Work
Waterwheels,
Turbines, ect.

Little Tuggers are simple, sturdy one-man portable hoists. They will operate on either steam or air and can be fastened anywhere and in any position without special fittings. In the mine, shipyard and industrial plant, on the contract job or in the yard spotting cars—wherever there are any hoisting or hauling jobs—is the place for Little Tuggers. Years ago cars were pulled, pushed, or barred and cussed around by hand, or drawn by horses. Then came the big unwieldy steam engine and boiler, and now this hauling and switching of cars and odd handling and hoisting jobs are done by Little Tuggers far quicker and much cheaper.

Help your men to get over the habit of dropping their work to "lend a hand." Do it with Little Tuggers. Bulletin 433
