## Farm and Household.

**Good Roads.**

Next to the public school and to the courts of justice, the making and maintenance of public roads is perhaps the most important work carried on by the officials of the people. Where roads are inefficient or ill supported we may feel sure that there is something wrong in the community—either ignorance or lack of civic pride and public spirit. Where courts fail to punish crime and to uphold the law, we may feel sure of finding in the background cowardly juries or attorneys and judges entangled in sophistry, without brains or courage to break the cobwebs and enforce justice. Any community which tolerates any lapse in such respect need not complain at the result sure to follow. So, too, of roads—for every rut in the roads there is a corresponding rut in the body politic. A very fair idea of the thrift, the efficiency, the public spirit, the prosperity of any community can be obtained by travelling over its roads, making of course due allowance for the natural advantages or disadvantages.

For farmers and horticulturists, the subject is especially important in a financial sense. The marketing of fruit in good condition rather than bruised and injured would make a decided increase in the contents of their purses, as would the saving of wear in vehicles, and a large saving in time by hauling heavier loads over good roads instead of poor ones.

By actual test, the same exertion of force by a team will haul four times the weight on a hard, level road than on a soft or sandy one.

**But Before Going to Bed.**

Here is good advice to thin people who want to grow fat. It is contrary to all early training, but is full of good common sense, and comes from a prominent physician. His suggestions are as follows: "If you are thin and want to put flesh upon your bones, eat before going to bed for the night. Physiology teaches us that there is wasting away of tissue while a person sleeps as well as when he is awake, and this being so, there should be continuous nourishment. Food taken at dinner or in the early evening is always digesting at the time of retiring, and the activity of the process of assimilation continues until long after we are asleep. If the tissues are not nourished, they are pulled down by the wasting process, and as a result sleeplessness ensues. On a full stomach, however, or with some food to sustain the system, their is a building up of the tissue. There is no need for rest in the digestive organs, provided the quantity of food eaten is not above normal during the 24 hours. The long intervals between the meals are bad for the stomach, from the fact that the cessation and resumption of work of the digestive organs tends to enfeeble them. A moderate working of the organs through the 24 hours is much more beneficial. I would advise those suffering from insomnia to sleep something to eat before going to sleep always. A glass of milk and bread, or any digestible food will do."

**About House Plants.**

For most flowering plants the windows opening to the south are preferable to those with a western outlook, as during the short days of winter the plants in the latter will have but little sun, and then it will be too low down near the horizon. For a few plants the windows looking to the east may be used and for ferns and similar shade-loving plants, they are desirable. While the northern windows may be used for some of that class of plants, it is not a desirable exposure.

In case a bay window upon the south side of the living room can be obtained for flowers, very good results can be secured. It should be separated from the room by glass doors that can be thrown open or closed at pleasure, but in case they are not to be had, much of the labor of keeping the plants in good condition can be saved, if curtains are provided to be used when sweeping. In addition to hooks for hanging baskets and bracket stands for pot plants, it will be well to have a shelf, from one to two feet in width, according to the dimensions of the window, upon which to arrange the smaller plants. This should have side pieces one to two inches high and a zinc lining. The bottle could then be covered with coarse gravel or fine pebbles, and much better growth could be secured, as the plants in small pots would then be less likely to dry out.

A simple propagating bed can be very easily arranged by supplying the needed, sary clean sand and a lamp to furnish bottom heat, unless heating pipes run along under the shelf, when they would only need to be boxed in. In case the lamp is used, it will be necessary to provide sort of shield to prevent it from setting fire to the wooden shelf. A shallow galvanized iron pan filled with plaster suspended above the lamp and close to the bottom of the shelf, will answer the purpose.

If an ordinary window is to be used, it will be well to have a similar shelf at the height of the window sill. If made two or three feet longer than the window is wide, it will hold a considerable number of plants. For the bay window and the common window as well, if the size of the room admits of it, a plant stand with shelves in the form of a stairs, or with a

flat top, can be used to good advantage to display the larger plants. By having it arranged with casters, if the plants that require a high temperature are kept upon it, upon cold nights it will be an easy matter to roll it back from the window and thus save the tender plants from becoming chilled.

