

are deep green with a broad dark zone, and the plant has a fine compact habit.

MADAME NEURY has much the same coloring as Purple Prince, and may be well said to be that variety with double flowers. This peculiar blending of bright and dark scarlet and red gives the flowers a very attractive appearance. The trusses are large, and well above the rich green foliage, which is not zoned.

NCÉMIE has the same coloring as Mad Dutho Bertrand, which has been so much admired and sought after on account of its peculiar shade of pink suffused with violet. The light-green leaves are faintly zoned. The plant is of good habit, producing its medium sized trusses in great profusion.

METEOR FLAG is very like Jewel, both in color and form of flower, and habit of growth; a little larger and more robust, and may on that account be preferred where size is an important consideration. To our taste the doubles of this style are the most beautiful, each flower being formed like a half opened rose in miniature, and bearing the most minute inspection.

M. GELEIN LOWAGIE has certainly a most rich and glowing vermillion shade of scarlet, and ranks among the most dazzling of the doubles. Its trusses are large and conspicuous, borne well above the leaves, which are marked with a broad dark zone.

MRS. JOHN FREED was raised by a member of our Association, who named it after his estimable wife. It is one of the most useful doubles in cultivation for bouquets and floral decorations, its clear bright scarlet giving a brilliant effect, while its usually medium sized trusses admit of its being readily introduced wherever the color is wanted. Each pip is mounted upon a footstalk of sufficient length to admit of its being taken out of the truss and used in the formation of button-hole bouquets, where the flowers appear with good effect, and endure for a long time.

CHARLES GLYM will perhaps hardly rank among the doubles of recent introduction, but it is one of such peculiar and exceeding brilliancy and effectiveness that it deserves to be kept in remembrance. There is just a dash of orange shade through the scarlet, enough to give such vivacity to the coloring as to make it one of the most showy and attractive of all the geraniums. The trusses are of good size, borne up on stout stalks, and produced in great profusion. It is one of our favorites.
