

WILL SILO FILLING TIME FIND YOU READY?

SILO FILLING time will soon be here—and the Canadian Farmer is depending upon the corn crop this year as never before. It is your duty, and it will mean more money in your pocket, to use every effort, to get ALL the FEEDING VALUE out of every stalk of corn.

The most important thing is to silo your corn crop when it possesses the GREATEST FOOD VALUE. If you get a Gilson Silo Filler NOW—before we are sold out—you will fill your own silo. This means that you will silo your own corn when it is just right for silage. Be independent of the cutter gang. You do not need big power to operate the "Gilson." Your own farm engine—4 h.p. or larger—will do the work.

GILSON MFG. CO., Limited

WRITE FOR FREE SILO FILLER BOOK TO-DAY.

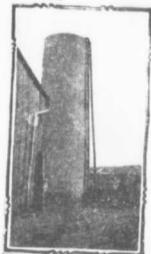

It tells the Gilson Story from start to finish—points out the advantages of design, and describes the all-metal construction in such a way that you will understand WHY our machines cut and elevate more silage with less power than ANY OTHER Blower Cutter. This is a matter of dollars and cents to you. A Gilson Silo Filler will, in all probability, pay for itself the first season. BEWARE OF IMITATIONS AND INFRINGEMENTS.

387 York St., GUELPH, Ont.

this
SILO FILLER

It is as much a part
of your Farm Equip-
ment as your Binder
or Plow.

"My Silo is 47 high, writes Frank Buxton, Guelph, Ont., but my 8 h.p. engine which I purchased from you nine years ago operates my 12' Gilson cutter splendidly, sending corn over the top in a steady stream. This outfit is the admiration of all who see it."

JOHN H. MURRAY, Sea View Farm, Cap La Ronde, C.H., N.S., writes: "I enclosed find picture of my 12' Gilson Silo Filler, 6 h.p. Gilson Engine silo with oats, peas and vetch, and it spoiled. My outfit does splendid work, and I am very well pleased with it."

LESLIE HORTON'S farm at Kitchener, Ont., shows his 8 h.p. Gilson Engine and 12' Gilson cutter filling his 27' Gilson Hylo Silo.

JACOB N. HARTY, Ridgville, Ont., writes: "The enclosed picture shows our 12' Silo Filler and 12 h.p. Gilson Engine hand at work filling our silo. This outfit works beautifully and is as much a part of every farm as a binder or mower."

M. I. ANKOFF, of Cowansville, Ont., declares that his silo filling outfit "is a source of real satisfaction and profit. I would not want to be without my 12' Gilson Silo Filler, 8 h.p. Gilson Engine and 12' Gilson Hylo Silo. I have used it for three seasons, and have had practically no trouble, and it was always ready when wanted."
