

FOR FLY TIME

To drive flies out of the houses, place round about some palua christi, of which they have a great horror, keep it in the bedrooms during the daytime; darkness has the effect of driving flies away. It is in a great measure on account of the flies that houses in equatorial regions and in the east are kept so hermetically closed.—Ex.

For Erysipelas—A topical application of a paste made of equal parts of ichthyl and lanoline acts almost as a specific when applied and kept on the inflamed skin. The paste should be smeared liberally over some old muslin and renewed morning and evening.—HEALTH.
