Associated Press Despatch.

New York, Oct. 2.—Opening strength ave way to irregularity in the morning trading, with special sellling pressure directed against the local gas shares, presumably due to the announcement of heavy new financing by one of the Brooklyn public utilities. Brooklyn Union Gas drouped nearly 4 points, and the others yielded 1½ to 2½. Coppers also turned heavy, with Anaconda the weak feature. American Can and Baddwin reacted about a point from their early highs, and General Electric dropped 2½, but Mack Truck continued in demand, rising to 102%. Independent strength also was shown by such issues as Foundation Company, American Ice, Burns Bros. A. United Fruit and Famous Players. Prices headed upward again around noon, when active short covering was resumed in some of the popular issues. Call money renewed at 5½ per cent.

Canadian Press Despatch.

Winnipeg, Oct. 2. — Unsettled weather conditions throughout the prairie provinces again threaten to delay harvesting operations, although threshing has been resumed on a general scale in Alberta and the southern parts of Saskatchewan and Manitoba.

A two-day respite from rain, which drenched all three provinces during the latter part of last week, permitted many farmers to start threshing of their crops, but where the precipitation was heavy operations have not been resumed.

More rain is predicted for the entire West, and reports of unfavorable weather have already been received from three provinces. In many districts where threshing operations

Grain Markets WINNIPEG

Canadian Press Despatch.
Winnipeg, Oct. 1.—Another nervous. erratic market was experienced in the grain exchange today, with the trade volume not quite so large as yesterday. The market, however, was active, with an excellent class of buying in evidence, which forced prices upward after a weak opening. The close being 1%c higher for October, 1c higher for November, %c higher for December and 1/2c for May. Coarse grains and flax were showing strength, and values

advanced substantially. Exporters were good purchasers of October and November wheat, while spreaders were active buyings of October against sales of December and May, while private wire houses were active selling the local market against purchases in other markets. The trade. Way showed a gain of 1/4 at 103.

Divided the market at the present time being a very technical one. The undertone remains firm, and all declines were stubbornly contested.

There was a good demand for future oats, with advances at about 3c in all months. The demand for barley continues, but heavy offerings caused weakness near the close, which was 1/4c to 11/4c higher. Exporters were fair buyers of rye, and values improved 1/2c to 21/4c. Crushers were in the market for flax, but only limited supplies are coming out, causing a jump of 2c to 7c, the May future showing the biggest gain.

coming out, causing a jump of 2c to 7c, the May future showing the biggest gain.

A good demand came in for cash wheat from shippers to take care of tonnage, and spreads were unchanged to a fraction higher.

There was nothing much doing in cash oats and rye, but barley continued strong, with a large passing trade.

Owing to light offerings, there was nothing doing in flax.
