On the Norfolk Sand Dunes.

The drifts here are particularly bad, but will be stopped by the planting of evergreens.

Forestry Work in Ontario

Education Required to Link up Interest of Southern Ontario with Forest Problems of the North.

*By E. J. Zavitz,
Provincial Forester of Ontario.*

In considering the forestry problem in Ontario, we must bear in mind the geographical arrangement of the province. We have Ontario divided into three great regions—the southern agricultural and industrial region; the Central Forest re-

gion; and the so-called Clay Belt at the north.

Ontario differs from some other provinces in the fact that a large proportion of the population is not directly concerned in forest industries. The ordinary citizen in sou-
