home of Rev. N. Franchetti.

The Western Union Office has an entirely new staff. Miss Miller who was such an efficient Manager and had been there so long has resigned her position, in order to take a more responsible position later we understand. The present manager is Miss McLean, who comes from Cape Breton.

Everybody welcome. The Sunday School Picnic of St. Paul's Church will be held on Saturday, August 4 on the Flats, the same place as it was held A good many people were interested in the shift which grows in the swamp near the Fraser Co. Pulp Mill, which produces a blossom which has which prod es a blossom which has a cottony de mattached to it. These balls of down are very fine, and this year there was a great quantity, and many people have wondered it it were not possible to manufacture it into some kind of fabric. The Observer sent a sample of the shrub and the downy blossom to the central experimental station at Ottawa and asked particulars of it and received the folimental station at Ottawa and asked particulars of it and received the following reply from the Botanist, Mr. Groh: "This is one of the many more or less similar willows which occur in Eastern Canada. The silky hairs or down attached to the seeds have been suggested from time to time as a material for fabrics, but I cannot find that any progress has been made in devising a method for its use. Doubtless this would have been done if the down had proved of enough value for this purpose. It would need to have a considerable value to comvalue for this purpose. It would need to have a considerable value to compete with a crop so well adapted to cultivation as cotton, and for which such cheap labor has been available as in the South."

On August 8 there will be an Old English Fair held in Edmundston, English Fair held in Edmundston, with all kinds of attractions, including The Human Checker Game. The Human Checker Game has been played in a great many places, and only a few weeks ago a tremendous crowd was gathered at Revere Beach, Boston, to see this hover entertainment. If is believed that a great many people will be attracted to it in Edmundston, and advance tickets will be on sale the end of next week. The game will be played between two checker enthusiasts on a specially prepared board in the open air. ly prepared board in the open air.

Mr. and Mrs. A. S. McKinley and for their vacation which will be spent on a tour

MAIL CONTRACT

SEALED TENDERS, addressed the Postmaster General, will be the Postmaster General, will be re-ceived at Ottawa until noon, on Fri-day, the 7th September, 1923, for the conveyance of His Majesty's Mails, on a proposed Contract for a period not exceeding four years, 6 times per week on the route: Hartland Rural Route No. 1, from the 1st January next

next.

Printed notices containing further information as to conditions of proposed Contract may be seen and blank forms of Tender may be obtained at the Post Office of Hartland and at the office of the District Superintendent of Postal Service, St. John.

District Superintendent's Office, July 27th, 1923

H. W. WOODS, Act. District Superintendent of Postal Services.

TWENTY years ago Montreal was but a "mere calling place for ships." It had practically no modern cargo handling devices or equipment, its wharf sheds were just wooden shacks which were actually taken down in winter to prevent them being blown away, and much of the merchandise was stored in the open air at the mercy of the wind and weather. Now Montreal is the greatest port of Canada and it is the best located. From a mere riveraide stopping place for ships, it has stepped into the front rank of ocean ports, and has become equipped with facilities for the accommodation of ships and for the handling and storing of freight that are unrivalled on the continent. Despite the fact that Canada has less than 10,000,000 population and that the United States has more than 110,000,000, Montreal now handles a greater volume of business than any port on the American continent with the solitary exception of New York.

The principal reasons for Montreal's supremacy are the facts that it is nearly one thousand miles inland from the ocean, at the head of deep water navigation with direct access to the Atlantic, and that behind it is

Canada Faces the Future With Confidence

ANADIANS have always been noted for courage, optimism and faith in their country.

Canada was not built up by pessimists, nor will Canada continue to develop if her people allow themselves to become creakers and

grouchers. Canada is fundamentally an agricultural country. We have a soil and climate which can grow the world's finest agricultural pro-

Canadian farmers who have earned the capital invested in their farms out of profits in farming are numbered in thousands. These successful farmers have paid off their mortgages, stocked their barns and stables, bought their machinery, made a good living and brought up their families. It meant hard work, but today they are independent.

Money in Mixed Farming

In recent years, at different points on the prairies, oats fed to steers have brought from 70c to \$1.07 as against the Fort William price of 42c per bushel, while barley used for the same purpose has brought as high as 90c as against the Fort William price of 57c-per bushel. Farmers marketing their coarse grains in this way lower marketing cost, have a sure market and make money on their grain, while at the same time they market their roughage, otherwise often wasted. The cattle embargo is now off. Steers are worth more money and certain to make good money for the Canadian farmer from now on.

Money in Pigs

The Dominion Experimental Farms have proved by actual test that there is a profit in teeding pigs. Last year at the Central Farm, Ottawa, after paying

for feed, labor, interest and depreciation, the net profit per pig was still \$4.63.

Profits from Sheep As money-makers, sheep are hard to

Edward Island to British Columbia are found many flocks returning generous profits to their owners.

We Must Cut Production Costs

Canada is meeting with the keenest competition in the marketing of her products. To hold her own and regain her place on the world's market, she must reduce cost of production.

The only way to do this is to increase production per acre, per cow or per other unit.

But improved quality, also, is essential to meet market demands.

The quantity and the quality of the products and the cost of production in competitive countries is beyond our control.

Prices of agricultural products are regulated by world supply and demand.

Hence, decreasing production will not help the Canadian farmer.

Poultry Pays

Poultry Fays

Poultry makes
money for those who
adopt modern methods, whether East or
West. Little Prince
Edward Island markets co-operatively in
carlots, shipping annually unwards of one
million dozen eggs.
The British Columbia
Co-operative Poultry
Men's Eachange
markets in the same
way, thus saving
ruinous glut in their
local market.
There is a market

There is a market for good Canadian horses, whether light or draught.

Grow Seed

canadian Canadia's Northern grown seed possesses extra vitality. There is a large market for it to the south. Canada exports seed potatoes, but imports other seeds. She has the opportunity to grow seeds for herself and for export.

The Future

Ten years from now the pessimists of today will have been forgotten. Britain has removed the embargo against our cattle. She wants our beet and bacon our cheese, butter, eggs and apples, our wheat and flour. As the population of the United States increases, she will compete less and less against us on the British market. Eventually, she will herself be an importer of many other food stuffs besides wheat from this country.

country

Canada has the men, the tlimate, the land, the stock and the potential markets necessary for agricultural success. Let us farm with all the industry and science we can muster. Let's get to work and pay our debts. Canada is moving forward with confidence in its future.
