Field Husbandry Circular No. 31

KUBANKA WHEAT

By

MANLEY CHAMPLIN,

Professor of Field Husbandry.

College of Agriculture, Saskatoon.

HISTORY.

Kubanka wheat belongs to the amber durum class of spring wheat which was introduced into the United States by the federal Department of Agriculture for the purpose of establishing a class of wheat which would be adapted to the sub-humid or semi-arid portions of the Great Plains region. A number of varieties were introduced from Russia near the close of the last century. These were tried out on the experiment stations in South Dakota, North Dakota, Montana and other

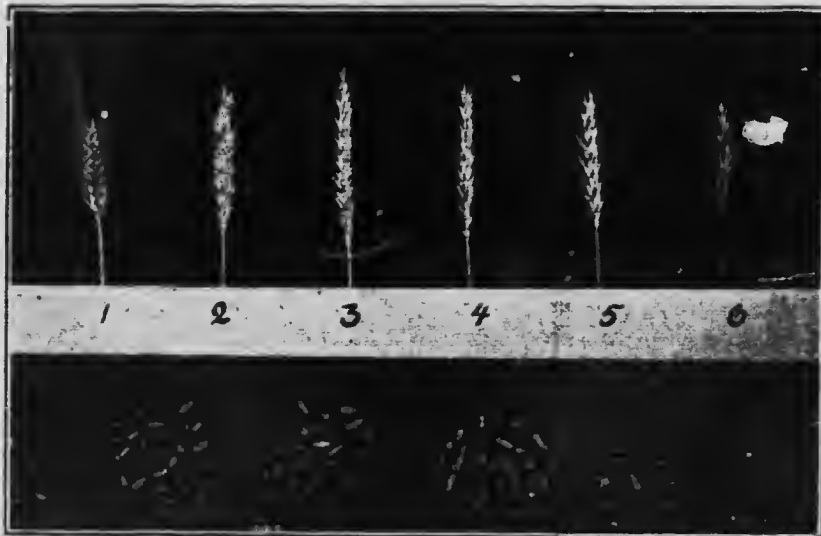

Fig. No. 1. Kubanka and Other Well Known Varieties.
