PROVINCIAL NEWS.

MOUTH OF JEMSEG. Queens Co., March 5.—The body of Frank L. Reese, who was drowned in the channel of the Jemseg creek on the first day of February last, was found yesterday by James DeWitt and Arthur Wright, who were grappling for it. It was found within a few feet from where the acci-dent occurred. William Sharp, Alex-ander Young and Wilford DeWitt, who were grappling near by, on being called went to their assistance. The necessary permit was received from Coroner Purdy to bury the body without an inquest. There was a small dent in the forhead of deceased. The general opinion is that when the sleigh tipped forward into the water that his head either struck the crossbar or cor-ner of the runner. The deceased leaves a father, three brothers and one sister living in this place, one brother, James M., in Worcester, Mass., and Mrs. Scott Humphries of St. John. His age was twenty-four years. A very rge congregation met in the Method ist church this afternoon to attend the funeral. Rev. William Gordon, Baptist, ached an impressive sermon. Rev. H. H. Gillies, Chuch of England, offer ed prayer at the grave. Arthur Colwell, Wilmot Dykeman, Howard Titus. Wilford DeWitt, Harry Heustis and Arthur Wright were the pall-bearers. Nearly one-half of the cut of logs and cordwood in this vicinity have been left in the woods, the recent thaw rendering the roads entirely bare.

The day school in this district open ed for the remainder of the term this week, after being closed since the Christmas holidays. The trustees have employed Miss Gertie Robinson of the Narrows, Queens Co., who comes well recommended.

Fred C. Nevers, who has been quite ill for some time, is improving in health. Arthur Wright has been em ployed for the coming season by the manager of the Star line of steamers as deck hand on their new boat Ma-

ALBERT, March 4.-Inspector Stiles is getting in some effective work, baying made a tour of the county. He has made an inspection of the drug stores, and has carefully noted their prescrip tion files and records, which he claims show that a very suspicious type of illness has been prevalent among able-bodied men, especially in the parishes of Hopewell and Hillsboro. Two young men were prosecuted by the inspector for causing a disturbance on the evening of Feb. 15th at a carnival. boro, but at the trials before Police Magistrate Stuart at Riverside it was found that young men from Albert and Riverside were equally to blame in the matter, and the inspector stated open-ly his determination to have them ished, so that equal justice would be meted out to all who were promi ment in the disgraceful scene.

Joseph Arseneau of Harvey was on Feb. 22nd fined \$20 and \$4.70 costs by Justice Stuart at Hopewell for dis-turbing a prayer meeting at Harvey while intoxicated. The inspecter, who was the informant, learned that Arseneau, a lad of 16 years, got a flask of liquor on the day of the disturbance from Frank McLean at Harvey, als that a large bottle was delivered to him in the evening of the same day by James Beckwith at Harvey. McLean left for New York to join his father, trial. At the hearing before Justices Stuart and Fullerton at Hopewell on Feb. 25th, E. E. Peck of Hopewell Cape appeared for the prosecution, and W. B. Jonah of Elgin for the defence. The accused was convicted and fined \$50 and \$12.60 costs, and in default 80 days in jail. Notice of appeal was served, and bail was entered into before Warren W. Jones, J. P., who accepted Cynthia Beckwith, mother of accused, and Jas. Hunter, shoemaker, of Riverside,

DORCHESTER, N. B., March 6.-The funeral of the late Miss Ella Smith yesterday was, notwithstanding the wild storm which prevailed, very largely attended. The high school children marched in a body from St. Edward's church, where requiem high mass was said, to the grave. Among the floral offerings was a beautiful wreath from the principal and pupils of the high school.

