

SITUATION IN RUSSIA IN CASE PARLIAMENT BEING IGNORED

Happenings in Connection With Amnesty Which Have Pro-vocative Tendencies.

St. Petersburg, May 30.—Despite an interpolation of the emperor, adopted by the lower house yesterday regarding the provocative "Black Hundred" telegrams, the Official Messenger to-day published several columns against extending amnesty to "traitors," but asking for the pardon of those who participated in the anti-Jewish outrages, and generally protesting that the lower house does not represent the real voice of the Russian people. This taken in connection with the execution of the eight revolutionists at Ekaterinburg, is interpreted as being a studied effort on the part of the government to ignore the demands of the "amnesty."

The manner in which the policy of the government seems to shift from day to day could not be better illustrated than by the sudden decision to prosecute the leaders of the recent meeting of social revolutionists, at which a revolutionary resolution was adopted. For a fortnight the organs of the Social Revolutionists have been allowed to print reports of meetings, but now the government has issued proclamations in the emperor's name forbidding the revolutionary activity will be suppressed at all costs.

An Autonomy League. The partisans of the lower house of parliament, sixty in number, have organized a league and have pledged themselves to support the integrity of Russia, but the decentralization of authority, and the self-government of the border states, and the wishes of the local populations.

Interior Minister Stolypin's project for the reform of local administration is nearing completion. The features are the liberation of the zemstvos and municipalities from the influence of the central government, the extension of a special self-government to the villages and communes, and the complete abolition of the petty local government officials.

CZAR'S OWN POLICY. Therefore He Refuses to Accept Resignation of the Premier. St. Petersburg, May 30.—A campaign of increasing attacks on the ministry by means of a daily bombardment of intercepted telegrams, the inexhaustible subject of bureaucratic abuses, was mapped out by the constitutional democratic central committee to-day and discussed in detail at a meeting of the members of that party to-night, which seems likely to continue into the morning.

The government is taking its time to answer even the most pressing interpellations. Minister of the Interior Stolypin has refused to answer questions addressed to him only after the return of the officials who had been sent to investigate the conditions on which the attacks were based.

It seems altogether certain now that the ministerial majority will remain in power until the passage of an agrarian bill by parliament renders conflict unavoidable. The resignation of the minister placed his resignation in the hands of the emperor in case the latter desired to do so. The address of the minister to parliament in reply to the speech from the throne, but the emperor declined to accept the resignation of the minister who was carrying out the policy which he desired.

THREE SAILORS DROWN. Schooner Driven Ashore Off Cape Breton Coast. Halifax, N.S., May 30.—The schooner "Thetis," from Summerside, P.E.I., for Louisbourg, was driven ashore at the entrance to Louisbourg harbor last night. The crew of four men took to the rigging, and inside of ten minutes three of them—Captain Wm. Kane, his son William, and a seaman named Joseph Murray—were swept into the sea and drowned.

George Murray, the sole survivor, escaped from the wreck through miraculously, and after spending the night on the bleak and lonely Kennington, London, after returning from a theatre was accidentally shot to death. Mr. Cary, the father, had gone to Europe to bring home the body of his son. On the voyage over he was stricken with apoplexy, and was unable to leave his cot from the time of the stroke.

New York, May 30.—Clarence Cary, a member of the law firm of Cary & Robinson, and director of many financial institutions of this city, arrived on the steamer "Carmania," from Boston, to-day, suffering from a stroke of apoplexy. Mr. Cary, the father, had gone to Europe to bring home the body of his son. On the voyage over he was stricken with apoplexy, and was unable to leave his cot from the time of the stroke.

HON. FRANK OLIVER, Editor

Continued From Page 1.

One source of the many abuses rife in the interior department was due to the secrecy which surrounded all its operations. Even where tenders were called for, they were opened in secret. The "blanketing" of home heads had become a national scandal.

Mr. Borden called attention to the pernicious activity of the officers of the interior department in the recent provincial election. Although the house had condemned this abuse, Mr. Oliver did not scruple to encourage his subordinate to do so. He led an army of officials to coerce or persuade thousands of voters dependent upon them for the necessities of life, mining rights, grading leases, etc.

Mr. Oliver was inclined to be defiant. He said that Mr. Borden had made a general tirade. There were no specific charges. What was there to investigate? Mr. Borden complained of the government's policy, but he had no other policy to suggest. The opposition had made a mistake in attacking him. The department of the interior was open to attacks from any other department.

Mr. Oliver: "There are others. In 1892, when Mr. Foster was in the government, the same thing was done respecting the report of the hay crop in the Northwest. Mr. Lancaster: "Is that your reason for garbling your return?" Mr. Oliver: "There was another report about the meteorological condition observed by the chief astronomer during Conservative rule. He admitted that he omitted many details from his report. Can I not edit the returns from my own subordinates?"

Mr. Oliver: "Does an editor indicate on his copy what corrections he has made, except to guide the compositor? I am a newspaper man; I see you are not."

