After Bad Blow in British

LONDON, June 17—A Daily Mail despatch from Kurrachi, British India, says that a great storm has reduced the town of Dhanduka, near Ahmadahad Barnhar to a harm of wine Mathematical Particles of the Control of the Cont the town of Dhanduka, near Ahmadabad, Bombay, to a heap of ruins. Not a building within a mile of the town escaped destruction, and it is feared the casualties are numerous. Two children were carried 100 yards, the roofs of houses were whirled about like feathers, and railroad cars were blown along the tracks for miles.

Gas Victims Planned

PARIS, June 17—Survivors of the first gas attack by Germany on the Yser front, April 22, 1915, have taken Yser front, April 22, 1915, have taken steps that a monument be erected to those who were killed by the stifling fumes. The Duchess of Vendome heads a committee which has started the collection of funds for the monument. The monument probably will be

The Torhamvan sailed early this morning for upper Canadian ports with refired segar and general cargo.

R. M. S. P. Chaleur will sail from Halifax tomorrow for Bermuda and the West Indies.

follows:

"During the first two weeks of June, the weather conditions for crop growth, have been ideal. Frequent local showers have fallen and more particularly during the past few days, higher temperatures have been common to the whole province.

"The grass land in the central part of the province looks exceedingly promising for a large hay crop, and pastures have gained rapidly.

"The sowing of oats, except on Liar In Assembly

Canadian Press.

BUDAPEST, June 17.—Premier Count Bethlen was greatly embarrassed in the National Assembly yesterday, when in the presence of foreign diplomats, the opposition deputy Malacitch called Mussolini a pickpocket.

Government members of the assembly quickly rose to the occasion with cheers for the Fascist premier.

Nevertheless Italy is expected to make diplomatic representations as it did in similar incidents recently at Prague.

MARINE NOTES

BOSTON, June 17—Cardinal O'Con
BOSTON, June 17—Cardinal O'

Shrewd Investors Perceive in the Temporary Low Value of French Money an Unusual Opportunity for Exceptional Profits on Both Principal and Income on an Investment in "France's Premier Rente"

WE BELIEVE that an investment made today in French Government 6% Bonds (Loan authorized Dec. 16th, 1920; redeemable at par at the option of the Government on or after Jan. 1st, 1931), presents an exceptional opportunity for profit on any material advance in the value of French money

Due to the depreciation of French Francs a French Government 6% Bond (of 1000 Francs denomination) can now be bought for \$33.00; with French exchange at normal (19.3c per Franc) the same Bond would have a value of \$193.00.

International bankers believe French Francs will sell at 10 cents per Franc before very long. Just think what this means to French Government Bonds; with the Franc worth 10 cents. each Bond of 1,000 Francs will have a value of \$100.00—a rise of over 300%, or a profit of \$67.00 for every \$33.00 invested today. With the Franc selling at 15 cents, each Bond of 1,000 Francs will have a value of \$150.00, a rise of more than 450%, or a net profit of \$117.00 for each Bond of 1,000 Francs, or

for every \$33.00 invested today. We made a lengthy and thorough investigawe made a lengthy and thorough investiga-tion to determine the best way to buy French Francs for maximum profits. We are of the opinion that these French Government 6% Bonds afford the best medium, for they repre-sent to French investors precisely what British Government and our Canadian Government Victory Bonds represent to us, being legal investments for every Institution, Trust Fund and Savings Bank in France, and constituting a strictly high-grade Government investment. They may be sold again instantly for spot cash, as they are listed on the Paris Stock Exchange and t raded in throughout the financial centres of the world. The interest coupons (payable June and December 16th) have always been paid promptly on the dot, and can be cashed in Montreal, New York, London, and other financial centres through our House, banks or

French Government Bonds will, we believe, unquestionably come back to normal (\$193.00 per 1000-Franc Bond). The United States were financially bankrupt after the Civil War.

Their securities could be bought for a song, yet in a few years the Americans were on their financial feet again, and today are considered

the richest nation in the world.

Even England was once faced with what Even England was once faced with what seemed to be a financial disaster. With Napoleon virtually pounding at her gates, British Bonds went for next to nothing, but the victory at Waterloo sent them sky-rocketing. The Rothschild family accumulated the major portion of its wealth by investing in British bonds and selling them when Wellington victory became known.

The experience of France, too, bankrupt at The experience of France, too, bankrupt at the hands of Bismarck, is within the memory of living man. Her Bonds sold down to 7% of their value after the Franco-Prussian War. They appeared hopeless, yet in two years they had recovered 95%, making fortunes for the far-sighted investors who had the courage to invest in them. When millions of men and populations of nations lend their collective efforts to the task—nothing is impossible. The French franc will undoubtedly come back to normal.

A study of history convinces one forcibly that the most difficult thing in the world to destroy is national existence. History is repeating itself. The opportunity of a life time, to earn remarkable profits, exists today for investors, through the purchase of these high-grade French Government Bonds. They rank as the preeminent class of French Government securities, and are virtually a first mortgage on the entire and are virtually a first mortgage on the entire assets and resources of the vast and wealthy Republic of France. The Bonds are valid for 30 years after maturity, and the interest coupons for 5 years after their respective maturity dates, thus enabling the investor to cash them at any time the exchange rates are favorable.

France is a first-class commercial, naval and military power of the world. French industries are thriving and working overtime. france is exporting goods to every country of the globe; her shipping is crowding the world's ports, and the nation shows every evidence of industrial and economic progress. Reparation payments from Germany are further enhancing the French treasury. These conditions will be quickly reflected in a rapid rise in the French Franc, which in turn increases the value of French Government Bonds. That is why we urge you to buy French Government Bonds NOW, while they are on the bargain counter.

INTEREST INCOME.

The income from the average corporation or industrial Bond is fixed, that is to say, a 6% Bond of \$1,000 denomination yields exactly \$60.00 every year until maturity. The income from French Government 6% Bonds comprises many of the attractive features of an ordinary share, or share of common stock. While the income expressed in French money remains fixed the value of that money to the Canadian or American investor depends upon the exchange value of the French franc expressed in dollars.

Thus it will be seen that at the present rate for the franc the holder of a 10,000-Franc Bond will receive for his coupons aggregating always 600 france per annum a sum in Canadian money equivalent to a return of nearly 7% on his investment, that is, on the coot of his 10,000-Franc Bond which at the present time is \$330.00.

When the franc reaches 8 cents,

When the franc has reached 10 cents or \$1,000.00 per 10,000-Franc Bond the preturn will be proportionately higher. Every 600 francs in interest coupons will bring \$60.00 when cashed. Here the yield is more than 18%.

At 15 cents per franc the coupons on a 16,000-Franc Bond costing only \$330.00 today (par value \$1,930.00—a profit on the principal of \$1,900.00) will be worth \$90.00, representing a return of over 27%.

And lastly, with the franc at par. i.e., 19.3 cents or \$1,930.00 per 10,000-Franc Bond, the coupons for one year amounting to 600 francs will be worth \$115.80—an amount equivalent to a return of nearly 35% on the original investment of \$330.00.

Both the Interest and Principal of French Government 6% Bonds are exempt from all French taxa-tion—present or future.

AN ENVIABLE RECORD.

we recommended to investors Norwegian Government Bonds when they were selling at little more than half their present prices—Norwegian money has increased in value and a proportionate appreciation in the value of the Bonds has been recorded.
