bedience produced and still produces.

The consolation must be something more

than temporary belief. Sufferings may

try a man : it does not turn him from that

path which more than any other is worn

with the footsteps of the saints. No-

thing is so common, nothing so hard to

avoid as sorrow and sickness. Death,

the king of terrors, is universal. And

even that is not the worst. Judgment

lies beyond-yet God is love. Nowhere

is His love so inventive, so omnipotent

and providential as in the passive side

of life. God sent His Son-the man of

sorrows. He came bearing a cross. He

passed through the world, and quitted

it in the agony of death. When life is look-

ed at through the crimson glare of the

Precious Blood : when we see the master

act of God's love; when we know by

faith the price at which we are bought, we

understand how God is love and how

suffering is the itest and proof of His

love for the world. As it was with the

Eternal Son of God so must it be with

us. & Our suffering in union with Him is

the obedient proof of our love of God-

There is no escape from suffering in this

vale of tears-God's love goes out to us

most in the dark hour when alone we are

wracked with pain or our heart is crushed

with sorrow. His love shows best when

we are most severely tried. There was

more glory to God and more benefit to

unborn generations of men in the agony

of Gethsemane and the eclipse of Calvary

than on the hill of Thabor. And it is

God's love which brings to our wounds

of sin, disease, death and judgment the

only means of escape-faith, hope and

love, with submission to His will, and the

knowledge that if we fulfil His mild

conditions our joy will superabound, and

the sufferings of this time not weigh

with the glory to come. Throughout

to give up all fiefs of the empire. The

Bishops refused, so then did Henry ; and

the treaty came to nothing. Paschal,

AT LONG LAST poor Ireland is about to receive a measure of justice, in matters educational, from the English Parliament. The Irish University Bill has passed the House of Commons by a vote of 207 to 19. Loud cheering was heard when the result was made known. In this the Nationalists took the lead. The general idea of the measure is to found by Royal charter two new universities in Ireland, with headquarters in Dublin and Belfast. Dublin University is to be composed of three constituted branches, two of which, Cork and Galway, already exist. The third new college will be founded at Dublin. The present Queen's college at Belfast is to constitute the proposed new Northern University, which probably will be called

We trust it will not be many years before we will have the pleasure of announcing that, with equal good will, a liberal measure of self-Government has been granted to Ireland. We fear, however, it will be yet a considerable time, for vested wrongs die hard.

A DISCOVERY which will prove of inestimable value to humanity has been announced in the New York Times of July 29. It states that two men have been cured of cancer in the city hospital of St. Louis by the use of a fluid discovered by Dr. Wm. B. Coley, of New York, and in the last named city it is stated that one hundred cases have been successfully treated. This fluid is known to medical men as mixed toxins of erysipelas and bacillus prodigiosus. Medical men say it has saved many lives all over the world, and in recent years it has been used in almost every country where the medical profession is in an advanced state of progress. There is no secret about the remedy, for, following his discovery, Dr. Coley gave its benefit to the medical world at large, The fluid is now made at the Collis P. Huntington Research Laboratories, in Germantown, Pennsylvania.
