The Above Exhibit Denotes Rapid and Solid Progress

An Examination of Its Plans and Policies will Show Why The

Temperance and General Life Assurance Co.

IS GAINING GROUND SO RAPIDLY

Our Tontine and Non-Tontine Plans include all that has been shown by experience to be really valuable to insurers and are therefore the most attractive and popular plans in use.

Our Policies are Popular because thinking men realize that they are the safest and fairest in existence and that our classification of risks is strictly equitable.

We are not moored to ancient plans and methods. We are in a position to, and mean to, keep abreast of the times.

Correspondence is solicited with those desiring insurance or work as agents.