Mrs. Palmer, relict of the late Ebenezer Palmer, died last night after brief illness from pneumonia, at the age of 78 years. Mrs. Palmer was a Reade. One brother, Deacon Reade of Amherst, N. S., and one sister, Mrs. Isaac Anderson of Point Midgic, N. B., survive her. There are three sons, Capt. John, now at home; Capt. W. R., now in South Africa, 1st officer of the Battle liner Tanagra, and Frederic of St. John. These relatives, with the exception of Capt. W. R., together with a grandson, Chester, who is in business college, have been summoned

home. Funeral on Sunday. Boutilier, the desperate Halifax convict, who has twice attempted to escape from prison here was taken to the Kingston, Ontario, penitentiary the other day under a strong guard and heavily shackled. In his company and shackled to him was another dangerous convict, Campbell by name, who was taken to the place named, where they have much better facilities for incornigibles. This is the second term for Campbell at Kingston. Bou-tilier has sixteen and a half years to serve and Campbell eighteen years.

A female colored convict died at the prison on Tuesday and was buried the same day in the government burial lot, Chaplain Campbell officiating.

The coming of yesterday's snow storm is a great boon to lumber operators, who were discouraged and had almost despaired of getting their cut

week.

rough, the snow being driven by a

The recent thaw left the people in a bad position, many not having got in their firewood, and the ice breaking up has left them still worse, as they have most of their hay on the islands and are not likely to get it off this spring. There are about a thousand tons on Musquash Island. Last Saturday, while Stephen Hamm

and Wilford VanWart were coming from the island with their last loads, one horse of each team put a couple of their feet through.

Mrs. Ann Cameron had a sawing and splitting frolic yesterday afternoon. George Palmer of Victoria Corner Carleton Co., is the guest of his brother, Bradford Palmer of Central

SUSSEX, March 7.-The farmer's setting held in Susset on Thursday under the auspices of the Sussex and Studholm Agricultural Society not largely attended, owing, it was presumed, to the fall of snow of the previous night, of which advantage would be taken in hauling wood and so forth. Those who did attend, however, were apparently much interested in the discussions. The first subject was that of an agricultural college for the maritime provinces, and the pre-sident, Col. H. Montgomery-Campbell, called upon the secretary of the society to open the subject. He, in rising, thought he should not be asked to do this. He had at a previous meeting moved a resolution favoring such an establishment, and could only re-utter what he had said on that occasion. When doing so he was not aware that any proposition had been made to the government of this province. He had not felt interested of late in the matter and was not now, but in years gone by he had with others worked to have and agricultural school and experimental farm established for the province. This matter had been brought up at a series of meetings held in Sussex by the N. B. P. Farmers' Association on the 4th, 5th and 6th of July, 1880, and

able to the establishment of a maritime college, his views had been modified by the fact of the proposal, he understood had been made by the government of Nova Scotia, viz., for that province to put up the building and other provinces, N. B. and P. E. I. to furnish the means for running it. This would be a one sided arrange in which Nova Scotia would have all the advantage and would know almost from the start what her expenditure would be, whereas the running expenses might be unlimited. He would now favor the establishment on the old lines asked for by the farmers in the years 1888 to 1885. If what had then been asked been granted, we should, if properly handled have had an institution perhaps equal to that at Guelph, Ontario, by this time, and much more useful to this province. He would advocate mak-

such action was fully endorsed by the society at its annual meeting follow-

ing. While he would now be favor-

in time the province would have what it should have Mr. Ross, editor of the Maritime Farmer, did not think our farmers were ripe at the present time for such an undertaking. He thought the cost would discourage them, as to start a good college would require a hundred or two hundred thousand dollars. He gave some interesting facts in regard to the college at Guelph, and among others stated that at first the college be paid to attend instead of paying to be allowed that privilege. able information was elicited from Mr. Ross by questions asked by the pre-

ing a start, however small at first, and

sident and others. Percy Mills explained what the cost to pupils from this province to Guelph would be, and answered several questions, all of which went to prove that the question was a live one and worthy of being duscussed by farmers.

