

SUMMER SCHOOL

at the
Sarnia Business College

is a most pleasant and profitable way for the ambitious young person to spend the coming months.
YOU MAY ENTER ANY MONDAY.
July and August Class Hours 8.00 to 1.00. Write for information.

Value Supreme
is in every packet of

"SALADA"
TEA

Every little leaf will yield its full quota of generous 'goodness'. Sold in sealed packets only.

CONSOLATION
By Rex

It makes a good Canadian feel angry
sore and strange,
When he takes a trip to Boston for
his health.
He loses fifteen cents on every dollar
for exchange,
Which sadly dwindles down his pile
of wealth.
It causes us to think of other days
across the line
When Canada piled up her wealth
galore;
When Yankee dollars sold at thirty-
eight or thirty-nine
In the good old days of 1864.
There's consolation in the thought
that we weren't always hit
It's sweet to think of days long gone
before
When Americans in Canada all sac-
rificed a bit
In the golden days of 1864.
So when we go to any city in the
southern clime
And have to hand out fives and get
back four.
Let's smile in reminiscence of the
long forgotten time
Of the days we spent in 1864.

"COLD IN THE HEAD"

is an acute attack of Nasal Catarrh.
Those subject to frequent "colds
in the head" will find that the use
of HALL'S CATARRH MEDICINE
will build up the System, cleanse the
Blood and render them less liable to
colds. Repeated attacks of Acute
Catarrh may lead to Chronic Catarrh.
HALL'S CATARRH MEDICINE
is taken internally and acts through
the Blood on the Mucous Surfaces of
the System, thus reducing the in-
flammation and restoring normal
conditions.
All druggists. Circulars free.
F. J. Cheney & Co., Toledo, Ohio.

**MacGARTH NOVELS PROVE
IDEAL FOR PHOTOPLAYS**

The latest of Harold MacGarth's
fascinating adventure stories to be
screened is "A Splendid Hazard,"
the photoplay version of which was
produced by Allan Dwan and pre-
sented by Mayflower through First
National. It will be shown at the Ly-
ceum, Saturday, May 7th. As in the
case of the previous MacGarth
novels transmitted to the screen, "A
Splendid Hazard" has proved to be
ideal photoplay material. It is a
colorful tale of love and adventure,
brimful of action and set in France,
America and the romantic and pic-
turesque island of Corsica where a
gripping struggle for buried treasure
takes place. The leading male role,
that of the ruthless, ambitious treas-
ure-seeker, Karl Breitman, is enact-
ed with rare skill by Henry B. Walt-
hall. Rosemary Cobert, the beautiful
prima donna whose love Breitman
uses as a stepping stone to the
achievement of his ambition.

PROVINCIAL LAW CHANGES

After all the fuss and fury of an
almost record-breaking session of
the Ontario Legislature the average
man on the street remains to a sur-
prising extent unaffected as a result
of almost three months of legisla-
tion. If he commits B.O.T.A. he can,
as a result of a last session enact-
ment, appeal to a County Court, in-
stead of a High Court Judge; if he
wants to get married he will have to
get his license from a municipal
clerk instead of a jeweller; if he has
children they cannot, as a result of
the Legislature's verdict, work in a
factory until the age of 16, and if he
has a daughter working in a factory
she must now, under certain condi-
tions, be supplied with seating ac-
commodation. He was, for a few
days, intensely interested in a pro-
posal to see that he was fairly treat-
ed with regard to the rent that he
was to pay in future, but, somehow,
that particular item did not "pan
out." The session opened on January
25th and closed Saturday morning at
5 o'clock after a session of 18 hours.
The dying hours of the session
were charged with more interest
than has been packed into any day's
sittings through the fourteen weeks
preceding. Right on top of the fight
over the Burnaby matter the House
ran into a two-hour debate on rural
Hydro distribution and just at the
end when the members were locking
their desks the Premier precipitated
a twenty-minute fight by announcing
the decision of the Government to
withhold all timber licenses from the
Shevlin-Clarke Company until the
company agreed to the terms set
down by the Government.
There were 262 bills introduced to
the House. Of all the items of legis-
lation probably that relating to rural
Hydro extension most widely effects
the benefits of the people of Ontario.
Under its terms the Province, in an
effort to get power to the farms will
pay one-third of the previously pro-
hibitory cost of constructing trans-
mission lines into rural sections.