**Effect of Dirty Milk.**

In the mind of a great many careless and indifferent people all this talk about cleanliness in the dairy is sheer nonsense, said Robert's Dairyman. They happen never to have seen any bad effects from their own dirtiness, or if they did see it they did not know it. But, nevertheless, whether they know it or not, dirty is dangerous in milk, dangerous to health, dangerous to flavor and consequently dangerous to profit. Every one nearly has heard of cases of poisoning from milk, ice cream or cheese. This poison is called tyrotoxigen and belongs to a family of poisons called ptomaines.

Professor Vaughan of the Michigan University has studied and traced out the history, character and source of these poisons to a greater degree than any other living man. Consequently what he has found out ought to be of value to any man who knows enough to appreciate knowledge. Professor Vaughan found that the almost invariable source of such poison, when found in milk or the products of milk, was simply dirt. The men or women who handled the milk were dirty, their hands of milk, and they allowed the surroundings to be dirty and the milk itself to be badly cleaned.

Here is one of many cases of facts which will emphasize the value of this preachment for clean work in the dairy. For some time City Physician Nottingham of Lansing, Mich., has been at work urging those dairymen who supply the city with milk to take greater pains to keep their stables and utensils clean and sweet.

The other night several families on the east side of the city were poisoned by using the milk which came from one of the dairies which had been ordered cleaned. No doubt the owner of that dairy thought in his wisdom that all this talk about the necessity of rigid cleanliness was all humbug. Now he stands with a ruined business, all because he would not post himself as to what is the truth. "How shall a man know the light who refuses to open his eyes to the present situation?"

**For Breeding Animals.**

It is astonishing what a large number of animals of inferior type are to be found owned by men who advertise themselves as breeders, and the amount of damage these low class ones do the breeds they represent cannot be readily estimated, writes Professor C. S. Plumb in The Breeder's Gazette. A good illustration of this is seen in the present standing of the Jersey in one state that I am fairly familiar with. There has been so much low class breeding practiced and so many decidedly inferior animals have been foisted on farmers, who ought to have known better than to have bought them that in many localities it is like waving a red flag before a bull to say "Jersey."

Several conditions may be regarded as responsible for the present situation, first, indiscriminate breeding. The popularity of the Jersey because so great that people bought anything in the shape of females of the breed, and they were bred right and left, with a result that might be expected. In the anxiety to secure calves as soon as possible many heifers were bred long before they had become yearlings. I visited one prominent breeder who showed me a number of young things, small and thickset, that were heavy with calf. This man was striking a serious blow at the Jersey interests of his community. He was tearing down the constitution of his own herd, furnishing some of his poor material to other herds and assisting them in the downward movement. He did not know the first principle of successful breeding.

Second, in order to work the people there are many called breeders who rather are "cow jockeys," who buy old "skates" and cheap stuff by the carload and ship them into a community where occasionally they hold an auction sale of "pure bred Jerseys." These men are sometimes good advertisers, but they have done great harm to Jersey interests. So long as they will sell they do not care about the merit of the stuff. There are those who publish voluminous catalogues of the stock to be sold as full of pedigree as an egg is full of meat, but pedigree is about the only thing they have to recommend them. These men have worked a great damage to the Jersey interests in the central west, as I have good reason to know from personal observation.

Third, the purchasing of cheap breeding males is a very serious cause for so many inferior herds. Too many men are influenced too much by the cost of stock and not enough by quality, and the average breeder will purchase the cheaper of two animals where cash is concerned.

**WANTED—SEVERAL BRIGHT AND HONEST** persons to represent us as Managers in this and close by counties. Salary \$800 a year and expenses. Straight, bona-fide, no more, no less salary. Position permanent. Our references any bank in any town. It is mostly office work conducted at home. Reference. Enclosed self-addressed stamped envelope. THE DOMINION COMPANY, Dept. 3, Chicago.

## Drowned in Dyspeptic Despair.

Are Thousands of Suffering Canadians. Like the stab of a knife it catches you in the side, or sends agonizing pangs through the pit of your stomach after eating. It worries and wears you till your nerves give out, and, like a drowning man, you feel you are sinking day by day and help can not reach you. In this you are mistaken. No matter how deep you have sunk, PETTY'S will reach you. As the fabled Mermaid is said to seek and soothe the drowned, so will the real PETTY'S seek your trouble and soothe your pain. Indigestion, biliousness, headache, and that despondent feeling that makes so many lives miserable, depart when PETTY'S are called in. No other medicine is compounded with such care, no other is so pure, so effective as DR. PETTY'S FILL.

