PHONE 1391. GAS IN THE STOMACH

Recommends Daily Use of Magnesia To Overcome Trouble Caused by Fer-menting Food and Acid Indigestion

Gas and wind in the stomach accompanied by that full, bloated feeling after eating are almost certain evidence of the presence of excessive hydrochloric acid in the stomach, creating so-called "acid indigestion."

Acid stomachs are dangerous because too much acid irritates the delicate lining of the stomach, often leading to gastritis accompanied by serious stomach ulcers. Food ferments and sours, creating the distressing as which distends the stomach and hampers the normal functions of the vital internal organs, often affecting the heart.

It is the worst of folly to neglect such a serious condition or to treat with ordinary digestive aids which have no a serious condition or to treat with ordinary digestive aids which have no neutralizing effect on the stomach acids. Instead get from any druggist a few ounces of Bisurated Magnesia and take a teaspoonful in a quarter glass of water right after eating. This will drive the gas, wind and bloat right out of the body, sweeten the stomach, neutralize the excess acid and prevent its formation and there is no sourness neutranze the excess acid and prevent its formation and there is no sourness or pain. Bisurated Magnesia (in powder or tablet form—never liquid or milk) is harmless to the stomach, inexpensive to take and the best form of magnesia for stomach purposes. It is used by thousands of people who enjoy their meals with no more fear of indigestion.—Adyt.

Ottawa Proposes International Agreement To Eliminate Interference by Ships.

LONGER WAVES URGED

Canadian Press Despatch. Ottawa, Jan. 9.—The department of narine and fisheries which is charged with the control of radio, including proadcasting throughout the Dominion, has instructed Director C. P Edwards of the radio branch, to at tend a conference to be held in New York next Thursday, under the aus-pices of the U. S. government to dis-cuss the question of radio telegraph nterference with broadcasting. The marine and fisheries depart-ment, it is said, has already taken all possible steps in Canada to eliminate such interference by Canadian ships and stations and the band of wave lengths, 300 to 550 metres, is now reserved for broadcasting. Some U. S ships and stations and foreign ships, however, continue to use the wave length of 450 metres for regular telegraph working, to the annoyance of the broadcast listener. Canada considers that broadcasting is now of sufficient importance to warrant the international observation of a band for broadcasting and is lending its

full support to this end.

It was stated at the rand branch today, that the universal substitution continuous wave transmitters for e existing interfering spark transmitters at ship and shore stations cannot take place for some time, owing to the very large amount of capital invested in spark sets. It is hoped, nowever, to have them all operate on waves above the broadcast band, at east during the evening hours. The Canadian government has al-ready installed continuous wave installation of further sets at other

Board Seeks Means To Increase and Conserve Canada's Supply.

Canadian Press Despatch Ottawa, Jan. 9. — Despite the low emands made so far on the coal and a phone message to Welland and a phone message to Welland strengthened his suspicions. He succeeded in detaining Canfield until the police arrived.

anada's fuel supply.

An investigation into the suitability follow volatile coals for domestic use being undertaken at once. These re bituminous coals that do not prouce much smoke or gas and they are
ound in abundance, largely in West
irginia and Pennsylvania. Even in
Researt heating appearance designed Virginia and Pennsylvania. Even in present heating apparatus, designed or hard coal, they are being used to ome extent with satisfaction by lanadian householders.

An investigation will further be made into the insulation and construction of dwelling houses so as to conserve heat. Very shortly also, a pamphlet will be issued on "coke and how to burn it." This is in anticipaion of the greater use of by-product coke in this country following the investigation of L. J. Landt, former a charge of interference with a police of the discharge of his duty. y of Semet-Solvay Company, the results of which will be made public a few months by the board. An endeavor will also be made to duce the further use of peat as an mines branch of a booklet called Facts About Peat."

Re-elected by Acclamation To Presidency of Manitoba Organization.

Canadian Press Despatch.
Winnipeg, Jan. 9.—Mrs. James Elliott of Carman, Manitoba, was reelected by acclamation to the presincy of the United Farm Women fanitoba at the opening of their povention here this afternoon. Mrs. Elliott Mas held office for two years. Mrs. G. E. Gee of Virden, Manitoba, vas returned by acclamatton as vice-

Welland Coroner's Jury Returns Verdict Following Tragedy Christmas Day.

IDENTIFIES CLOTHING

Canadian Press Despatch. Welland, Jan. 9.- Following the inquest held by Coroner Davis today into the death of J. Morningstar, whose remains were found in the ruins of his home Christmas, the transmitters at many of its shore stations and will proceed with the jury returned a verdict holding W. A. Canfield responsible.

Albert Canfield sat in court between two provincial constables and listened indifferently to the evidence. Mrs. L. A. Weaver, sister of the deceased, identified clothing found in the possession of Canfield as belonging to her brother.

George L. Park, manager of the Bank of Commerce at Dunnville, said Canfield came to him and presented n Imperial bank savings to buy a car. There was \$10,000 credit on the book. "I asked him his name," said Park, "and he said it

was George Albert Morningstar. He said he had his money in the Imperial bank at Welland.

TO KEEP YOUR WHITE THINGS WHITE

Your fine napery and decorative linens, your dainty lingerie, sheets and pillow slips, towels and baby clothes, your tea cloths and aprons. They must be kept white if they are to retain their original beauty. Such homely devices as using your linens in rotation, or wrapping the finest pieces in dark blue tissue paper help to attain this whiteness. But most important of all is the treatment they receive on wash days.

CONVENIENCES FOR THE WELL-EQUIPPED LAUNDRY THE WONDER ELECTRIC WASHER

ot demonstrate it to you.

"It's a Wonder." No longer do snow white linens exact a heavy toll in manual labor and nervous energy. Modern science has given you a dependable servant who never telephones at nine o'clock on Monday morning to say that

she can't come today. The "Wonder" Electric Washer has a large tub of extra heavy copper, on a painted steel frame, with four legs and easy-rolling casters. It is compact, and the gear housings are completely covered. All the machinery is completely covered so children may handle it safely.

It combines the principles of the vacuum and agitation, so that by turning the clothes and forcing the water through and through them, they are thoroughly cleaned,

without the usual wear and tear. Another popular feature of this machine is the adjustable wringer, which swings away from the tub and is easily reversible. The wringer and complete machine is priced at \$150.00 Miss Simplicity \$98.00
"Seeing is believing!" Won't you come in some morning and see

for yourself how simple and efficient it is? It will be a pleasure
