WOOD,

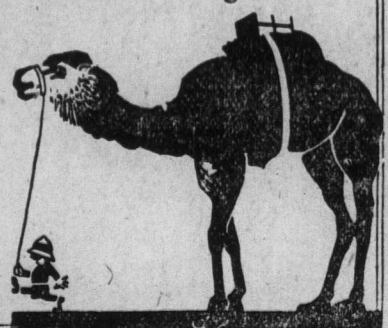

GOOD SHOES.

AS THE CAMEL

is indispensable to the traveller crossing the African deserts, so also is SUNLIGHT SOAP indispensable to a careful housewife. A Camel can go for several days without drinking, but a good housewife cannot afford to let a single day pass without putting SUNLIGHT SOAP to some use. The first duty of every housewife is to economise; the duty of

SUNLIGHT SOAP

is to help the housewife to economise. The daily use of SUNLIGHT SOAP is practical economy. It does the most washing in the shortest time, with least labour, and with no discomfort. Use a piece in your next wash, and you will be convinced as to its value.

THE THOUGHTS OF THEOBALD.

COAL.

There is at present an unprecedented state of affairs in our city. Aggravated in the first instance by an unreasonable increase in the price of coal, and in the second place by the danger of a coal famine, public spirit has forced the Government to "interfere" with a business, and to say that coal must be sold at a certain price and delivered only in small quantities, and only to people who are without coal.

On the face of it it looks very strange and seems rather an unwarrantable proceeding. But after all, what does it mean? Does it not mean that the thousands of families in the city are disclaiming the right of a few coal merchants to make them suffer? And is not a Government the expression of the people's wishes?

The people of a city or country surely are the ones to say how their business ought to be run, and in this case the people have conquered by sheer force, and made a tardy, hesitating and perhaps unwilling Government obey its will. The people who are educated up to something more than "doing their neighbours in business" so that eventually their ideals will find expression in a Government that will work fearlessly for their interests.

In the coal crisis, the action of a few merchants is no more to be stood than would be the actions of two or three members of a Club if they attempted to "dictate" to the other members.

I question if it would not have been in the public interest to have commandeered the Fogota's coal also. She is owned by Crosbie Co. and the question is: Did it actually cost Crosbie & Co. any more to land this cargo than it would have cost last year? Did it cost them \$2.50 more in freight? Now if there is any danger of a shortage this cargo should have to be sold under the same restrictions as the old stocks are being sold. Also the cargo due to Bowring Bros. Sealing Steamer requirements are secondary to household needs. We must not depend too much on the big steamer coming—something may happen to her and we may never see the coal.

There should be no large stocks of coal sold to any one person. I have heard of one of our Banks, which, with all its riches, hurriedly sent down last week to "collar" a large quantity of hard coal. To the credit of the coal dealer—the order was refused.

ANTHRACITE.

No one has bothered much about hard coal. The price was put up \$3.00 but this "grab" has been lost sight of in the excitement over soft coal. Now there is a whole host of people of moderate means, who endeavour to have the comfort of a hall stove, to whom this rise will mean something and it ought to be condemned as much as the rise in soft coal. There is plenty of hard coal in town and there is no danger of a shortage.

EXCESSIVE PROFITS.

All this excessive profit is an injury to the welfare of the people. It is as a matter of fact, worse than crimes which are punished severely by our

Courts. Those crimes are committed generally as the result of sudden temper of mental disturbances, while this "polite robbery" as Ruskin calls it, is done as a result of premeditation and long-considered resolution. The net result of excessive profits has been to drive the people to do their own business and co-operative stores have been the outcome. These have grown to such an extent in England that Companies own whole factories, which are run similarly to our factories here with the difference that the shareholders there use profits to cheapen the article to the consumers (who are themselves) instead of—as we do—dividing the profits among the shareholders of the Company. There is nothing to prevent a group of citizens getting together, and pooling their interests. Our wealthy men do it, so why not others.

COAL COMMITTEE.

This Committee, appointed by the Government, practically has to tackle the actual work of distributing the commandeered coal, and to see as far as they are able, that no one gets coal except those who actually need it; in a word, to see that houses and factories are kept running, and to husband the coal against a possible shortage. I think that any order from such charitable Societies as the Dorcas, St. Vincent de Paul, and church organizations should be provided for before all this cheap coal is sold and doubtless a list of these requirements handed in to the Government would be considered.

THANKS!

I thank that kind one for the verses in Thursday's paper, so undeserved. I think that the main credit belongs to the Editor of The Telegram, whose prompt advice and forceful words, backed also by Mr. Coaker, did more to solve the coal crisis than anything else. As someone has said Dr. Lloyd does things more than he mouths his deeds go farther than his words, and I have it from good authority that he certainly did not spare his energies at the coal meetings to bring about the result which enables our people to buy coal now at \$8.00 a ton.