Mr. Eveleigh, manager of the Sussex dairy, was in favor of making a start, no matter on how small a scale. He believed with the secretary that a start should be made, as otherwise

nothing would be done. The president gave his views on the subject, and while not wishing to discourage the project, was of the opinion that the N. B. government should assist the pupils to attend the college at Guelph. He thought that a school might be established right in Sussex or some of the fine farms, whereby much good could be done, this to be preparatory to a course at Guelph.

me further remarks were had from Mr. Ross, when the subject was dropped without any resolution being

The matter of dairying was then taken up and opened by N. Eveleigh in a very interesting manner. Mr. Ross, Mr. Mills and others took part in the discussion and the value of the varicus feeds, culture of same, and effect upon the soil was considered.

cus feeds, culture of same, and effect upon the soil was considered.

SALMON CREEK, Queens Co., March 7.—Mrs. Martha Withrow, relict of the late William Withrow, died on Friday at her son's residence, riter a lingering illness, in her eightieth year. She came with her parents from Londonderry, Ireland, to this place in 1840. Mrs. Withrow has been a member of the Presbyterian church for a great many years, and was respected by all. On the casket were the words "Gone home," a sheaf of wheat and sickle, and an anchor, all floral offerings. After a short prayer and singing of the hymn Asleep in Jesus, the funeral cortege proceeded to Chipman church, where a touching sermon was preached from her favorite passage of Scripture, the 23rd Psalm, by the Rev. D. McD. Clark, after which the remains were consigned to mother earth at Red Bank cemetery. Three sons and three daughters mourn the loss of a loving mother. One sister and three brothers survive her. The pall-bearers were James Darrah, Robert McNeial, John Stevens, R. T. Baird and H. W. Porter and Isaac Baird.

On account of the recent heavy rain lumbermen entertain doubts of getting their logs off the yards.

Senator King has gone to visit his son in British Columbia. Mrs. H. Ryan of Chipman entertained the Mission Band last week. The conquest meeting held by the Y. P. B. U. in the Baptist church at Chipman was largely attended. Miss Manda Starkey is visiting her sister, Mrs. D. McLean.

RICHIBUCTO, March 8.—Geo. Amireaux and James Amireaux left on

RICHIBUCTO, March 8.-Geo. Amireaux and James Amireaux left on Monday for the Klondike region. The former made his first trip about four years ago and has been home twice

The Rexton-Richibucto ochestra are preparing for a big entertainment March 17th. This will be the third en-

the new year.
R. B. Forbes is able to be out after a serious illness of several weeks. Miss Sylvia Black returned yesterday from a pleasant and extended visit to Shed-

Wild geese are reported on the coast.

APOHAQUI, March 7 .- Miss Bertha Sinnott of New York, who has been here for a few days, left this morning. She was accompanied as far as Law-rence, Mass., by her mother, Mrs. D. L. Sinnott, who will reside in that city.

The Kennebeccasis and Millstream rivers have been clear of ice since Monday. Farmers who did not have their summer supply of ice in, are now getting it on the intervales. The storm of Wednesday night has made the hauling good again.

Large quantities of lumber, hoor poles, tan bark, pressed hay and milk are brought to this station every day. One man, H. McKnight, ships 20 cans of milk a day to a St. John company. HOPEWELL HILL March 7-Seven or eight inches of snow fell yesterday, but on account of the high wind, was so unevenly distributed that sledding is poor yet. There is a great deal of lumber and hay yet to haul and more snow is needed. Curryville folks held a social last

evening at the residence of Thomas

A second Arctic or snowy owl, was captured today by King Milton on the 150 by 45 feet. The loss is estimated at Shepody marsh. Both birds were purchased by C. C. West, and are being sent to St. John to be mounted.

Peter O'Boyle, who has been in the employ of Messrs. Goodwin at Bathurst during the fall and winter, came home today. SACKVILLE, N. B., March 8.-Dr.

Scott of the U. N. B. gave his lecture, The Pendulum and Its Application to Physics, in Eurhetorian hall last night. Though the subject was a somewhat technical one, the speaker made it very interesting. At the close a vote of thanks, moved by Dr. Borden, and seconded by Egerton Brecken, was unanimously tendered to the lecturer. Eurhetorian Society elected Dr. Scot as an honorary member.