As to Timber Deeds. Mr. Oliver defended the change in regulations respecting timber deeds. It was charged that the department had increased greatly the number of perpetual lots. This might be true, as a matter of law, but in fact, no change was made. The number of timber deeds issued in the Province of Ontario was not increased by the practice of the Dominion government. Where no distinction existed as a matter of fact, the differences in the wording of the same were not material.

By the same line of reasoning, the minister justified the action of the government in not reserving the right to revise the regulations. Under Conservative rule 25,000 square miles of timber lands had been reserved without competition. Some 250 square miles had gone in this way without competition and practically no bonus. On the other hand, Mr. Oliver said that he had paid \$15,000 for one timber limit and \$20,000 for another. The Conservatives for 870 square miles had received in bonuses \$128,324; the Liberals for 684 square miles received \$453,947.

The regulations, said Mr. Oliver, were beyond reproach. As to the Saskatchewan Valley Land Company, had the government sold this land too cheap? Mr. Oliver (West Toronto) was part owner of a million acres adjoining this tract and he had been glad to sell \$500,000 acres to the Saskatchewan Valley Land Company at one dollar and fifty cents per acre. The Conservative party had locked up the land for settlement and discouraged immigration.

He denied that his officials had interfered improperly in the provincial election. Mr. Bristol (Central Toronto) said the government must stand or fall on its own record. The minister said that he thought the misdeeds of the Conservative government were not objects of condemnation, but appropriate subjects for legislative investigation.

St. John, N.B., May 30.—(Special.)—With the flesh torn from his face, arms and legs and clothing saturated with blood, little Roy Campbell, aged seven years, was rescued from the clutches of a giant bull dog early this evening.

The lad had been playing with the children of David Robb, a neighbor of west end, aged six and three years, and it is supposed the dog, which was a pet of the Robb children, believed the latter were being hurt by their playmates.

It then ran to the wharf, where its master was working on a coal barge, and jumped twenty-five feet into the vessel's hold, trying to hide from its pursuers. Finally it was weighed and drowned. The Campbell boy was horribly mangled when rescued. It is not known whether he will live.

TELLS HOW HE PUT AN END TO FAMOUS DALTON GANG

Man Who Routed Desperadoes After They Had Terrorized Town, Tells of Exploit.

Just a word or two about the story of their final raid. They were cousins by birth and bred. They were cousins by marriage of the notorious Youngers and James. In them the lust of the murdering band of criminals, of the Dalton family, father and mother and thirteen children, came to the fore.

They then began the life of adventure that proved their undoing. First, United States deputy marshals, then train robbers, whiskey peddlers and bank robbers; then, the final act, bank robbery.

On Oct. 4, 1892, five men, Tim Evans, of Pora, Grat Dalton, Bob Dalton, Emmet Dalton and Dick Broadwell, the last having been enlisted in the scheme a day or two before, rode up from the territory from that part known as the Cherokee Nation.

As they neared the town they were noticed by many people riding to and from the city. The Daltons, who were, of course, well known in Coffeyville, were disguised by false beards and by other means.

As they rode up Eighth-street many eyes were turned upon them, but without arousing the slightest suspicion, they were evidently in no hurry to tie their horses in Eighth-street, where they would be readily accessible when the need to flee came.

One of the most interesting characters of the occasion was the inventor of the oxygen apparatus used by the rescue party. The apparatus consisted of two oxygen cylinders and two regenerators through which the vitiated air passed.

TRAVELS UNDER TRAIN. One of the most extraordinary journeys on record was performed by a man who arrived in Paris recently on the Orient express from Constantinople. The Orient express from Constantinople to Paris is a dead end on the bogie of the restaurant car. Investigation was promptly made when it was found that the man was wrapped around his face. He was awakened, and a moment afterwards disheveled and grimy, he crawled out on the platform.

ROYAL WEDDING CONTRACT SIGNED WITH GOLDEN PEN

Gives Queen Ena Income of \$90,000 a Year—Renounces Succession to British Throne.

Madrid, May 30.—All Spain is rejoicing on the eve of the wedding of King Alfonso and Princess Victoria, and the capital has never seen such scenes of tumultuous hilarity during the present generation.

Passing down Union-street, after killing Cubine and Brown, the five bandits espied Thomas Eyles, a waiter of the First National Bank, standing by the curb with a rifle in his hands. Bob Dayton's rifle rang out and Ayres fell, wounded in the head, although the distance was more than 75 yards.

But Bob Emmet then hurriedly dodged behind the buildings and was not seen again until they reappeared in the alley where their horses were tied. Grat Dalton and his companions, Bowler and Broadwell, regained the shelter of the alley first.

But Bob, poor chap, lay in the alley shot thru the breast. Emmet fired at the king's bride, but she was not wounded. I could see that, but he kept steadily on.

His companions behind the old wagon new opened up on me. I had not time to care for Emmet. Skirting the alley railing until he came to a breach, he crawled thru and got away.

Long coils concealed their weapons—Winchester rifles and heavy Colt's revolvers. They looked, as they came, like a party of military men.
