Horse Shoes For Luck

are vogue at Weddings and, over racing stable doors, but will not help to build up your sales volume.

Business success, or "luck", as jealous rivals call it, is the product of wise planning, a square deal policy of service and ADVERTISING.

ADVERTISING keeps the public informed of your business. Such knowledge breeds confidence and Goodwill. An expenditure in advertising will prove an interest-bearing investment.

Get the facts from "THE WEEKLY MONITOR."

A WORD TO THE WISE

A list of advertisers from "The Weekly Monitor" in your handbag or pocket is the best "Horse Shoe" you can carry for "luck" in buying. An advertisement is an invitation.

PREDICTS POPULATION 50 MILLION IN POLAND

Poland will have a population in excess of 50 million in 1971 and will then rank fourth among the nations of Europe, according to a prediction made by John Dombalski, one of the leaders of the Polish delegation which negotiated the Treaty of Riga with Russia in 1921. Dombalski sets forth his reasons for this belief in an article on "The Population of the Polish Republic" which appeared in a recent issue of "Polityka," a Warsaw periodical published under his direction.

Only Russia, Germany and England will have larger populations than Poland fifty years hence, the writer believes. Poland now ranks sixth in population among the nations of Europe, but according to Dombalski's prediction Poland will pass both France and Italy before 1971.

FASCINATING STORIES

Two fascinating stories of adventure and romance will commence this month in The Family Herald and Weekly Star of Montreal. "The King's Arrow," by H. A. Cody, takes one back to stirring times in the picturesque days of the Acadians and the United Empire Loyalists. "The Yellow Flower," by Thompson Cross, is a thrilling tale of adventure in the Far East. These two stories alone are worth double the subscription price of The Family Herald and Weekly Star of Montreal for a full year. Subscription sent in immediately will catch the opening instalments.

FIRST GERMAN PLANE SINCE WAR TO LAND IN ENGLAND

Croydon, Eng.—The first German airplane, piloted by a German airman, to land voluntarily in England since the war, arrived at the airfield here. The passengers were directors of the big German air combine which is planning to complete the details of the proposed air service between

RAPER MILNER DIED NEAR MONCTON

He Was Born at Hants County 101 Years Ago.

Moncton, N. B.—Raper Milner, who was 101 years, ten months and sixteen days old, died at the residence of his son, Kenneth, Salisbury Road. Deceased was born at Rawdon, Hants Co., N. S.

The late Mr. Milner had in his possession up to the time of his death certain relics which his parents had brought with them from England, and which are over three hundred years old. His parents were natives of Yorkshire, Eng.

The art of pleasing is the art of rising in the world.

Frederick has a case of "sleeping sickness"—the second case ever reported in the Province.

250,000 TONS CAPE BRETON COAL TO BE DELIVERED AT BOSTON

While newspapers and prominent officials in the United States are loudly protesting against the shipment of American hard coal to Canada, it is interesting to note that Canadian soft coal is now being shipped in large quantities to the New England States, the British Empire Steel Corporation having contracted to deliver 250,000 tons at Boston alone during the coming winter.

Six or seven cargoes of this coal have already been landed at Boston and the steamers Lingan and Rose Castle will be employed regularly in transporting it from Sydney and Louisburg, while other steamers of the Cape Breton coal fleet will also deliver cargoes at Portland, Rockland and other American ports.

Most of the Cape Breton coal will be used by the New England railroads and industrial plants, whose stocks were badly depleted as a result of the miners' strike in the United States last Summer.

Twenty-five years ago, when the Henry M. Whitney interests were in control of the Dominion Coal Company, and the New England Gas and Coke Company, there was a considerable trade in Cape Breton coal to Boston, but the withdrawal of these interests from active control of the companies mentioned and a heavy adverse duty on Canadian coal entering the United States, caused a cessation of this trade until it disappeared entirely some fifteen years ago.

During the past Summer a number of cargoes were shipped from Sydney to Boston in American colliers belonging to the New England Fuel and Transportation Company and these shipments started a revival of the trade, which promises to keep the Cape Breton mines working pretty steadily until the St. Lawrence shipments are renewed in the Spring.

FEDERAL APPOINTMENT

Charles Turner, Litchfield, N. S., to be wharfinger of the government wharf there.

