MONTREAL

GUARANTEE BUILDING
MONTREAL, CAN.

A Typical Installation in Montreal—

The Guarantee Building, Montreal, (Architect, Kenneth G. Rea), is another of the numerous buildings in Canada in which is installed a G. & G. Telescopic Hoist for the removal of ashes.

Made
in
Canada

Raises a maximum load of 500 lbs. at an actual speed of 30 feet per minute. It is not only speedy, but also clean, convenient and noiseless in operation.

The G. & G. Telescopic Hoist is operated from the sidewalk. This form of construction safeguards the public against falling into hatch and protects operator from injury should anything drop down the hatch. When not in use the hoist telescopes and no part shows above street level. Every hoist is subjected to thorough working test before shipment.

Montreal.

Gentlemen:

Referring to your inquiry,
I have used the G. & G. Telescopic
Ash Hoist in several Buildings and
am satisfied with the services it
performs.

Yours truly,

Kenneth G. Rea
