URGENT GOVERNMENT PARTNER WORLD-

Two Hundred and Forty of British Parliament For Inquiry Commission—General Conference Have Coal

LONDON, March 11.—A movement to petition Premier Asquith to appoint a commission to end the question of industrial partnership as a condition of the present unrest. Two hundred members of parliament, including 157 Union Liberals, 10 National Laborites, support the project on the ground that it would undermine unionism.

A GLOOMY OUTLOOK A world-wide strike of the mining possibility is the latest threat upon the notice of Great Britain. 1,000,000 tons while 2,000,000 more tons have had, perforce, to be imported from the United States. The coal supply of the United States is feared to be exhausted in the event of a strike because of the present demands of large European American consumers, who have their coal from Britain.

Miners Will Confer LONDON, March 11.—(Continued from Page 1.) The National Miners' Federation decided to-night to accept the invitation of the coal owners and the representatives of the government at a round table conference, at which Premier Asquith will preside. The acceptance was with the reservation that the minimum wage will be determined by the conference. It is this means that the government wage will be assumed, conceded, but it does not draw up the schedule of minimum wages will not be discussed. The coal owners have not accepted the invitation to meet to-morrow morning to question. Even if the Welsh owners stand aloof it is granted that the English accept. The conference will meet to-morrow afternoon, but the representatives are not agreed to any reduction of the schedule of rates, which will be determined by the new ballot of the miners.

Miners to Vote The most hoped for from the strike is that some basis of settlement will be reached for the minimum rate, which will be a ballot of the miners. That the strike will continue week is now regarded as inevitable as inevitable. The strike has been determined to last until the coal owners agree to a new schedule of rates, which will be determined by the new ballot of the miners.
