The employes of the Universal Knitting company to the number of between sixty and seventy held their first annual pionio at Humber grove on Saturday, and it proved a very successful affair. The young ladies amused themselves in various ways. Not the least interesting portion of the day's enjoyment were the foot races, some of which were very exciting, and the competitions for the prizes offered very keen. The day's outing concluded with a tug of war, in which Toronto's famous police team were outdone by the scientific manner in which the young ladies handled the rops, and the staying powers dis-played.

Catarrh-A new Treatment.

Catarrh-A sew Treatment. Perhaps the most extraordinary success that has been achieved in modern aclence has been attained by the Dixon treatment of catarrh. Out of 2000 patients treated during the past six months, fully ninety per cent have been cured of this stubborn malady. This is none the less startling when it is remembered that not five per cent of the patients presenting themselves to the regular practitioner are benefitted, while the patent medicines and other ad-vertised cures never record a cure at all. Starting with the claim now generally be-lieved by the most scientific men that the parasites in the tissues, Mr. Dixon at once adapted his cure to their extermination; **Q. O.