BANFF IN WINTER

Skiiing at Banff

Taking a Ski Jump at Banff

NATURE has made Banff, Alberta, one of the finest summer and winter resorts in the world. Heretofore most of the visitors came in the summer. Within the last few years large numbers have been attracted in winter when sports carnivals have been held with great success. The season 1922-1923 is likely to make a new record in the popularity of Banff as a winter sports centre.

Did you ever ski down a mile-long ski-slope in a pass in the Rocky Mountains? Did you ever swim in a hot sulphur swimming pool and gather snow from the sides to snow-ball your companions? Did you ever meet a deer suddenly on a mountain road and find it unafraid? Did you ever wait on skates? Did you ever climb a mountain and slide all the way down its side on your snow-shoes?

Girl Hockey Teams at Banff Carnival

town is also famous for hockey and a number of fast teams have their home here among which those of the ladies are far from the least important. There are walks with unique attractions around Banff. You may be coming down one of the beautifully graded roads, flanked by the slender ranks of the mountain pines, and a deer will walk out of the woods just ahead of you and stand and gaze at you. This is because Banff is in a government park where it is against the law to shoot wild animals. Any day walking down the main street, you may meet a large mountain sheep. But he is no longer a wild one—he is the mascot of the mounted police stationed here. There is also the but-

falo park to visit, and a glimpse of one of these magnificent animals is largely sought. But the outstanding wonder of Banff is its mountains. Whatever winter sports you may delight in, you are always ringed by an amphitheatre of mountains. Range upon range, and snow-covered peak beyond peak, they tower above one and stretch away into the distance. Against the snow on their sides, the dark mountain pines stand out in sharp relief. In climbing one is tempted to stop often, for every new level brings into view fresh peaks, and hitherto unguessed valleys.

Banff is easy of access, being on the main line of the Canadian Pacific Railway, three and a half hours' journey from Calgary.

SUGGESTS THAT CANADIANS RETURN CAPTURED GUN

Boston Mayor Suggests Restoration of Alleged Bunker Hill Cannon Would Touch Heart of America as Good Will Token.

Boston—Mayor Curley wrote to Hon. George F. Graham, Canadian Minister of Militia and Defence, suggesting that the Dominion present to Boston in time for this year's celebration of the Bunker Hill anniversary a cannon said to have been captured by the British in that historic battle. The cannon, a small field artillery piece, has been on exhibit for many years at the Citadel, Quebec. In his letter requesting return of the gun in time for the annual June 17th celebration at Charlestown, the Mayor said that the proposed gift would not only move Boston's feelings, but would touch the heart of America as a fresh sign of the goodwill and amity so long existing between the United States and Canada, among the world's few neighboring nations whose 4,000 miles of frontier remain unfortified.

Doubt has been cast on the authenticity of the Bunker Hill relic by United States historians who contend that the Americans used only muskets in that engagement.

TAKING THE "CURE"

A man with a few hairs consulted a chemist, who recommended a cure for partial baldness. The customer tried it, and returned a few days later to report

"It worked splendidly," said the customer. "I am no longer partially bald. I am completely bald."

Minard's Liniment for Distemper.

SHOE ON OTHER FOOT NOW

The Canadian wood pulp embargo, which at present sorely handicaps United States paper mills, is likely to be extended to exports from all forest lands in the Dominion, according to Chief Forester William B. Greely in the annual report of the Forest Service, U. S. Department of Agriculture, just issued. Should this be done, he adds, raw wood from Canada will be completely shut off as a source of supply for the paper industry of the United States.

The paper mills of that country now draw one-third of their requirements from Canada, and northeastern mills, he says, have already been seriously handicapped by present embargo, which prohibits pig-wood exports from crown lands.

This illustrates, the report continues, the hazard of becoming dependent upon foreign supplies. The rapid increase in lumber shipments through the Panama Canal foreshadows the time, in the near future, when the principal source of soft-wood lumber for the entire nation will have shifted to the west coast, and the averages freight cost paid by the home builder or manufacturer will have advanced to a new and higher level.

THE TRICKS TYPE PLAY

As a result of a typographical error which appeared in Mr. E. Scarow's advertisement yesterday, offering "garters for women hard to fit," when the word "garters" should have read "gaiters," there was approximately 250 male applicants for positions in Mr. Scarow's store. The young men evidently thought that the "garters" would be fitted in the store.—Owen Sound Times.
