Blood Making Medicine

It took centuries for medical science to discover that the blood is the life. Now, it is known that if the blood were always abundant, rich and pure, very few people would ever be ill. It was not until the end of the 19th century that an instrument was invented for measuring the red part of the blood. Then doctors could tell just how anaemic a patient had become, and with medicine to make new blood the patient soon got well.

All the blood in the body is nourished and kept rich and red by the food taken daily, but when, for any reason, a person is run down and cannot make sufficient blood from the food to keep the body in health, then a blood-making medicine is required. The simplest and very best of blood-makers suitable for home use by anyone, is Dr. Williams' Pink Pills. When a course of these pills is taken their good effect is soon shown in an improved appetite, stronger nerves, a sound digestion and an ability to master your work and enjoy leisure hours. For women there is a prompt relief of, or prevention of ailments which make life a burden. As an all-round medicine for the cure of ailments due to weak, watery blood no medicine discovered by medical science can equal Dr. Williams' Pink Pills.

You can get these pills through any dealer in medicine, or by mail at 50 cents a box or six boxes for \$2.50 from the Dr. Williams' Medicine Co., Brockville, Ont.
