ing games of basketball played on the
Y. M. C. I. floor this season, the Y. M.

close throughout and the first period

the score being 18 to 16. The next
period was very closely contested each

so that the game ended by 27 to 25.
Before the game the local team enter-
tained the visitors to dinner at Bond's
restaurant and upon the conclusion of
the contest the Moncton boys were enter-
tained by the "High Y" and the senior

ALASKAN WOOD PULP.

Samples of the First "Run" Received
From Juneau.

A new industry is being developed in
Alaska. The manufacturing of wood
pulp there will greatly alleviate the
scarcity of newspaper paper throughout
the United States. Samples of the first
"run" from a new mill near Juneau, in
the Tongass National Forest, have just
been received by United States Forest
service officials, who say that this marks
another milestone of progress in pulp
production for the newsprint industry.

The mill which produced this wood
pulp is the first of its kind in the ter-
ritory, and is operated by hydro-electric
power. It has a capacity of twenty tons
of pulp a day, with power resources
available for increasing the output to
250 tons. While not equipped at pres-

ent to turn out paper, it is the intention
of the operating company to enlarge the
plant so as to make a finished product.
The sample received is high grade spruce
pulp, but hemlock will also be ground in
quantity for newsprint purposes.

The Forest Service has tried for many
years to establish a pulp mill in Alaska,
but the pioneering difficulties attending
such an enterprise, coupled with the pre-
vailing low prices for pulp and paper,
have prevented development of the in-
dustry. It was not until the summer of
1920 that the first mill was built. The
first run of pulp was made on Jan. 24.

"The Tongass National Forest of
Alaska," said Chief Forester W. B.
Greely, "contains 70,000,000,000 feet of
timber, sufficient to meet one-third of
the pulp and paper requirements of the
United States. There is also a tremen-
dous amount of undeveloped water power,
from which probably a quarter million
horse power could be obtained. An
area containing 2,000,000,000 feet of pulp-
making timber will be placed on the
market soon by the Forest Service in
response to inquiries from prospective
paper manufacturers."
