To the Summer School of Science with concert at Public Gardens.

The city of Halifax gave the Summer School of Science a real treat last evening, when they entertained them at a concert in the Public Gardens. They sent them neat cards of invitation, and specially printed programmes of music. The Gardens was beautifully illuminated in their honor, and perhaps never before have they looked prettier. 1,500 people were pre-sent, and not only strangers, but citizens enjoyed the concert to the fullest. enjoyed the concert to the fullest.

Bandmaster Ryan and his splendid corps of musicians of the R. C. R. played a programme which showed their artistic work as musicians, among their numbers being "Masaniello," overture "I Pagliacei" and Bizets "L'Arlesienne," all most skillfully played.

But what the public appreciated to the fullest was their "Alpine Echoes," with duet for cornets and their lively encore number with vocal parts, which brought forth the heartlest applause.

The 66th P. L. F, under Bandmaster Carleton, also gave pleasure with their various numbers, which was all the more to their credit in being played on the same platform with such a spiendid organization as the R. C. R.

Their selection from The Burgomaster was particularly liked and warmly

Enemy ran blockade and upset

LONDON, July 24.—Germans, represented the "Red Fleet," in the annual maneouvres of the British navy, now in progress in British waters, raided the east coast of Great Britain this morning and landed troops in the neighborhood of the Humber. Humber.
After the warships escorting the convoy had engaged and defeated the defending fleet, four transports laden with soldiers ran the blockade which had been established, and upset the cherished belief of the British Admiralty that the British Isles were invulnerable. Vice-Admiral Sir John R. Jellico commanded the fleet, representing the enemy which made the successful descent on the coast. over a hundred men took part yesterday in the cleaning up of St. Margaret's Bay Road from the city to French VII. lage. The volunteer road-makers included men of many professions and trades. Pickaxes, shovels, rakes, iron bars, rock-breakers and everything to complete a road construction outfit were in evidence. From 2 o'clock to 6 the men all worked hard, and when they left for the city still were feeling tired, but by that time there were rows of stones alongside the road for eighteen miles. Holes that had been gaping wide are now filled with gravel, ratts that stretched in menacing lines are evened up in good shape, and bushes that overhung were cut away.
