

HACKING COUGH OF TWO MONTHS STANDING

Cured by Na-Dru-Co Syrup of Linseed, Licorice and Chlorodyne

You know how hard it is to get rid of a cough that has hung on for even two weeks, let alone two months. So you will appreciate what Na-Dru-Co Syrup of Linseed, Licorice and Chlorodyne did for Mr. Patrick Holland, of East Baltic, P. E. I. He says:

"I suffered from a hacking cough for over two months. I tried several remedies, but they failed to cure me. At last I tried Na-Dru-Co Syrup of Linseed, Licorice and Chlorodyne, and got such relief that I tried more, and after using three bottles was absolutely cured."

The unique, scientific combination of three such reliable remedies makes Na-Dru-Co Syrup of Linseed, Licorice and Chlorodyne the best preparation that has ever been offered for all sorts of colds and coughs. Get a 25c or 50c bottle from your Druggist and see for yourself how effective it is. National Drug and Chemical Co. of Canada, Limited.

WOOD IS NOW DYED IN THE LIVING TREE

Stain is Introduced Into the Trunk and Sap Carries it Upward

Staining wood by inoculating the growing tree with dye fluids is an industry described in the Independent. The staining solution is introduced into the tree by holes bored through the trunk near the ground, and the color spreads with the flow of the sap. The liquid is absorbed very rapidly. A Scotch fir was known to take up three gallons in two days.

When a tree so treated is cut up it is often found to be beautifully veined. This is particularly true in the tropics, because of the rapid upward rush of the sap at certain seasons.

Only dyes soluble in water will serve, and many of these are useless. One per cent. solutions have been found to be the best, and the dye best suited to each wood must be determined in advance by experiment.

"Birch was splendidly colored," the article says, "by malachite green and methylene blue, yet eosin produced a very streaky effect. Eosin is not fast to light, another objection. Aniline chloride reacts with lignin of the wood to produce a beautiful yellow. In fact, many chemicals not in themselves dyes, are suitable, because they act on compounds in the wood to form colors. A splendid salmon-red may be secured by using paraphenylenediamine. Tannic acid acts in a different way. After it has penetrated the wood thoroughly the tree may be cut and sawed into boards and fumed with ammonia just as oak, chestnut and any other wood naturally containing tannic acid is fumed. Treated with potassium dichromate, a rich brown results with a wood which has previously absorbed tannic acid. Thus, cheap woods may be made to equal the more expensive oak in appearance."

SHOOT HIS FATHER IN MISTAKE FOR A DEER

Woodstock, N.B., Nov. 29.—John Jones of Clark Settlement was shot by his son in mistake for a deer yesterday. His arm was shattered.

The following conversation was recently overheard, if we are to believe the man who tells it, upon the stairs of the Berlin elevated. It could never have taken place in New York, naturally, says The Evening Post. There would not have been time. The parties to it were a gentleman and a lady. She began it:

"What impudence!"

"Are you talking about me?"

"I am. Just you. You jabbed me with your umbrella."

"Aburd. I did not jab you with my umbrella."

"But you did. Exactly that. Jabbed me with your umbrella. Don't you know, you brute, that civilized people don't carry umbrellas sticking out like that from under their arms?"

"I tell you, once more, I never did it. I did not jab you with my umbrella."

"More insolence! Yet you're still got the thing under your arm and sticking out. I suppose you'll be jabbing me with your umbrella again in a minute."

"But it isn't my umbrella. It's a borrowed one."

CATHOLIC FORESTERS INCREASE RATES

Follow Lead of Independent Order and Boost the Assessments.

Montreal, Nov. 24.—"The rise in the fees of the Catholic Order of Foresters was the only thing that could be done," stated A. D. Quentin, one of the past officers of the C.O.F., in Montreal, in speaking of a story to the effect that members had resigned on account of the fees. "The order faced a deficit last year, and as a result the fees were raised 50 per cent. This means the fees will be the same as in the Independent Order of Foresters, and the increase was for much the same reason as the increase in the I. O. F. The rates were not adequate, before the increase."

"I think that the members will all be satisfied with the new rates, and that this talk about members quitting is untrue," he continued. "That there will be a meeting on December 4 to discuss the matter is new to me, I do not think that the other officers know of it either."

The opinion of other members of the order seems to be the same, that the increase was the only thing possible. The Canadian Order of Foresters will be the next.