FREDERICTON, March 7.—Chief Commissioner Labillois today received a telegram from Vancouver informing him of the death of his only brother, Joseph, from accidental drowning. Joseph went west 15 years ago, and was engaged in lumbering at Read Island, on the Pacific coast. He was unmarried. One sister survives, Sister Labillois of the Chatham convent. The chief commissioner of public

works has awarded contracts as follows: Salmon Beach protection wall, Great Road, Gloucester Co., to Dennis Lorden of Bathurst; Mallory bridge, St. John Co., to Albert E. Smye of Alma, Albert Co.; Trout Brook bridge parish of St. Louis, Kent Co., to P. F. Vautour; Big Alemack bridge, Shippegan Island, Gloucester Co., to Simon McGregor, Dalhousie: South Pisarinco bridge, St. John Co., to Geo. A. Appleby, Westfield, Kings Co.; Upper Coac lane; Stickney Brook bridge, Carleton Co., to Frank McFarlane; Christopher Brook bridge, parish of Addington, Restigouche Co., to Simon McGregor

AN EXPOSURE

Perpetrated on the Public by Imitators of Dr. Chase's Syrup of Linseed and Tur-

pentine.

A Warning to Druggists and to the People Generally Against Fraudulent Parties Who Are Trying to Deal on the Reputation of This Famous Remedy.

At the mention of Dr. Chase's Receipt Book, the memory travels back to childhood's day a, when the book took the place of a cons sting physician, and when Dr. Chase's S. rup of Linseed and Turpentine and other cemedies were kept constantly on hand as s. feguards against disease.

No remely for coughs, colds and kindred aliments ever had anything like the sale in Canada that Dr. Chase's Syrup of Linseed and Turpentine has, and there was never so much of it sold as during the present season. But, notwithstanding this fact, there are scores and hundreds of people who go to the store for this remedy, and who are given other preparations of linseed or turpentine, which are put up in similar packages with the object of deceiving the public. These remedies were never heard of until Dr. Chase's Syrup of Linseed and "urgentine became famous. They are instant and some of them are dangerous to use, on account of containing morphia and other poisonous drugs, which give temporary relief by deadening the nerves, and which ultimately ruin the stomach and digestive system.

lief by deadening the nerves, and which ultimately ruin the stomach and digestive system.

You know from personal experience, or from the evidence of friends and neighbors, what Dr. Chase's Syrup of Linseed and Turpentine is, and what it will do. You know that it is trustworthy and reliable, having stood the test of years. You know that it actually cures the most serious cases of bronchitis, croup, whooping cough and asthma. You have confidence in this remedy because of results which have come to your notice. Are you going to be defrauded into accepting an imitation of substitution? Not likely, when once your attention has been drawn to what is going on.

There is one unfailing test which you can apply. Look out for the portrait and signature of Dr. A. W. Chase. This is on every wrapper of Dr. Chase's preparations. Everybody is familiar with the countenance of Dr. Chase. Be sure you get the genuine every time, and the success of the fraudulent imitators will be at an end. Dr. Chase's Syrup of Linseed and Turpentine, 25 cents a bottle. Family size, three times as much, 60 cents; at all dealers, or Edmanson, Bates & Co., Toronto.

CONSTANTINOPLE, March 7.-Cholera has broken out among the pilgrims week.

DISASTROUS FIRE.

The Worst in the History of Bennington, Vermont

BENNINGTON, Vt., March 9.-The North Bennington broke out in the outting room of the Unity Collar and Cuff Co. at 3 o'clock this morning, completely destroying the establishment and contents, except the engine and boiler room and a small store house. The bilding was a three story frame structure, with basement, about \$60,000, insurance \$40,000. About \$20. 000 worth of goods manufactured, or in process of manufacture, were destroyed. The company has frequently had 300 employes on its pay roll, though less than half of that number were employed in the mill, the others doing work at their homes. families in Bennington, North Bennington, Shaftsbury and White Creek obtained a living in that way. The origin of the fire is unknown. The company was organized six years ago and had been very successful. The principal stockholders are Milo C. Huling and his son Floyd. The mill will pro-

"CURED TO STAY"

is the universal testimony for South American Nervine, and what it did for Mrs. Armstrong it will do for any woman living.

