We don't ask you to encourage home industry,—we ask you to see the quality of goods we manufacture and get our quotations. Goods manufactured by us are considered High-Grade in the leading cities of Canada. Foreign woods imported direct from the south.

MAIL ORDERS

We solicit out of Town orders, which receive our personal attention. The length of time taken to fill orders is governed very largely by how busy we are in the department of our factory in which the particular goods are made. While we have exceptional facilities for promptly turning out goods, it is important to place orders as far ahead as possible. Orders are filled by us in the rotation in which they are received, and customers can always depend on our doing everything in reason to give prompt dispatch.

OUR OFFICE IS CONNECTED WITH THE N. B. TELEPHONE BY TWO SEPARATE LINES INSURING PROMPT ATTENDANCE.
OFFICE HOURS—7 A. M. TO 6 P. M.

BASEBALL NOTES AND JOTTINGS

Mechanics Take New Lease of Life and Win Two Good Games in Succession

Last Friday evening under perfect conditions the Mechanics and Victorias met in deadly strife at the bawlyard. The attendance was much better than usual, including representatives of the Church, the judicial bench, Doc. Price, two policemen, Jack Reid, suffragettes, sweet girl graduates in white and many others too numerous to mention. This game also marked the reappearance of our one and only Slipp in the box for Mechanics. Just to get his arm into working order in the first innings Davie gave Delaney such a soft one that Paddy knocked it over the fence for a home run, at which Davie smiled. In the 7th Slipp ran to third to get Delaney who was safe, then walked back to the box and allowed Delaney to seal home, but Davie kept on smiling.

The Victorias are much to be commended for their sportsmanship a wrong decision in the third when Pond was called out in error by the Umpire going unquestioned. The

TODAY IS ANNIVERSARY OF THE CAMPBELLTON FIRE

Views of Some of the Prominent Buildings Now Erected in Place of the Old Wooden Structures

A THREE YEARS PROGRESS

Friday, July 11th is the anniversary of the great fire of 1910 which practically wiped out Campbellton three years ago. Today looking around our town with its broad streets, handsome buildings and residences which are in very truth HOMES, travellers are amazed at the change, and with wonder in their voice cry "How was it done." We are certainly proud of our town, proud of its inhabitants, and proud of what has been accomplished.

Three years ago Campbellton as a town was dead, it was thought, her life smouldering in the ashes of ruined and destroyed homes, the labors of a lifetime consumed in a

moment before the eyes of many struck dumb with horror; yet hope and ambition are virtues which even fire cannot quench and from the old has arisen a new Campbellton, a fairer, brighter city.

A new era has dawned for the people of the town, history has begun anew and there are now only two dates marked on the calendar of Campbellton time and these are "Before the Fire" "After the Fire."

We have said we are proud of the town and of the people, why? True we can never forget the open-hearted generosity of all shades and classes of people, who contributed so largely to our help in the time of

CLASS PROPHECY OF GRADUATE CLASS

What is Propheesied to Happen to Graduates of Class 1913.

At the request of a number of readers and friends of the graduates we herewith reproduce the "Class Prophecy" of 1913 read in a clear and convincing manner by Miss Greta Metzler, and also the "Last Will and Testament" which was read by Miss Helen Carter.

Class Prophecy

Dear friends and fellow classmates as you know it is always the custom for someone in a graduating class to foretell the future of his or her classmates. By some strange stroke of fortune, this fell to my lot. Although I may often appear to be a dreamer, and as our Principal could tell you I do dream in school yet I waited in vain to dream about my classmates and their future. Moreover, no gypsy fortune teller happened along to help me out, or to reveal to me the future of our class.

One evening about dusk I sat down to think about this matter and to thinking real seriously too, wondering what I was going to do. As it grew darker a white curtain appeared before me, and on this curtain were flashed the figures 1, 9, 2, 3. A voice whispered to me. "Now you are going to have a peep into the future when this curtain rises you will find yourself in the West in a large city and in the year 1923."