TO ENCOURAGE PULP AND PAPER INDUSTRY

Mr. J. Hall Kelly Presents Two Bills in Legislature

Two Bills were read for the first time in the Quebec Legislature Saturday. They were presented by Mr. Kelly (Bonaventure), for the improvement of conditions for parties wishing to construct and operate pulp mills, the first being an act to allow corporations to expropriate land for the development and utilization of water power, under practically the same conditions as land is now expropriated for the purposes of railway construction, that is, the right to commence operations as soon as a guarantee, to be fixed by a magistrate, has been furnished.

The second Bill was to allow corporations to expropriate land for the purpose of laying pipes for conducting water to pulp and paper mills. Under the present regime, should anybody raise an objection to a company laying such a pipe through their property, the only course is to have an Act of the Provincial Parliament passed giving the desired permission in each specific case. Mr. Kelly's Bill calls for a general permission to expropriate land for the afore-mentioned purpose, providing, of course, that the company pay for any damage done to the property.

Ayer's Pills

Cure Constipation, Superstition, Biliousness, Headache, Indigestion, and all the ailments of the bowels.

Ask Your Doctor.

THE CRATE FATTENING OF POULTRY

Practical experience has shown that crate feeding is not only a very satisfactory but also an economical method of fattening poultry. The saving in the amount of feed required to produce one pound of gain is quite marked, and the feeder is enabled to observe to greater advantage the progress being made by individual birds. He can also, if necessary, curtail the duration of the feeding period in the case of birds which have attained their maximum weight and are ready to be placed in the finishing crate. Crate fattening cannot with success be carried on in a haphazard way. The feeders require to understand the principles of what he is at and to give the necessary attention to the details of his work. In order to teach the proper method of feeding poultry in crates the Live Stock Commissioner at Ottawa has had prepared a seasonable illustrated pamphlet on the subject which explains clearly the construction of a fattening crate, the constituents and preparation of proper rations, the method of feeding, killing and dressing birds and information regarding packing for market. The work which is designated Pamphlet No. 2 of the Live Stock Branch is available to all who apply for it while the edition lasts to the Publication Branch of the Department of Agriculture at Ottawa.

We wish to call your attention to the fact that most infectious diseases such as whooping cough, diphtheria and scarlet fever are contracted when the child has a cold. Chamberlain's Cough Remedy will quickly cure a cold and greatly lessen the danger of contracting these diseases. This remedy is famous for its cures of colds. It contains no opium or other narcotic and may be given to a child with implicit confidence. Sold by all dealers.

MANY DEATHS ON INTERCOLONIAL RY.

Reports for November Show That Ten Employees Have Died

The monthly report of the Intercolonial and Prince Edward Island Railways Employees' Relief and Insurance Association shows ten deaths for the month ending November 25th, according to the report issued by Secretary Paver. Following will be found the names, causes of death, with the amount of insurance in each case:

A. J. McDonald, engineman, Campbellton, malignant growth, \$1,000.

George Bird, retired employee, Halifax, arterio sclerosis, \$250.

Thomas F. Ward, S. C. conductor, Halifax, arterio sclerosis, \$250.

Robert McNichol, retired employee, Moncton, pneumonia, \$500.

James Maher, brakeman, P. E. I., drowned, \$250.

Collingwood Clark, trackman, Halifax, arterio sclerosis, \$250.

John Bradbury, retired employee, Moncton, general debility, \$1,000.

Elizabeth Burbridge, retired employee, Halifax, heart disease, \$250.

Andrew Delaney, conductor, Campbellton, Bright's disease, \$500.

Jacob McDavid, engineman, Campbellton, pneumonia, \$1,000.

The fees and levies for the month were: \$2.20 in Class A, \$1.30 in Class B, and 85 cents in Class C.

SIR WILFRID ON THE COST OF LIVING

"A table of statistics lately compiled by the British Board of Trade, which is known for its accuracy, has stated that the cost of living has increased 7 per cent. in Great Britain during the last decade and in Canada 51 per cent. Now just one point here. Reflect that Canada produces yearly 200,000,000 bushels of wheat, while the consumption is only 50,000,000 bushels, and the surplus has to find a market abroad. Up to this time practically the only market has been the market of Great Britain."

"If, then, we reflect that Great Britain has to import all the wheat which the consumer, and if we reflect further that the price of wheat and the price of bread is cheaper in Great Britain than in Canada, then you have to agree with me that there must be something rotten in the state of Denmark—Canada. And we have not reached the end of the high cost of living. The cost of living will be higher in two or three months than it is today. What is the cause? The recent reductions in the American tariff, milk, cream, swine, sheep, beef and many other articles have been placed upon the free list in the United States. Therefore these products are already rushing towards the United States. We know in the matter of case alone, they are rushing carloads every day from all parts of Canada, where there are cattle towards the American market."