Dr. J. W. Petty, M.D., is the author of the well-known "Dyspeptic's Guide," which is a complete treatise on the subject of indigestion, and is sold by all druggists and chemists. It is a most valuable work, and is highly recommended by the medical profession.

**MAIN STREET, GAGETOWN, N. B.**

Often in the morning there comes a feeling of weariness, indescribable; not exactly ill, nor fit to work, but too near well to remain idle. A Ripans Tabule taken at night, before retiring, or just after dinner, has been known to drive away that weariness for months.

**WANTED—A man of good health that R.I.P.A.N.S. will not benefit. Send five cents to Ripans, 10, 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46, 48, 50, 52, 54, 56, 58, 60, 62, 64, 66, 68, 70, 72, 74, 76, 78, 80, 82, 84, 86, 88, 90, 92, 94, 96, 98, 100, 102, 104, 106, 108, 110, 112, 114, 116, 118, 120, 122, 124, 126, 128, 130, 132, 134, 136, 138, 140, 142, 144, 146, 148, 150, 152, 154, 156, 158, 160, 162, 164, 166, 168, 170, 172, 174, 176, 178, 180, 182, 184, 186, 188, 190, 192, 194, 196, 198, 200, 202, 204, 206, 208, 210, 212, 214, 216, 218, 220, 222, 224, 226, 228, 230, 232, 234, 236, 238, 240, 242, 244, 246, 248, 250, 252, 254, 256, 258, 260, 262, 264, 266, 268, 270, 272, 274, 276, 278, 280, 282, 284, 286, 288, 290, 292, 294, 296, 298, 300, 302, 304, 306, 308, 310, 312, 314, 316, 318, 320, 322, 324, 326, 328, 330, 332, 334, 336, 338, 340, 342, 344, 346, 348, 350, 352, 354, 356, 358, 360, 362, 364, 366, 368, 370, 372, 374, 376, 378, 380, 382, 384, 386, 388, 390, 392, 394, 396, 398, 400, 402, 404, 406, 408, 410, 412, 414, 416, 418, 420, 422, 424, 426, 428, 430, 432, 434, 436, 438, 440, 442, 444, 446, 448, 450, 452, 454, 456, 458, 460, 462, 464, 466, 468, 470, 472, 474, 476, 478, 480, 482, 484, 486, 488, 490, 492, 494, 496, 498, 500, 502, 504, 506, 508, 510, 512, 514, 516, 518, 520, 522, 524, 526, 528, 530, 532, 534, 536, 538, 540, 542, 544, 546, 548, 550, 552, 554, 556, 558, 560, 562, 564, 566, 568, 570, 572, 574, 576, 578, 580, 582, 584, 586, 588, 590, 592, 594, 596, 598, 600, 602, 604, 606, 608, 610, 612, 614, 616, 618, 620, 622, 624, 626, 628, 630, 632, 634, 636, 638, 640, 642, 644, 646, 648, 650, 652, 654, 656, 658, 660, 662, 664, 666, 668, 670, 672, 674, 676, 678, 680, 682, 684, 686, 688, 690, 692, 694, 696, 698, 700, 702, 704, 706, 708, 710, 712, 714, 716, 718, 720, 722, 724, 726, 728, 730, 732, 734, 736, 738, 740, 742, 744, 746, 748, 750, 752, 754, 756, 758, 760, 762, 764, 766, 768, 770, 772, 774, 776, 778, 780, 782, 784, 786, 788, 790, 792, 794, 796, 798, 800, 802, 804, 806, 808, 810, 812, 814, 816, 818, 820, 822, 824, 826, 828, 830, 832, 834, 836, 838, 840, 842, 844, 846, 848, 850, 852, 854, 856, 858, 860, 862, 864, 866, 868, 870, 872, 874, 876, 878, 880, 882, 884, 886, 888, 890, 892, 894, 896, 898, 900, 902, 904, 906, 908, 910, 912, 914, 916, 918, 920, 922, 924, 926, 928, 930, 932,**