"For one who has suffered as I have for over eix years from nervous prostration, and having spent nearly all I possessed in doctor bills without any permanent relief, you can imagine what a God-sent blessing I feel South American Nervine has been to me. The first few doses gave me great relief. It took six bottles in all to cure me, but I feel I am cured to stay cured."

—Mrs. Geo. Armstrong, Orillia, Ont. 58 SOLD BY M. V. PADDOCK.

WENT FROM MONCTON

W. F. Buck is Now a Master Mechani on Northern Pacific.

The Anaconda, Montana, Standar of Feb. 25th prints an excellent pho tograph of W. F. Buck, formerly wel known in New Brunswick, and wit it the following letter from Missoula:-

MISSOULA, Feb. 24.-W. F. Buck the new master mechanic of the Rock Mountain division of the Northern Pacific, arrived recently from Helena to occupy his new position, which ha been in charge of F. P. Barnes, who left a week ago for the purpose of ac cepting a position on the Santo Fe Mr. Buck is not a stranger to Mis people or to the men in the Mi

shops. Ten years ago Mr. Buck appl the Northen Pacific at Brainard position as machinist. He had le his trade and served his time shops of a continental railro Moncton, N. B., and, as stated, a for a position with the Norther cific. He was accepted and sent shops at Staples, Minn., where mained for a year and a half as chinist. At the end of that t foreman was needed and Mr. Buc chosen at once to fill the place gave the very best of satisfaction remained in the Staples shops for and a half years as its foreman was then transferred to the Mi shops, where he was made the g foreman. He remained here years, or up to 1899, when he was the general foremanship of the I shops. This position he held ver isfactorily.

company began to look around for man for the place. General Superin endent of Motive Power Lovell of S Paul came west to see what could b done. He remembered Mr. Buck ar the splendid record he had made, an ed to offer the position to him. M Buck accepted and the boys under him on the division were never more pleas ed than when they learned he was th man for the place.

Mr. Buck's promotions are due t the earnest and careful manner i which he has done his work. He ha worked hard, and every promotion was a deserved one. He had the work of the company so well in hand that when he came to Missoula to take charge of the important position that he was asked to take he fell right into it as if he had been a master mechanic for long years.

BRITISH SAILORS POOR SHOTS.

Bad Results Shown in Practice by the China Squadron.

HONG KONG, March 5.-Capta Percy M. Scott of the British cruis Terrible, in a lecture before the Unit efficiency, said that the shooting results of the British China squadro were not nice reading, but like oth nasty things, they might prove tonic. He thought the bad shooti of the China squadron was due to i sufficient application to the study as

FROM MAJOR ROSS.

OTTAWA, March 5.-Frank Newby. of the inland revenue department, has received the following letter from Major Charles Ross, commanding the Canadian Scouts in South Africa, and

dated Jan. 24th, Pretoria, 1902: I have been operating for the last month with General Remington in the Orange River Colony, and a very hot place it is, too, for the Boers there are scrappers from the word go. On the 9th and 10th of the month I had a fight and had two white men killed and one native scout, also five white men and one native wounded. The Boers had 46 casualties. Not so bad. Leonard Ev-ans, an old Lethbridge, N. W. T., man of mine, was shot through the heart. I also had another man shot through the forehead, and he lost about three teaspoonfuls of brain, and yet is going to get over it all right-so the doctors

I have about 50 officers and 520 men. 2 pom-poms, 6 colt machine guns and a pack train of 30 mules, and they are all as good a lot as there is in South Africa. Forty-five Canadians came out here last week and joined our scouts. Some of them were of Col. Otter's men, of the first contingent, and others of the C. M. R., and some were of my old scouts who had gone home, but returned again. I expect to start tomorrow for Harrismith and move on from

