

Our Aim

Is not to deceive our patrons by announcing "mark-down sale" of 20 per cent. reduction all round, and a few weeks later another special reduction of 10 per cent., then "selling at cost," knocking the already reduced figures away down.

Now, all thinking people will reason this way. If 50 per cent. can be taken off the original price of goods and they can still be sold at a living profit, what an enormous profit there must have been on the goods as they were originally sold! I will not go there for my clothes, but to an establishment that is satisfied with a moderate and uniform profit, without any attempt at deception.

THE REPORT
That Oak Hall is selling better \$10 Suits than you can buy elsewhere is in circulation, and it happens to be true. There is no exaggeration about it.

TO SEE OUR MEN'S SUITS

The favorite this season is a black Coat and Vest and striped Trousers for dress wear, and a full Tweed Suit for business. Ask to see our suits we sell at \$8, \$10, \$12 and \$15.

FRENCH ART AT THE WORLD'S FAIR

Some of the Sculptors and Painters Who Will Exhibit—Turkish Co-Operation.

PARIS, May 17.—Since the Chicago exhibition was decided upon the French artists have taken more interest in it than any other class in this country. The Associated Press correspondent recently asked the leading painters and sculptors what they intended sending to the fair, and here is what some of the sculptors answered: M. Barcholdi said: "I shall certainly exhibit, but I have not yet quite made up my mind just what to send."

Mme. Leon Bertrax, one of the most distinguished of the women sculptors, said: "I shall send two or three works which I have already exhibited at the 'Woman's Art Society' of which I am president."

M. Gerome, who is a sculptor as well as a painter, said: "I do not expect to send anything from here, for some of my work is at my disposal. But a good many of my creations are in America and perhaps their owners will send them."

M. Georges Rochegrosse, the painter, remarked, with a smile: "I shall probably send my 'Destruction of Babylon' which figured in last year's Salon, if American modesty does not prevent it."

"I shall send several pictures," said M. Tony Robert-Fleury.

M. Ferdinand Humbert answered: "I cannot yet say what I shall be able to send anything to Chicago, for my work on the Paris City Hall and the Pantheon may take all my time."

M. Auguste Flameng declared: "The exhibition is of considerable importance from any point of view, and I shall send several canvases."

M. Gabriel Fernier's answer was as follows: "I have a great desire to exhibit at Chicago, and this to express once more my sympathy for our American friends."

Mme. Virginie Demont-Breton, perhaps after Rosa Bonheur, the best-known French painter in France, said: "I have already a good many pictures in America, and possibly some of them may be sent. Mr. W. M. of Minneapolis, Mr. Smith of Rochester and Carey Cole of Baltimore each have several, and there are more than 20 others in different private collections."

M. Benjamin Constant said: "I have already two pictures in America which would fitly represent my work and which I consider the best I have painted during the whole of my career. They are called the 'Justice du Cherif' and 'La Seif.'"

M. Albert Aublot says: "I intend exhibiting several important pictures, and also a picturesque panorama of France."

"I shall send a number of portraits, several of them being those of some of the most prominent women in Paris," said M. Jacques E. Blanche.

M. Gustave Courtois remarked: "While I shall exhibit, I shall not have time to visit Chicago in person."

"I certainly shall send," said M. Demoy, "for America has long been a good market for my works."

THEY HAVE ADOPTED DELAWARE

The Work of the Technical School Board—Good Results.

A meeting of the Technical School Board, at which all the members of the board were held last night in the old Wycliffe College. The business of the evening consisted in the adoption of a series of by-laws to control the future meetings of the board, it being decided that such meetings should be held on the fourth Tuesday of each month, excepting during the months of July and August. A motion was made to appoint four committees to be known as Finance Committee, Printing Committee, Supply Committee and Property Committee, and was unanimously carried. A report was also presented from the principal of the Technical School for the adoption of the by-laws. The suggestions embodied in the report were many and will no doubt be of material benefit to the institution.

