Pointers Made by the Lawyers in Appeal on Both Sides. "CIRCUITOUS CONTRIVANCE How Plant Account Has Been Augmented by Reserve Fund

THE GAS ARGUMENT.

ONE CENT

The Company's Bank Account and How It Claims the Reserve-The Repairs Fund Compounded-Where Surplus Profits Go-Consumers' Money Used-What is Lost by Putting the Reserve in Plant-Mr. C. Robinson, Q.C., on the Company's System of Bookkeeping.

The Gas Company's appeal against Justice Ferguson's judgment in the celebrated Johnston case-which, it is claimed, has in view reducing the price of gas-having been heard, and as many citzens are specially interested, we now propose giving a few of the most important arguments ad-vanced on the appeal by counsel on both sides, containing the company's position as presented by its own lawyers as well as the arguments against it from the other side.

The Court of Appeal for this case The Court of Appeal for this case consisted of Mr. Justices Osler (pre-siding), Maclennan and Rose. The counsel engaged were: for the plaintiff, Messrs. Christopher Robinson, Q.C., retained by the city, and John Mac-Gregor, and for the company, Messrs. Dalton McCarthy, Q.C., S. H. Blake, Q.C., and W. N. Miller. The present dispute with the com-pany is largely involved in the forma-tion and investment of the Reserve Fund. The Act of 1887, allowing the company to increase the stock by \$1,-

cómpany to increase the stock by \$1,-000,000, directed that the premiums derived from the new stock should, with other profits, be used to form this fund until it equaled 50 per cent. of the paid-up capital. It was further directed that this fund "may" be invested in municipal debentures, etc., but no permission is given to invest it in the company's business; nor on the other hand is there an express prohibition against so investing it, un-less the word "may" be construed as equivalent to "must," which is sometimes done. At present it should amount to \$850,000, as the paid-up capital is \$1,700,000.

Profits Not For Consumers. After formation of the Reserve, the Repairs Fund, payment of dividends and irectors' fees, all net profits must be used to form the Special Surplus Account, to be applied to reduce the cost of gas-the Act providing that, whenever the amount of such "account" equals 5 cents per 1000 cubic feet on the quantity of gas sold during the preceding year, the price of gas for the then current year shall be reduced at least 5 cents per 1000 cubic feet to

all consumers. The Reserve must be formed before the Special Surplus Account, and it was elaimed, on behalf of the company, that sufficient had never been receiv-ed to fully form this fund, and on be-ND THE LETTER. orrectly Informed Deint of Archbishop Two of the evening papers of yester-day denied the statement contained in The World that Archbishop Walsh intended to make a deliverance on the sufficient profit had been made, the price of gas should be reduced, but denied that these profits were to be given to the consumer or that he had any remedy if they were withheld or misapplied Company Wants, the Beserve. They further argued that the pro-visions of the Act as to the formation and investment of the Reserve were permissive merely and not compulsory, "Salada" Ceylon Tes is not nerve undoing. and that full discretion was given to and that full discretion was given to deal with the Reserve, and that the company had a perfect right to in-vest it in the business and plant; that it was not completed to invest it in IF YOU GO SLEIGHING It is Imperative That You be Well Wrapp d Up in Fur Garments.
