

## To Nursing Mothers!

A leading Ottawa Doctor writes:  
"During Lactation, when the strength of the mother is deficient, or the secretion of milk scanty,  
**WYETH'S MALT EXTRACT**  
gives most gratifying results." It also improves the quality of the milk.

It is largely prescribed  
**To Assist Digestion,  
To Improve the Appetite,  
To Act as a Food for Consumptives,  
In Nervous Exhaustion, and as a Valuable Tonic.**

PRICE, 40 CENTS PER BOTTLE.

JUDGE FOR YOURSELF

**CLARE BROS. & CO., Preston, Ont.**

**THE EXTERNAL REMEDY FOR  
Rheumatism, Sciatica and  
Nervous Diseases.**

Mention this Paper.

Agents wanted in all small towns. It will pay energetic business men to write FOR TERMS.

**REV. ALEX. GILRAY,**  
College Street Presbyterian Church, writes:  
Dear Sirs,—

It is with much satisfaction that I learn that you have decided to establish a branch office in Toronto, believing as I do, that the more widely your Acetic Acid remedy is made known, the greater will be the gratitude accorded to you for the relief experienced by many sufferers in Canada. We have used your Acid for over eighteen years, and are now prepared to state that it is worthy of a place in every family. We have found it thoroughly safe and effective and have commended it to many,—for which we have been thanked. We wish you success in your new quarters, as we feel sure your success will bring relief here as it has already done to large numbers in the old land and other countries. Much will depend on the patient and persevering use of the Acid as set forth in your little book.

**ALEX. GILRAY, 91 Bellevue Avenue,  
Toronto, 28th Nov., 1893.**

### MISCELLANEOUS.

The coopers' craft was first employed among the wine-growers of Italy about the tenth century.

The first hat makers who plied their trade in England were Spaniards, who came to that country in 1610.—*St. Louis Globe-Democrat.*

The New Orleans Times-Democrat says that a young whale, sixteen feet long and weighing about 3,000 pound, was found washed high and dry on the reef half a mile west of the West Jetty light. It was alive and attracted many visitors from the village.

The ladies who best patronize tobacconists are, next to the Kalmucks, the Russians. The ruling passions of Kalmuck women are ribbons to twist round their long tresses, tea, tobacco and bright handkerchiefs. But if they have to choose between tobacco and tea their option is for the former.

The telephone is said to be in more general use in Sweden than in any country in the world, and in no other is the service so cheap. It has been proposed recently to connect by means of a submarine telephone cable the Norwegian and Swedish capital with Copenhagen. King Oscar is a telephone enthusiast.

The question as to which is "the most fashionable language" has apparently been definitely settled by Professor Vambéry, who recently lectured on the subject of "Fashionable Languages" before the members of the Buda-Pesth English Club. "English," he says, "may now be called the most fashionable language in all parts of the world."

**MR. M. ROBERTSON** (Revell & Co.'s Bookstore, Yonge street, Toronto), says:—"My mother owes her life to the timely use of Acetocura."

Bishop Potter, of New York, is said to be in active sympathy with the Burial Reform Association of that city, and it has been reported that he has provided in his will that he shall be buried in a wicker coffin. The Association, having found it difficult to obtain wicker coffins, has recommended the use of certain kinds of soft pine wood, which decompose with equal rapidity.

In Belgium it is the custom to give certificates of marriages in the form of little books, which also contain a summary of the marriage laws, and among a mass of other miscellaneous information directions for the feeding and care of infants. There are also places for entering the names and birth days of the children of the marriage, the authorities considerably affording space for twelve such entries.—*New York Herald.*

Perfect health is seldom found, for impure blood is so general. Hood's Sarsaparilla really does purify the blood and restores health.

The Queen Regent of the Netherlands recently gave to her daughter, the little Queen Wilhelmina, a number of wooden figures, clad in the uniforms used in the army of the Netherlands. The future ruler, it is hoped by her mother, will be able to recognize the grades of the real soldiers by studying the wooden figures. Her Majesty, it is said, asked her mother to add figures of women to her gift, as the "men would be lonely without them."

### The Best Advertisements.

Many thousands of unsolicited letters have reached the manufacturers of Scott's Emulsion from those cured through its use, of Consumption and Scrofulous diseases! None can speak so confidently of its merits as those who have tested it.

An English paper tells a good story of clerical presence of mind. A curate who had entered the pulpit provided with one of the late Rev. Charles Bradley's most recent homilies, was for a moment horror-struck by the sight of Rev. Charles Bradley himself in a pew beneath him. Immediately however, he recovered enough self-possession to be able to say: "The beautiful sermon I am about to preach is by the Rev. Charles Bradley, who I'm glad to see in good health among us assembled here."

Minard's Liniment for Rheumatism.

## We Want

more subscribers for  
"The Canada Presbyterian" in your locality. With your help we can get them, and will pay you well for your work. Write for particulars.

Address:—

*The Canada Presbyterian,  
5 Jordan Street,  
Toronto.*

'Tis a cowardly and servile humor to hide and disguise a man's self under a visor, and not to dare to show himself what he is. By that our followers are trained up to treachery. Being brought up to speak what is not true, they make no conscience of a lie.—*Montaigne.*

Etching is now done by the aid of electricity. A wire is soldered to the plate to be etched, by means of which an electric current is passed through the etching solution, which is made much more dilute than usual. The action is much increased in intensity, and in many cases solutions which under ordinary circumstances are inert, can be used; as, for instance, weak solution of sulphate of copper.

### DON'T DELAY.

It is your duty to yourself to get rid of the foul accumulation in your blood this spring. Hood's Sarsaparilla is just the medicine you need to purify, vitalize and enrich your blood. That tired feeling which affects nearly every one in the spring is driven off by Hood's Sarsaparilla, the great spring medicine and blood purifier.

Hood's Pills become the favorite cathartic with everyone who tries them.

### THE HEAVY END OF A MATCH.

"Mary," said Farmer Flint at the breakfast table as he asked for a second cup of coffee, "I've made a discovery."

"Well, Cyrus, you're about the last one I'd expect of such a thing, but what is it?"

"I have found that the heavy end of a match is its light end," responded Cyrus with a grin that would have adorned a skull.

Mary looked disgusted, but with an air of triumph quickly retorted, "I've got a discovery too, Cyrus. It was made by Dr. R. V. Pierce, and is called a 'Golden Medical Discovery.' It drives away blotches and pimples, purifies the blood, cleans up the system and makes one feel brand-new. Why, it cured Cousin Ben who had Consumption and was almost reduced to a skeleton. Before his wife began to use it she was a pale, sickly thing, but look at her, she's rosy-cheeked and healthy, and weighs 165 pounds. That, Cyrus, is a discovery that's worth mentioning."

Young or middle-aged men, suffering from premature decline of power, however induced, speedily and radically cured. Illustrated book sent securely sealed for 10 cents in stamps. World's Dispensary Medical Association, Buffalo, N.Y.

Electric currents in plants are due, says Kunkel, to the movements of water in the tissues, and not to differences of potential, existing independently. It was considered probable that vegetable electricity was due to biological processes, especially respiration and the consequent chemical changes. In experimenting with leaves and flowers dicotyledons and on a large mushroom in an atmosphere of hydrogen, it was found that the electric current was diminished, but never quite suppressed, owing, probably, to intramolecular respiration. The electric current revives on air being readmitted.
