ABELL'S

CELEBRATED

IMPROVED GRAIN CRUSHER

NO APOLOGY is necessary for this class of machin-
 ery, nor is the value and importance of crushing,
 bruising, or splitting all kinds of grain, before it is given
 to horses, cattle, or pigs, a disputed question. These
 mills are prepared with a view to economy. They are
 strong, simple, useful, and thoroughly good, both in
 principle and workmanship, and are capable of crushing
 oats, barley, peas, or small grain of any kind. They have
 two rollers, finely grooved by machinery; one roller tra-
 velling faster than the other, causing a grinding motion.
 They are set to grind coarse or fine by means of an ad-
 justing screw. The feed roller is exactly adapted to
 supply the crushing rollers, and is easily arranged to
 give the rollers full work without the fear of being choked.
 Their action is perfect and the arrangement most con-
 venient. With the aid of improved machinery, for
 Letters Patent, I have been enabled to considerably
 reduce the price of this machine: in so doing, however,
 their high character for material and workmanship is
 maintained. Capacity, from 40 to 60 bushels per hour.
 I manufacture three sizes of the Grain Crusher, prices
 are \$30 \$35 \$40. For other information send for my
 illustrated catalogue.