Miller's Worm Powders act so
thoroughly that stomachic and in-
testinal worms pass from the child
without being noticed and without
inconvenience to the sufferer. They
are painless and perfect in action,
and at all times will be found a
healthy medicine, strengthening the
stomach and maintaining it in vig-
orous operation, so that besides be-
ing an effective vermifuge, they are
tonical and health-giving in their
effects.

DELCO LIGHT
The Complete Electric Light and Power Plant

Lights
the
Home

Pays for Itself

Pumps
the
Water

ANY one of over 75,000 users will tell you that Delco-Light pays for itself.
In money.
They will tell you that the pleasure and comfort of Delco-Light cost you nothing.

Delco-Light does work on the farm. Saves time for more productive things. Its electric power will, in most cases, save enough time to pay for the complete Delco-Light plant in three years.

The electric light you get free.

CHORES are non-productive work. Cut down chore time and you can do things worth money to you. Wm. Schneekloth says the electric power from his Delco-Light plant saves him 3 1/2 hours a week on the churn, separator and washing machine alone—over 40 working days in a year. Think of the money he can make in those forty days.

On the Helms farm at Belleville they use Delco-Light power for the chores—in milking and feeding stock, in pumping water, in ironing and washing—and save 19 hours a week, or about three months of one man's work in the year. Here's a hired man's work for three months which Delco-Light does. The cost of operating Delco-Light is less than the cost of oil for oil lamps.

But operating the small machinery around the farm is only a part of the work which Delco-Light does for you. Take the question of pumping water; with Delco-Light you can have water under pressure at taps anywhere on the farm. You can water stock easily and quickly. You can have hot and cold water in the house. S. W. Cooke & Son, of Maysville, have a big herd of Holsteins. Delco-Light has pumped the water and done the milking for three years. They figure that their saving is not less than \$1,800. As Mr. Cooke says, they could pretty nearly afford a new Delco-Light plant every year. And remember this saving does not include the convenience and comfort and saving of electric lights.

J. H. Lackey raises Polled Jerseys and Poland China Hogs. He, also, needs a lot of water. His Delco-Light outfit enables him to get along without two men he formerly hired.

AROUND the house there is a great big saving of time and work for your wife—time she can very well use for her chickens or her garden or her dressmaking. A. F. Hinnenkamp tells us that Delco-Light saves his wife 416 hours of housework a year by operating an electric iron, a vacuum sweeper and a washing machine. *Besides*—no lamps to clean, no matches to use, no danger of fire, lots of light.

C. F. Tressin adds in the time saved from cleaning lamps and makes a total of 547 hours a year. Think of all the things your wife could do with that extra seven weeks. And then you have electric light. You can't know the joy and comfort of electric light till you have experienced it. Just press a button and release a flood of bright, clean, safe light. No matches. No lamps. No danger. Delco-Light gives four times as much light from a gallon of coal oil as a lamp gives.

DELCO-LIGHT is a complete electric light and power plant, easy to install and easy to care for. It will give twenty-four-hour-a-day electric light and power service.

Delco-Light is direct connected. There are no belts to slip, break or be replaced.

It is self-cranking. Pressing down a lever starts the engine.

It is air-cooled. There is no water to carry, to freeze, or to boil away.

There is only one place to put oil.

A simple mixing valve regulates the fuel supply. There is no complicated carburetor.

Ball and roller bearings cut down friction to a minimum.

Long-life batteries mean economy.

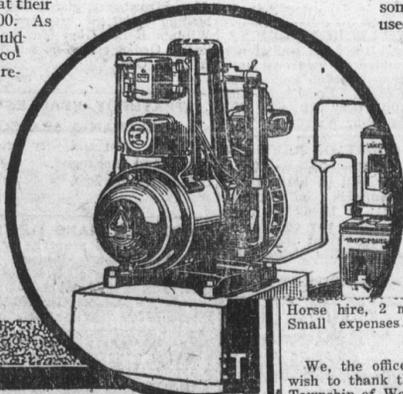

You need to know more about Delco-Light. We have fully illustrated literature showing Delco-Light in operation. Write your nearest distributor for it.

Throughout this advertisement we have quoted from letters received from Delco-Light users. Each of these letters is accompanied by an affidavit. We have prepared a folder reproducing some of these letters, and with photographs of some farms where Delco-Light is used. Your nearest distributor will be glad to send this book to you.
