MARKET DROPS TO PROFESSIONAL TRADE

IRREGULAR CLOSE TO STOCK MARKET

List Started High at Outset
But Lost Ground at Final
Hour of Trade.

New York, Aug. 27.—The stock market today lagged into its recent reactionary conditions, professional traders resuming their aggressive selling tactics in the former absence of the bullion initiative and public support Londoners were nominally higher at the outset and this advantage was extended during the first hour, but the market ground in the final hour, when call money rates were again set, and foreign exchanges maintained relatively heaviness.

The setback in international credit accompanied reports of another trouble in Russo-Polish affairs. More likely however, it was precipitated by further offerings of grain and cotton from London and Paris.

Statement attributed to banking interests and representatives of the Federal Reserve Board, which offered little encouragement for any immediate relaxation of credits, also exerted an adverse influence over the market.

Trucks provided the only manifestations of pool activity, the Junior or clunker issues of western and south-western stocks, and some of the exchange brokers reporting varying gains.

Investment transportation also was more or less immune from the reverse of the later dealings, notably the Pacific.

Low priced motors and oils were susceptible to pressure throughout the session, their weakness finally affecting many of the stocks, equipments, shipping and related equipments, in exchange road issues, sales amounted to 50,000 shares.

Percentages of tomorrow's clearing house statement differed widely, but opinion inclined towards an adjustment or expansion of actual resources from last week's sharp decline.

Convertible or underlying issues of the American group made gains, but the bond market, excepting transportation, also developing strength, but the Liberty group and internationals continued irregular. Total sales, par value, aggregated \$0,375,000.

The Old United States bonds unchanged on call.
