New discoveries about the Bible are

New discoveries about the Bible are being made almost daily. The religious world is startled every now and then by the announcement that some old manuscript has been found or some clay tablet corroborating Biblical history has been deciphered. The last few years have been especially notable for remarkable finds, not the least of which has been a single leaf of papyrus bearing a few sayings of Jesus—logia, as they have been called. These discoveries arouse a questioning frame of mind. We ask, how did we get the Bible, whence did it come, what was the method of its transmission to us? Learned volumes have been written, but only scholars read them. One of the latest of these is by Dr. William A. Coppinger, but it is so expensive a volume—only 150 copies have been printed for sale—that few can read it, even if they would. The much talked of polychrome Bible, edited by leading Biblical scholars of the world, is an answer to this damsand. Still, the question, how did the Bible come down to us? ought to be answered briefly, so that the masses of the people can read and understand. It is irreverent to the Bible and es of the people can read and under-stand. It is irreverent to the Bible and the inspired men who gave us this world classic—the classic—dealing with world classio—the classio—dealing with the eternal theme of the relation be-tween man and God to think of it as a ready made volume, dropped down from heaven bound and gilt edged. The Bible was born in the little land

The Bible was born in the little land of Canaan as the weary caravan, led by Abraham from Ur of the Chaldees, pitched its tents and the patriarch wrote down the promises of the Eternal on the palm leaves which he found at hand. This was more than 4,000 years ago, and that writing was in use so early is proved by inscriptions found on Egyptian steles or Assyrian tablets from 6,000 to 8,000 years old.

The records kept by Abraham and his immediate descendants undoubtedly

his immediate descendants undoubtedly formed the basis of the book of Genesis his immediate descendant and the his immediate descendant of Genesis and the earlier chapters of Exodus, to be later utilized by the hand of Moses and his successors. With the advent of this great legislator of the Hebrews the nation was formed, with his legislation as its heart and center. It is probable that Moses wrote his portion of the Bible upon the linen used for such purposes in Egypt, for many large pieces of this linen loovered with hieroglyphic writing have come down to us wrapped around mummies. The inscriptions are still legible. The Peutateuuch was the around mummies. The inscriptions are still legible. The Pentateuch was the nucleus of our Bible, the only Bible knewn to the Hebrews for many gener-ations. It was written in the ancient lbri character, closely resembling the Phoenician, as proved by the Siloam in-

and gradually a second set of accepted writings was added to the law. The

lected by various hands. Other books were found or written as late as the second century before the Christian era.
The book of Daniel, for instance, was composed to inspire a people, fainting under Syrian oppression, for the Macca-bean revolution. And all this later literature was struggling for acceptance onto the Bible until the canon of the Old Testament as we now have it was established in the first century of our era by the rabbinical school of Palestine. As the nation Israel sunk under the As the nation Israel sunk under the waves of Roman conquest the Jewish spirit held the Old Testament aloft as its gift to the world.—Clifton Hardy Levy in Review of Reviews.

BY CHARLES B. LEWIS.

LAW OF THE SEA.

abandoned too scon.

Soon after we of the ship Evening Star sighted the wreck. We were salling under the Holland flag, commanded by a Holland captain and mate, and I believe the craft was of that nationality. She was bound from Demerara to New York. loaded mostly with sugar, I believe, and had been detained in Demerara a couple of weeks to ship a crew. It so happened that an American manef-war to which I belonged as an enlisted man put into that port for some slight repairs, and 12 of us deserted in a body to go abourd of the Star. We were all sailors. It does not excuse our action to say that the Hollander brought this desertion about by the promise of high wages. He wanted a crew and did not care how the men came to him. We had a close shave from being captured by our captain, but got to sea all had a close shave from being captured by our captain, but got to sea all right, and as the weather was good and the wind favorable the Hollander "cracked on" to make up for lost time. One morning just after sunrise we found the drifting brig square in our path and only two or three miles away. After a brief lock at her through the class captain and mate fell to cursing

people were on quarter allowan much sickness among the women and children, and that they desired to aban-don the wreck and be taken aboard of the ship. We had spare spars aboard, and the Hollander offered to sell three and the Hollander offered to sell three er four sticks for about three times their value, the payment to be made in gold on delivery. The captain of the brig declined buying, as he was astisfied that the shattered hulk could never be worked into port, even if fully provisioned. The Hollander then agreed to sell one cask of water and about 80 and of breed, but just as we were sell one cask of water and about 80 jounds of bread, but just as we were ready to transfer the goods a squall came up, and that gave him an excuse for sailing away. His firm intention was to abandon the wreck to her fate, and as soon as we realized it the ten of us went aft in a body and assured him that unless he bore up and furnished relief we should refuse duty and take the consequences. He blustered and