The average attendance of students each night up to the present has been 125, and during the last session examination, although the attendance of students was small, the results were very gratifying. The principal also advised a number of important changes in the educational system of the school, especially in the geometrical studies, and asked that a certain sum be set apart for the purchase of drawing models and the formation of a reference library. He considered that the present location of the school, i.e. the old college, was perfectly satisfactory, excepting as regards ventilation, and this fault should be rectified as speedily as possible. Some of the clauses embodied in the report were adopted and the remainder left over for a future sitting.

SIGNS OF COMING AGE

Moist Eye, Dry Palm and Shrinkage in the Calf of the Leg.

"Do you know the surest indication of old age?" asked Dr. Reed of a number of friends at the Lancel Hotel, St. Louis, recently. "The surest indications in man," he continued, "are a moist eye, a dry palm and a shrinkage of the calf of the leg. All these are indications of the first section of the nervous system upon advancing years. In the matter of the eye, the first section is interfered with, and it is this which causes a flow of water. The shrinkage of the calf of the leg, also due to the action of the nervous system, and the shrinkage of the leg follows from similar cause. In old age, too, you notice some men become more corpulent than in the earlier portions of their lives. With drinking men the change is often produced by the quantity of alcohol which they consume with their drink, and with those who do not drink it follows from other physiological changes. As to the hair becoming gray it results in the majority of cases from the partial decay of the hair cells and the reduction of the quantity of natural coloring matter which the coloring process. With women the process of the eye does not come so soon as it does in men."

Fulton still palming.

New York, May 17.—The Rev. Dr. Justin D. Fulton spoke to-night in this city on the topic, "Shall the Columbian Exposition be Romanized?" He predicted that in the near future a great war would be waged between Catholics and Protestants in the United States by which the Catholics would be as deeply buried as was slavery by the Civil War. He offered resolutions, which were carried. These resolutions condemned the World's Fair management for requesting the participation of the Pope in the woman's department of the exposition and in the relief department. They suggested that if the fair people wanted Catholic priests they should have procured the instruments of torture of the Inquisition.

Hanged Three on a single limb.

CLARKSVILLE, Ga., May 17.—At 2 o'clock this morning a mob of 200 men broke into the jail, took therefrom 3 negroes charged with the murder of Night Policeman Carter at Toxoo last week and hanged them all on one limb of a large oak tree. The negroes protested innocently.

Niagara Falls Line.

Owing to detention in the Murray Canal the Empress of India will not be able to commence regular trips until Thursday, May 19, instead of Wednesday, as previously announced.

One trial of Mother Graves' Worm Exterminator will convince you that it is equal as a worm medicine. Buy a bottle and see if it does not please you.

A RAILWAY ITEM.

Mr. H. M. Lockwood of Lindsay, Ont., whose portrait follows, is a well-known Railway employee, and has lived in Lindsay for the past three years. Mr. Lockwood was born and brought up in Hastings County, where his kindly disposition and sterling qualities have made for him a large circle of warm friends.

The incidents which are related by Mr. Lockwood are vouched for by numerous friends in Lindsay who are acquainted with all the facts.

MR. H. M. LOCKWOOD.

Mr. Lockwood writes as follows: "I was terribly afflicted with boils, having no less than 58 in eight months, during that time I tried many remedies without relief. Doctors' medicine did not relieve me, in fact I could not get rid of them at all until I began using B.B.B. It completely cured me, and I have not had a boil since taking the first bottle. I write this to induce those afflicted with boils to try B.B.B. and get cured, for I am confident that but for Burdock Blood Bitters I would still have had those terrible boils, which shows plainly the complete blood cleansing properties of this medicine, because everything else that I tried failed."

"A friend of mine who also suffered from boils, took one bottle by my advice and thanks to B.B.B. his boils all disappeared."

As a perfect blood purifier, cleanser and tonic, Burdock Blood Bitters excels all others. In addition to this it has properties not possessed by any other remedy; it regulates the bowels, thus curing constipation; it tones the liver and removes biliousness; it strengthens the stomach and cures dyspepsia. In a word it regulates, tones and strengthens every organ of the body in a natural and effective manner and thus restores perfect health.