Sure enough, the curtain gradually rose and I found myself in a large western city. It was quite early in the morning of a beautiful summer day and along with a number of friends were gathered on the outskirts awaiting the arrival of an aviator. Presently he swooped down to the earth, he explained and told us all about his airship and then asked did we care to go for a spin through the air. After a time my turn came.

Let me add that while he was explaining the various parts to us I thought I recognized his voice but as I could not see his face plainly, on account of his cap and goggles, dismissed that thought from my mind.

You may imagine how one would feel having her first ride in an airship. We flew over the large campus on which the people were gathered, several times. Then Mr. Aviator started on a new route. Never doubting but what he would soon bring me back I settled back to enjoy the scenery and landscape, at least what I could see of it. But it soon grew tiresome flying over a strange country and with an aviator one did not even know.

After a time I managed to say "Mr. Aviator, don't you think you had better take me back now?" The man at the wheel took no notice of me, and thinking him very rude I said no more but as you may know I was beginning to get frightened. Once more I asked him to take me back, and it was then he burst out laughing and removed his cap and goggles and there before me sat my old school friend Mott Lingley.

We were soon talking over old times and the good fun we used to have at C.H.S. How I laughed when he told me he knew me at once and this was the reason why he had not taken me back. Then and there we decided to hunt up all our old class, just to see how they had gotten on.

It was now about ten o'clock and as he knew that we would find Arnold Alexander in Vancouver we set out to hunt him up. On the way Mott told me about his great success as an aviator, showing me the medal he had received from the King for flying across the Atlantic.

Ruins of I. C. R. Station With Two of the Residences Which Escaped the Flames in the Background

game was safe for the Mechanics in the first innings when five runs came in, yet but for the wrong decision the Vics in the third when two runs came in Pond's hit might have meant something. Mechanics completed their seventh inning adding two runs to the game already won.

Score by Innings		1	2	3	4	5	6	7	Total
Victorias		1	0	2	0	1	0	1	5
Mechanics		5	0	1	0	1	0	2	9

Struck out by Love 5, by Slipp 7. Bases on balls by Love 2, by Slipp 1. Left on bases Victorias 4, Mechanics 4. Umpire J. A. O'Keefe. On Monday evening the Mechanics put it all over a weakened I.C.R. team to the time of 12 to 8.

with the kind assistance of Mr. Errors. A goodly number were present and occupying expensive seats in the stand besides the spenders of good real hard earned money were a bunch of sports who had just beat their way back from Van Buren. Many reasons have been advanced for the failure of the aforesaid to make proper connections at Van Buren on their return from Fort Fairfield, but we beg to inform the public that at great expense we have been able to secure the correct reason, but just at this moment we forget what it was.

The Railway boys batted first and got two runs in the first stanza, and got another little one in the sixth spasm making a grand total of three. The Machine boys also started with a two, a one, and one, and then in the fourth blew up the

WAVERLY HOTEL

need. That help was received in the same spirit in which it was given loyally, graciously and thankfully, yet without our own hopes and ambitions all the wealth of the universe could not have raised a post even for the most humble shack. But with an optimistic spirit burning in our hearts, and with the assurance of a continued prosperity, the people of this town set about the rebuilding of homes and business, and as it should be, success has crowned their efforts. Public buildings have been erected, banks and churches have been established better and stronger than before. Whereas nearly all buildings were in the past all wood, now the large stores, banks and other buildings are constructed of brick, concrete, and stone. Even those homes built of wood are now more commodious and beautiful than before, and although many treasures of home which once lost can never be replaced, still there is peace and contentment where once three years ago, there was sorrow and sighing.

In a business sense Campbellton has progressed in a most wonderful way since the fire. It would almost seem as if the destructive conflagration had been a direct source of advertising the facilities, the opportuni-