relief we should retuse duty and take the consequences. He blustered and threatened a..d brought out his pistols, but we were firm, and at length he gave orders to put the ship about. We had to beat up to the wreck, and We had to best up to the wheels, when the we reached her there was half a gale blowing and the sea was so heavy that we could not transfer the provisions. At the end of an hour the Hollander was for making sail again, but we refused to touch a rope. He and nate, both armed with belaying pins, sought to drive us aloft, but we disarmed them and looked them in their staterooms. Among us was a man who had made several voyages as mate and

was competent to handle a ship, and it was installed as captain and giv not able seaman as mate. We had hop of the get the provisions to the wreck befor night, but the gale centinued, and whad to stand by her for 30 hours befor had to stand by her for 30 hours before it was safe to launch a boat. We sad mutained and taken possession of the ship, but we felt that circumstances justified it. Neither harm nor insult was offered our efficers. After a few hours they were allowed full liberty, and not one of us entered the cabin. There were many threats as to the punishment we should receive when the ship arrived in port, but we stood firm and kept clear of any further quarrels.

When wind and sea finally subsided, we boarded the wreck, to find that one

When wind and sea finally subsided, we boarded the wreck, to find that one woman and four children had died in the last 24 hours and that the living were entirely out of food and water. There was no doctor aboard, the leak was hardly to be kept under, and it was plain that another 24 hours would send the wreck to the bottom of the sea. It was therefore resolved to transfer everybody to the ship. Our captain and materaved like madmen when they heard of this decision, and the last named bethis decision, and the last named became so violent that we had to bind him hand and foot. The wreck had lost all her boats, but the ship had three, and when the work of transferring began it was not interrupted until every verson had been brought safely off. person had been brought safely off.
Then we secured most of the personal
baggage of crew and passengers, and by
the time the last boatlead was along-

side the Star the wreck rolled heavily

free from mold. The compression de-stroys all forms of larval life and the flour is thus rendered safe from the at-tacks of the insects. The saving in storage is enormous, as the cubic space oc-cupied by 100 pounds of loose flour will hold more than 800 pounds of the com-pressed article.—Scientific American.

After a brief look at her through the glass captain and mate fell to cursing at their ill luck. As a matter of fact we had neither water nor provisions to spare, and the ship was loaded down to the mark with cargo, but when we heard our officers propose to pass the wreck without notice every man of the ten was ready for mutiny.

We demanded that communication be epened with the unfortunate people, and after a good deal of growling the Star ran down to them and sent a boat aboard. The report of the mate when he returned was to the effect that the people were on quarter allowance, with people were on quarter showman and segre with cyclonic perturbation. Anytholy sould see from the haughty superiors when the returned was to the effect that the people were on quarter showman and segre with cyclonic perturbation. Anytholy sould see from the haughty superior would see from the haughty superior was a superior with the control of the manager with cyclonic perturbation. Anytholy sould see from the haughty superior was reasonable to control of the manager with cyclonic perturbation.

pody could see from the hanging sope-riority of her manner that if she was not yet a star she fully intended to be one. In her hand was a newspaper, which she laid on the desk before the

Now, really himself, "I am not responsible for what appears in the newspapers about you. I can't do anything more than say I am sorry you should have any troubles. That's all anybody does for me when I get into debt."

"Have you read that cruel article vorce?''
''Yes—that is to say, I glanced over "You can at least tell me where I can "Now, take my advice and keep away. It won't do you the least bit of good."

"But don't you think I have a right to complain?"
"Of course. It was too bad. I have no doubt it was a base calumny to say you out his allowance down to \$12 a week."
"I could have borne that," she mur-

mured.
"And I can understand it was very annoying to have it said that you put him out of a cab one night and made him walk three miles to the depot." "That was not the cruelest part of it,

to have it asserted in cold type that in to have it asserted in collapse and the fit of jealous pique you knocked him down and then jumped on him."
"Do you think the papers in all of the cities printed that?" she inquired.
"In all probability they did. I'm sorry for the worry it must cause you.

"That wasn't all!" she exclaimed.
"I know. What you refer to is the said, with a heartbreaking sob. "They spelled my name wrong!"—Detroit said, with a hearthfeating son.
spelled my name wrong!"—Detrois