My many friends in Pretoria had it that I was killed, and so were rather surprised to see me turn up again. I did have a very close call when crossing a flat to get the cover of some Kaffir huts. My horse stepped into a hole and fell on me, and he could not get up, nor could I get my leg from under him, and the Boers were not 800 yards away shooting at me as hard as they could. Lieut. Lee, one of my officers, came to my rescue and got me from under my horse. A bullet grazed his shoulder while helping. My horse was hit also. It was very plucky of him to come to me under such a heavy fire. I mentioned him to the general for the D. S. O.

I got your (Canadian) flag all o. k., and the large one is always flying in my camp on the trek-never for the Boers, for the Boers will never be able to take it. I think that it is the first one that they have ever seen. We are having lots of rain here, and quite cold rain, too.

MANITOBANS IN HOT FIGHT.

OTTAWA, March 5 .- W. A. Colson, writing from Klerksdorp, Transvaal,

under date of January 18: The Manitoba contingent of the S. A. C. came in contact with the enemy. about two weeks ago, at a place called Witpoortje, a farm situated about midway between Frederickstaad and Ventersdorp. They suffered quite heavily, the returns being three Canadians killed and five wounded, including Capt. McCloud, slightly. The Boer losses, 19 killed, number of wounded unknown. I cannot give our loss, as I have simply seen heliograph re-

ports, no names being include This is the troop formerly commanded by Capt. "Billy" Lawless. He left Krugersdorp to take over his command in the Scottish Horse about a month ago. I had a short conversation with him at that time. Apparently his relations with headquarters here were anything but pleasant. However, he was greatly liked by his men

for his fighting qualities. No. 17 Troop, British Columbia, has een split up into small parties of two and three and sent to different troops in A Division. The cause given was the insubordination of the troop. A charge wthout the slightest foundation and due, I think, to the utter inability of British army officers to understand and sympathize with Canadian and other colonials.

Bicyclists and all athletes depend on BENTLEY'S Liniment to keep their joints limber and muscles in trim.

USE OF COVER CROPS AND FER-TILIZERS.

(From F. W. Hodson, Dominion Live

Stock Commissioner.) Prof. I. P. Roberts of Cornell University says: Cover crops may in a measure take the place of fertilizers and manures. They are not, however, a universal panacea for all soil deficiencies, neither are they a full substitute in all cases, for fertilizers. There is always a wide field for the profitable use of one or all on the concentrated forms of fertilizers named, and in many cases there is also a special place for the use of fertilizers, therefore the more need of honest goods. Commercial fertilizers furnish available plant food, but no humus. The cover crop furnishes both, but it is only fair to say that the plant foods in the former are more available than in the latter. Cover crops improve the physical condition of the soil, lessening the cost of tillage. Physically, fertilizers benefit the soil little or none. The humus furnished by the cover crops increases the availability of the plant food already in the soil; fertilizers do not. Cover crops shade the land and conserve moisture.

It is impossible to accurately compare the cost of fertilizers with the cost of seeds for the cover crops and the preparation of the soil for them. The cost of increasing productiveness by extra tillage, by the use of fertilizers, by cover crops, or by all three means, can only be determined in each case by the farmer interested. I give below a single illustration of what a cover crop contains, knowing that another cover crop under other conditions might either be more or less valuable. econd growth of clover, furnished in roots and tops per acre, the following: Nitrogen, 138.86 lbs.; phosphoric acid, 67.35 lbs.; potash, 109.96 lbs. There is removed by 25 bush. wheat and accompanying straw: Nitrogen, 43 lbs.; phosphoric acid, 20 lbs., and potash, 27 lbs. It is believed that most of the nitrogen taken up by legumes is se-cured from the uncombined nitrogen in cured from the uncombined nitrogen in the atmosphere. The clover did not add to either the store of phosphoric acid or potash. The plant took them from the soil and made them avail-