Minard's Liniment Co., Limited.

Ciennien, Theodore Dorais, a customer of mine, was completely cured of rheumatism after five years of suffering, by the judicious use of MINARD'S LINIMENT.

The above facts can be verified by writing to him, to the Parish Priest or any of his neighbors.

Francis J. Hunter, retired superintendent of the Bank of Montreal, recently delivered an address on "Britain's Oldest Colony" before the St. James' Literary Society, and by request repeated the address before the Newfoundland Society in St. George's Hall—Montreal Star.

Scientific Cure For Eczema.

New Discovery—Thousands Find Relief.

No scientific discovery in recent years has attracted such wide-spread attention among physicians in this country and throughout Canada as the wonderful D. D. D. Prescription for Eczema.

After years of debate, medical authorities are now agreed that eczema in the blood tract are caused by myriads of micro-organisms gnawing the flesh just below the epidermis. The patient is perfectly healthy, it is only the skin that is diseased.

Hence, scientists are now agreed that you must cure the skin through the skin. The medicine must be in

liquid form in order to penetrate properly. The true remedy has been discovered in D. D. D. Prescription. The instant you wash with this cleansing, soothing liquid, you will find the itch gone. Simply to use, absolutely harmless to the most sensitive skin. D. D. D. Prescription is the most scientific and efficient remedy known for Eczema in all its forms. Bad Leg, Pimples, Scalp Troubles, Open Sores and Itching Rash, Salt Rheum, and Ring Worm; and all other skin troubles yield to D. D. D. The first bottle will prove it.

Stop the itch now, get a bottle of D. D. D. Prescription to-day. Sold everywhere.

Star of the Sea Association, Holyrood.

On the 9th inst., the annual meeting of the above named association took place in the Star Hall, before a large and enthusiastic membership, with Vice-President, Capt. Walter Kennedy, in the chair, the President, Capt. John Lewis, being unavoidably absent. After the usual preliminaries were gone through, the report of the Society was read by the Secretary, Mr. R. Dwyer, who in well chosen words, outlined the work of the previous year and showed the Society to be in good standing both financially and otherwise.

The report being moved and adopted, the officers vacated their seats and the business of electing officers for 1916 began. Mr. J. J. Hicks was moved to the chair to conduct the election which he did in an able and masterly manner assisted by Mr. R. Dwyer as Secretary and Messrs. Wm. Veitch and T. Cleary as check clerks.

The election was keenly contested in every phase and finally the new officers elected took their places and in oratory that was suggestive of a new life of the Society, thanked the members for the honour conferred on them, and promised to be in a position to give a good account of their stewardship at the next annual meeting.

A vote of thanks was then tendered Mr. J. J. Hicks for the very able and energetic manner in which he carried out the election. Capt. Walter Kennedy moved a vote of thanks to Mr. R. Dwyer for his many valuable services rendered to the Society during the past 14 years, also to Capt. John Lewis who so ably filled the presidential chair in the past and whose interest in the Society, since its formation, in no small way brought it to its present standing.

A vote of thanks was also tendered Miss Nellie Flynn, organist, by whose talent and untiring efforts many successful performances were organized for the Society's benefit.

The following are the officers and executive elected for 1916: W. P. Walsh, President (elected); J. J. Hicks, Vice-President (elected); Wm. Veitch, 1st Asst. Vice-President (elected); Wm. Condy, 2nd Asst. Vice-President (elected); James Carroll, Treasurer (re-elected); C. R. Kennedy, Asst. Treasurer (elected); J. A. Hamilton, Secretary (elected); Wm. Penney, Grand Marshal (elected); Edward Butler, Deputy Marshal (elected); James Wall, Custodian (elected).

Executive Committee: Messrs. J. Carroll, Jas. J. Macdonald, Michael C. Maloney, M. C. Dunphy and Thomas Cleary.

Holyrood, Jan. 13th, '16.

Wonderful Bilious Remedy Actually Prevents Attacks

There are two great causes of biliousness—these are constipation and defective liver action. When Dr. Hamilton's Pills are taken, they not only correct constipated bowels, but act upon the liver as well.

Quite unlike ordinary medicines which purge and give temporary relief, Dr. Hamilton's Pills remove the conditions which cause biliousness, and thus permanent cures are effected. No person who occasionally uses Dr. Hamilton's Pills will ever suffer from the headache, bad stomach, or bilious complaint. Get a 25c. box to-day.

"They Fight Like Hell"

The Governor has received by mail a letter written by a most distinguished and gallant General in which occurs the following passage: "The Newfoundlanders are a class by themselves. As an enemy they are to me: They fight like hell and have an air of refinement and gentleness."

SPEEDING YEARS.

