FRIDAY, NOVEMBER 5, 1920

For Suffering Children.

No stronger call could be made to humanity than that of suffering children, and on their behalf particularly the Canadian Red Cross will appeal throughout Canada during Armistice week. Each provincial division of the Red Cross will have charge of the arrangements in its own province, and all the work should be put down to the local branch or with the headquarters of the Provincial Division if no local branch is organized.

Our Wheat Fields.

At no time in the history of Canada has her wheat fields meant so much to the world as now. Canada produces wheat of the finest grades and in such large quantities as to place the Dominion well up among the wheat-producing countries of the world. Both Federal and Provincial Departments of Agriculture have done their share in improving wheat varieties and extending the growth of this necessary cereal. An interesting account of the work that has been done is contained in the May number of the Agricultural Gazette, the official organ of the Department of Agriculture at Ottawa. It is there shown that the most widely grown varieties were developed by Canadian scientists. Preston, Stanley, Huron, Bishop, O.A.C. No. 104, Marquis, Ruby, and Prelude have each their valuable factors. The history and characteristics of each are given. The Seed Branch and the Department assist the Canadian Seed Growers' Association in extending the growth of pedigreed varieties. The Seed Branch itself encourages seed crop competitions and seed fairs, tests seeds for farmers and merchants, inspects seeds on sale, and has, through the Canadian Seed Purchasing Commission, ensured supplies of dependable seed wheat during recent years.

Monument to Men's Folly.

"The run of sockeye salmon in the Fraser river, once the greatest salmon river in the world, no longer can be called great," declared J. T. Babcock, Assistant Commissioner of Fisheries for British Columbia, in addressing the Canadian Fisheries Convention in Vancouver. "The Fraser is fished out," he said, "and this condition is a monumental record of man's folly and greed." The only redeeming feature is that it is not too late to take steps to restore the Fraser to its former greatness, he added.

Canada's Greatest Dam.

The greatest dam in Canada has recently been finished, impounding the waters of the Jordan river, near Vancouver. It is of concrete construction, nearly 900 feet long, and the total height measuring from the breast to the bottom of the buttress foundations is 126 feet.

An Actor in Khaki.

A good story is told of a young actor enlisted in Canada, and in his difficulty what was more natural than that he should turn to his profession for help, for he had been trained with the greatest actors in the land. He practiced in seclusion, and one day, when his trained recruits had been drafted and a new batch had appeared, he strode to the job in the full panoply of the Cockney drill sergeant, pungent with the wit and wisdom of the Mile End Road. He never had a greater success in any part, and if his points were not applauded they were promptly obeyed.

Oil-Burning Locomotives.

Oil-burning locomotives are now used in twenty-one states, on fifty-three railroads and on 32,000 miles of track in this country. They consume 42,000,000 barrels of oil yearly.

Carrying a Load.

Many a man who objects to carrying a bundle home from a dry goods store goes home from her club loaded.

Typus in Canada.

In its earlier days Canada suffered from the ravages of a disease then known as "spotted fever" but now known generally by the name of typhus. It is a disease that spreads rapidly and is very destructive of human life. In the years 1846-47 it was brought to Canada by immigrants and caused great loss of life. It is only by taking urgent measures to stamp it out in the centres where it is now raging that it can be prevented from extending.

Shorthorns Took First.

In the block test at the last fat stock show, held at Buenos Aires by the Rural Society of Argentina, animals of the Shorthorn breed were first and third in a class of 13, while second and third places were taken by an Angus cross and a pure-bred Angus respectively.
