

"Scholarship and research
in no country have produced
anything on the same scale."
—Westminster Gazette.

The New Eleventh Edition Encyclopaedia

Is Being Published Simultaneously in

Special Features of the 11th Edition

(1) The new edition is being published by the Press of the University of Cambridge, England.

(2) It comprises some 40,000 articles, 41,000,000 words, more than 7,000 illustrations, 450 full-page plates and 417 maps.

(3) Though a lineal descendant of ten editions of the Encyclopaedia Britannica, the new work is in no sense a revision of the obsolete text of its predecessor. It has been completely recast and re-written, and is an absolutely fresh, authoritative and up-to-date survey and exposition of the whole field of human knowledge.

(4) The plan of the encyclopaedia has been thoroughly reorganized with a view of combining comprehensiveness with brevity, exhaustive treatment of major subjects, with the great facility of reference in the case of minor subjects.

(5) Something like 15,000 new headings have been added.

(6) The articles have been written by 1,500 contributors—scholars of the highest distinction, and experts and practical men and women whose authority in their special subjects is unimpeachable.

(7) A large and distinguished staff of editors (constituting with the 1,500 contributors a virtual College of Research) has been at work for eight years on the production of the new edition; and the organization and editorial control have all along been so perfect that an unprecedented congruity and co-ordination have been attained.

(8) Each article is right up to date, and all the latest discoveries and results of research have been incorporated.

(9) The whole work has been written simultaneously and is being published practically at one time, not volume by volume as heretofore.

(10) To an extent never before realized the work is cosmopolitan—universal. Each article is the work of a first-hand authority, irrespective of whether he happened to live in Great Britain, Canada, France, Germany, Japan, the United States, or any other civilized country. On the list of contributors are to be found the names of 132 members of the staffs of 42 Canadian and United States Colleges and Universities.

(11) The problem of the bulk has been happily solved by the issue of an edition on India paper with flexible bindings. In this format the volumes, though containing 960 to 1,064 pages each, are only 1 inch thick. There is also an impression on ordinary book paper.

Any reader who has not yet received particulars of the new Encyclopaedia Britannica may obtain illustrated prospectus (40 pp.), 56 specimen pages (printed on India paper to show the attractive character of the work in this popular form), and order form giving the present low rates and terms of purchase, by applying to the Canadian office of THE CAMBRIDGE UNIVERSITY PRESS.

(ENGLAND)

The last day on which you can post your order for the Encyclopaedia of publication prices is WEDNESDAY, MAY 31st. Orders bring a postmark higher prices, which will come into effect on June 1st.

It is certain that hundreds of readers of this notice intend to purchase the edition until nearer the closing date, under the impression that a few weeks' delay that the delay of even one week means that thousands of other applications will and inevitable delay in getting their sets; for all orders are dealt strictly in the keep up with the demand.

Australia, India, South Africa, New Zealand, each have got their share; are cabling to England every week the number of sets in the various styles which out with the least delay possible, but—and this must be emphasized—there is a limit to the speed with which Printers and Binders can turn out the requisitions, which are rapidly growing to formidable figures and five other countries there is a limit to the speed with which Printers and Binders can turn out the

It is calculated that if the sheets of the two thousand of paper used from North Pole to South, with a few hundred miles to spare—that if the volume a pile 12 miles high, or twice the height of Mount Everest, with two miles to spare the task of issuing at one time so vast a work. They are given to show that sets and the last must necessarily be considerable.

If you have made up your mind that the new Britannica is what you need, whether of your children, we urge you to send in your application without any loss of time delivery, and at the same time you will be helping us to make provision for an additional within a reasonable time. Applications may be made on the form printed on this
