YUKON.

WOMAN SUFFRAGE.—Four States have given to women unlimited political freedom, these States being Colorado, Utah, Wyoming, and Idaho. The women of all these States, except Idaho, had the privilege of voting in the Presidential election of 1896. The women of Idaho voted in the State election of 1898, but their first chance to vote for a Presidential ticket was in 1900. To some extent, in the election of school boards and officers, or on questions of taxation, woman suffrage exists in a limited way in Arizona, Connecticut, Delaware, Illinois, Iowa, Kentucky, Massachusetts, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New York, North Dakota, Ohio, Oklahoma, Oregon, South Dakota, Texas, Vermont, Washington and Wisconsin.

WOMAN'S CENTURY, The. See (in this vol.) NINETEENTH CENTURY: THE WOMAN'S CENTURY.

WOOD, Leonard, Colonel of the Regiment of Rough Riders. See (in this vol.) UNITED STATES OF AM.: A. D. 1898 (APRIL-MAY).

YERKES OBSERVATORY, The.—The Yerkes Observatory, built and equipped for the University of Chicago, by Mr. Charles T. Yerkes, of Chicago, at the village of Williams Bay, near Lake Geneva, Wisconsin, was opened and dedicated on the 21st of October, 1897. A remarkable gathering of eminent astronomers gave distinction to the occasion. The Observatory was pronounced to be the most perfectly equipped in the world. The lens of its great telescope—40 inch objective—the last great work of the late Alvan G. Clark, of Cambridge, Massachusetts—was then the largest ever made. Its cost was \$66,000; the cost of the equatorial mounting was \$55,000.