How swift the years roll on, my friend, how swift the years roll on! They come and make their bow and bend, they smile and then they're gone! Some morning, in the mirror's face, we see a snowy hair; and we've time to dye the place, a hundred more are there. But yesterday my locks were brown, and life seemed in its dawn, and now the gray spreads o'er my crown—how swift the years roll on! But yesterday I held a child upon my willing knee; an infant innocent and mild, and beautiful was he; and now in tones of bass he speaks, he's learned to toll and spin, and he has whiskers on his cheeks, and more upon his chin. Oh, can this be that little child, this man of weight and brawn? How can the years be reconciled? How swift the years roll on! But yesterday my limbs were free from stiffness, pain and ache; and I could climb the tallest tree, or swim across a lake. But if I walk a block to-day, my wind and strength are gone; they take me homeward on a drag; how swift the years roll on!

Gros-grain ribbon is much used for sashes, and they are apt to be finished with silk tassels.

SO AUSTRIA WILL EXCLUDE LUX-URIES.

LONDON, To-day.

Owing to the serious fall in her exchange, says the Morning Post, Austria contemplates the creation of an office for the control of imports and to exclude luxuries.

10 0 P.M.

"VIVA MERICA."

ROME, To-day.

Cardinal Mercier, Primate of Belgium, arrived in Rome to-day and was received at the station by a Belgian Minister to the Vatican, Mgr. Desan-

per, Papal Master of Chamber. A large number of residents of Belgian colony and a large crowd of Italians also greeted the Cardinal, saying: "Viva Mercier," "Viva Belgium" accompanying him along the streets to the Belgium College where he is stopping.

GREAT DAMAGE IN HOLLAND.

LONDON, To-day.

Damage caused by flood in northern Holland, said by Amsterdam corres-

pondent to be greater than was believed at first. The great dykes along Zuider Zee collapsed at several places. Peasants with their cattle fled precipitately before rising water.

BRIGANDRY IN CHINA.

PERKIN, To-day.

The American Vice-Consul at Canton sent a telegram yesterday to the American Minister Reisch here that all was quiet in Canton and no trouble was anticipated. Bandits have looted and burned Sarat and other villages in the province of Shansi and are threatening Kedingtun. Missionaries at Patowitchan, Sarat and Part-belong in Mongolia are in danger. The Government is rushing troops there.

GREEK PROTEST ABOUT CORFU.

PARIS, To-day.

A despatch from Athens states the Greek Government has decided to protest against the landing of troops at Corfu, alleging the disembarkation took place before the arrival of the Entente Allies of their intention to occupy Corfu. To this the Allies replied that no answer was expected to intimation of their decision, due to the necessity of an intimation, moreover, which announced that they had no intention of infringing upon Greek sovereignty of the island.

Hardening of the Arteries

An Interesting Explanation of How This Dreaded Condition is Brought About.

You take out the garden hose in the spring, turn on the water, and if the rubber has got hard and brittle the tubing bursts and water spurts out in all directions.

The arteries of the human body may be likened to small rubber pipes, which go everywhere through the body and carry blood to the hands and feet, as well as to the nerves, muscles and vital organs.

If this blood is burdened with the poisons left over when the liver and kidneys are not properly performing their filtering work, these poisons form a deposit on the inside walls of the arteries.

The deposit thus formed gradually thickens and hardens the walls of the arteries. The tiny blood vessels of the liver are affected, and thence comes that fatal disease—cirrhosis of the liver. The cells of the kidneys become starved for want of blood, and Bright's disease gets its start.

In health the arteries have the elasticity of rubber, and expand, contract or elongate, as required by the demands of the blood pressure. Hardened, the arteries are like so much brittle rubber tubing.

The blood pressure comes on, the tubing bursts, and the resulting blood clot on the brain causes apoplexy.

It will be plainly seen that the cause of trouble is in the inefficient condition of the liver and kidneys. When these filtering organs are kept healthy and active, and the bowels regular in the removal of waste matter, there is no chance for such dreadful conditions as hardening of the arteries bring about.

As in all forms of serious disease, prevention is the only wise course to follow. You can positively depend on Dr. Chase's Kidney-Liver Pills to awaken the action of liver and kidneys, and also ensure the regularity of movement of the bowels. It is only by the activity of these organs that the blood can be kept pure and free from uric acid and other substances which form deposits in the arteries and at other points in the human system, causing pain, suffering and serious disease.

When you think of the scores of common ills, such as colds, indigestion, biliousness, headaches, backaches, etc., which arise from a torpid condition of these organs, you will better understand the reason why Dr. Chase's Kidney-Liver Pills are the favorite family medicine in many thousands of homes. By keeping the liver, kidneys and bowels active they cure the common ills of life, and prevent serious disease. One pill a dose. 25 cents a box, all dealers, or Edman-

son, Bates & Co., Ltd., Toronto.
