been settled and practically all of the members will go through to the coast. The special train will leave at midnight on Thursday, and Victoria will be reached on Tuesday or Wednesday.
