MAKEGOODBREAD

You must have Good Yeast

GOOD BREAD is without question, the most important article of food in the catalog of man's diet; surely, it is the "staff of life." Good bread is obtainable only by using the Best Yeast, the best flour, and adopt ing the best method of combining the two. Compressed Yeast is in all respects the best commercial Yeast yet discovered, and Fleischmann's Yeast is indisputably the most successful and best leaven known to the world. It is uniform in quality and strength. It saves time and labor, and relieves the housewife of the vexation and worriment she secessarily suffers from the use of an inferior or unreliable leaven. It is, moreover, a fact that with the use of Fleischmann's Yeast, more loaves of bread of the same weight can be produced from a gven quantity of flour than can be produced with the use of any other kind of Yeast.

This is explained by the more thorough fermentation and expansion which the minute particles of flour undergo, thereby increasing the size of the mass and at the same time adding to the nutritive properties of the bread. This fact may be clearly and easily demonstrated by any who doubt that there is economy in using Fleischmann's Yeast.

If you have never used this Yeast give it a trial. Ask your Grocer for a "Fleischmann" Recipe.
