BESSARABIA IS JUST ONE IMMENSE FARM

Bessarabia, the Moscovite province beyond the Pruth which the Austrians are trying to occupy, is one of those wonderful Russian farms of which the world knows but little, because the Russians have never thought to advertise.

It is an immense farm of 16,181 square miles, with deep, black, fertile soil, and worked by some 3,000,000 farmers.

The climate of Bessarabia is that of the United States, extremely cold in winter and extremely hot in summer, and due to its sharp summer season, the province raises fruits that vie with American fancy fruits in all the best markets of Europe.

The population is very heterogeneous. It numbered 2,460,000 in 1911, and of this number only about 800,000 were classed as urban folk. City people are neither known nor appreciated in this part of the world, and are rarely seen other than at the capital of the province, its largest town, with about 150,000 people.

Most of Bessarabia is Italian, though offshoots of the Carpathians enter it from the northwest, and certain of its central portions are hilly. Parts of the province are well timbered, though, in the main, farm lands are only interrupted by pastures.

There is no industry in the province to be destroyed. A few insignificant cloth mills, iron works, soap works and canneries complete the list of its manufactures.

THE BEST QUALITY AT A REASONABLE PRICE

Don't Let Your Glasses Shake

It's worse than anything—it's injurious—to have the lenses of your glasses wiggle or the frames so loose they will not stay placed in the proper position.

There is no excuse for having your glasses in that condition. Any time you drop into Sharpe's they will be tightened and properly adjusted without charge.

A part of Sharpe's service is keeping glasses in proper condition. The best made frames will get out of adjustment and loose in places from cleaning, wear and rough handling, so we make it a practice to perform whatever attention is necessary, gratis.

You'll find it adds much to the benefit and comfort you get from your glasses to let Sharpe's optometrist look them over for you every two or three months.