"But these articles I have named cannot come back free from the United States into Canada, and if no products of the same kind can come back from the United States into Canada the result is that all of the articles which are the staple food of the people are growing scarcer in Canada and the price increases, as that is a natural condition of things."

"The situation requires prompt action, and the policy which I give you, the policy which I think every patriotic Canadian ought to stand at the present time, is that the duty of the government at Ottawa is to give up absolute free food of all kinds with no duty."

"It is the policy of the Liberal party and has been always the policy of that party," continued Sir Wilfrid, "that as far as possible we should stand for the stability of the tariff. We have been very chary during the fifteen years that we were in office about making any alteration in the tariff."

"The reason is that when we placed a tariff of customs duties we create an atmosphere in which our manufactures and industries are developed, and if you were to cut out or remove that tariff all of a sudden the result would be very injurious. We have proclaimed more than once during the fifteen years that we were in power that we would be prepared from time to time to revise the tariff, and whenever we found that it was pressing unduly upon any section of the community we would be prepared to remedy the condition accordingly. But I am glad to say that during these fifteen years there never came to us a demand for an alteration in the tariff. There were men who thought they could do better than we did. You have seen them work and this is the result of their work."

Lapsing into the reasoning strain again, Sir Wilfrid asked: "If you alter the tariff, are you not going to interfere with the farmer? Not at all. Nobody finds fault with the price which the farmer gets for his products. The trouble is that, that the price which is paid the farmer is not the price which is paid by the consumer. The difference between the price which is paid by the farmer and the price which is paid by the consumer leaves a wide margin for the trusts and combines."

RECORD SHIPMENTS FROM PORT WILLIAM

Twenty-five Steamers With 8,000,000 Bushels Aboard Sailed East Saturday.

Fort William, Nov. 30.—In the final rush to get on their way down the lakes before midnight and thus avoid the necessity of having their insurance extended, twenty-five freighters carrying about eight million bushels of grain cleared for the east-to-day. All the week, ships have been lying two, three and even four abreast at the docks awaiting their turn to slip under the spouts at the elevators and the elevator men have been working anywhere from fourteen to twenty hours a day to keep the streams of grain running into the holds of the vessels.

MEN YOKED TO THE PLOW

Aged Inmates of Workhouse Made to Drag Implement

London, Nov. 25.—Great indignation has been aroused in Nottingham by allegations that old and decrepit inmates of Basford Workhouse have been yoked to the plow on land belonging to the Guardians. The statements are being confirmed by several residents in Highbury Avenue, Bulwell, which overlooks the Basford Workhouse grounds.

One man, living within twenty yards of the field, said: "I saw one day last week six men pulling a plow by means of ropes. All the men were very old, and only pulled the plow a few yards before they had to stop to rest and get their breath. The work was evidently too much for these six men, and the following day there were nine men yoked to the implement."

The subject was discussed at Nottingham Trade Council, and a Midland guard and driver declared they saw six old men dragging a plow as they passed on the train, while a man with a big mastiff stood by.

PREMIER BORDEN BACK AT OTTAWA

His Health Much Improved—Nothing Official in His Visit to Washington

Ottawa, Nov. 29.—Premier Borden and Mrs. Borden returned to Ottawa at noon to-day, after spending four weeks at Virginia, Hot Springs, where the prime minister went on medical advice to seek rest and renewed health. The holiday, with daily golf and a course of treatment at the baths, has benefited him considerably. He has returned somewhat sooner than was originally intended owing to the importance of his presence at the capital to again take up the reins of a burdensome administration beset with many difficulties both from without and within the party. His health is not yet completely restored but it is sufficiently improved for him to now face the prospect of a hard and trying session of parliament.

Mrs. Borden took occasion to deny there was anything official in the visit he made to Washington on his return journey. He had called on President Wilson in company with Secretary of State Bryan, but the few moments talk was purely unofficial.

Quebec, Nov. 28.—The Quebec Board of Trade has under consideration a project for the celebration of the fiftieth anniversary of Canadian Confederation on July 1, 1917, the preliminary work of which and the framing of the act took place in Quebec. It is proposed to commemorate the historical event by the erection of a suitable monument on the site of the former Parliament buildings, now known as Frontenac Park, opposite the Archbishop's Palace at the head of Mountain Hill.
