CHEER WHILE WOMEN DROWN

TWO LIVES ARE LOST DURING CARNIVAL

Spectators Think Burning of Boat Part of Programme. Burlington, Iowa, Aug. 21.—While hundreds of people watched and applauded, thinking the occurrence part of a pyrotechnic display on the water, four persons last night jumped from a burning boat into the Mississippi river and two women were drowned. The bodies were not recovered. An elaborate display of fireworks was set off on a barge in the middle of the river, as part of a carnival. Many launches and rowboats gathered around the barge. It was announced that there would be a set piece representing the destruction of a vessel by fire, showing passengers jumping overboard to escape the flames. Consequently when the store of gun powder on the barge caught fire and flames leaped in all directions, the spectators only applauded. The explosion set fire to the launch which contained Marshal Jordan and wife, Mrs. I. D. Conover and two men, all of Mount Pleasant, Iowa. As soon as the reports of the fireworks died out, spectators in small boats observed the five persons struggling in the water and went to their rescue. But Mrs. Marshal Jordan and Mrs. Conover had disappeared. The others were taken from the water exhausted.

OLIVER FINDS BETTER FEELING

CONSIDERS STOCK HIGH IN ENGLAND

(Special to the Times.) Ottawa, Aug. 20.—Hon. Frank Oliver, who has just returned from England, says he found in Great Britain a far better informed sympathy with Canada than when there three years ago. The people now understand Canadian conditions and affairs. Canada's selection of desirable immigrants is recognized as reasonable by the majority of the people. The prospects for desirable British emigration are good and will continue as long as the attraction of free land continues. The prospects are not favorable to the desirable emigration from the continent owing to German reservation and the disinclination of French, Belgians, Hollanders and Danes to leave home, and the fact that Scandinavian emigration is sent to the United States. In Britain he found widespread interest in Canada, not only among the emigrant class, but among financial, industrial and commercial classes who have come to appreciate that Canada offers a market which they are keen to take advantage of.
