

BOYS OR GIRLS A BIKE IS YOURS IF--

A Wonderful Pathfinder Bicycle, made in three sizes and one finish only, will be given to any boy or girl in New Brunswick by Pictorial Review for a few hours' work as outlined herewith. This bicycle has a special sloping motor cycle frame, with reinforcing top bar which gives the rider a low riding position similar to that found on a motor cycle. The front fork is reinforced by double truss rods, handsomely nickel plated and reaching from the front wheel axle to the steering head of bicycle and held at the fork crown. A quick action, motor stand is provided for the rear wheel, with spring clip for same attached to rear end of mud guard. The husky carrier is also included as part of the regular equipment. The stand, as well as the saddle springs, is enamelled a beautiful ebony black to harmonize with the black trim.

If you want to know how to easily earn one of these wonderful Bikes for yourself all you have to do is to write PICTORIAL REVIEW, BOX 1109, ST. JOHN, or call at 82 Prince William Street, St. John, or read the rest of this announcement.

This bicycle cannot be bought for less than \$65.00.

There never was a boy or girl who did not want a bicycle. And Pictorial Review now gives every boy or girl in New Brunswick an opportunity to earn one of these by a very few hours' work. It is as fine a machine as any one could ever want to own.

This is how you can get it.

Any boy or girl who sells three hundred copies of Pictorial Review between now and October 15th gets a Bike. The whole three hundred may be sold this month. They may sell sixty copies each month, or they may be sold in irregular amounts each month. All that is necessary is to sell three hundred copies during the next five months.

Of course it would be easier if the worker gets sixty regular customers. Then it will not be necessary to chase all over town each month. Incidentally for every signed order for twelve magazines we will pay twenty cents commission.

If any boy or girl secures sixty signed orders and delivers the magazine each month for the next year he will get a Bike, a cheque for twelve dollars and a profit of \$3.60 every month for one afternoon's work in making the delivery. If the boy or girl does not want to do this, all that is necessary is to sell three hundred copies of the magazine and whenever these three hundred copies have been sold the bicycle will be delivered. No such offer has ever been made to the boys and girls of New Brunswick and probably no such offer will ever be made again. It is the chance of a lifetime for the boys and girls of New Brunswick.

LET EVERYBODY GET BUSY NOW!

FRENCH TAKING GREAT INTEREST IN HELICOPTERS

Experiments Being Carried
at Barcelona by Marquis
Pescara.

EXPECT TO PERFECT
IT IN TWO YEARS

Aviators Express Surprise
That United States Has
Taken it up.

Paris May 15.—The French government, deeply absorbed at the present in the rapid development of the recently invented helicopter, the plane which is designed to rise straight up from the ground. French government, after a careful investigation by a commission of experts, has officially accepted the machine and has set aside a substantial sum of money for the immediate improvement of the invention.

The Marquis R. Pescara, Pescara, Argentina, is credited by some plane experts with having improved its practicability, but some Frenchmen, among whom is a Filipino, have since constructed copiers with as much success as Pescara. Experimental work now being on near Paris at an army field, through which the government hopes to perfect the new plane. As yet the helicopter is at the same stage of development as the first flying machines constructed by the Wright brothers.

At the Aero Club of France, the helicopter is the chief topic of conversation, experts predict within two years the new machine will be a practical reality.

Surprised at U. S.

Considerable surprise was expressed by these same experts that the United States government had recently not taken up the new machine as it may materially aid in sea warfare.

The helicopter, described without attempt at technicality, is a machine constructed of a series of horizontal planes revolving in one direction. On the Pescara machine, a base similar to that of an automobile is used. On the built two series of horizontal planes each series composed of ten planes. The usual airplane motor starts the machine rise straight up from the ground.

In the experimental work, a gas bag has been used for safety purposes but the work is so far advanced that these bags are being abandoned. It is hoped that the perfected machine, which is expected within a year, will be able to rise from the deck of a battleship in mid-ocean.

Experimenting in Spain.

Pescara is conducting experiments at Barcelona, Spain where the Spanish commission has spent several weeks in observation. His career has been romantic. Employed in the experimental laboratories of the Spanish government before the war, Pescara came to Paris soon after the beginning of the war and continued his work under army supervision. He was credited with hundreds of inventions, among them a dirigible which flew over enemy lines and dropped bombs at stated intervals.

Suddenly at the height of Pescara's success, the French police arrested him as a spy and he was kept in prison for several months. The French ministry of war procured his release and obtained his release on condition that he be deported. He fled for Spain and soon after the arrest began his helicopter experiments.

SATURDAY'S MARKETS.

There was a fairly good supply in the country market Saturday morning and the city market was well stocked. Turkeys have made their appearance and are selling at 65 to 70 cents per pound. The prevailing prices on different commodities were as follows: Beef, 18c. to 40c.; veal, 12c. to 22c.; spring lamb, \$2 to \$4 per quarter; mutton, 12c. to 20c. per lb.; pork, 25c. to 35c.; fowl, 55c. to 62c.; key, 65c. to 70c.; eggs, 35c. to 40c.; butter, 40c. to 50c.; celery, 40c. bunch; cucumbers, 30c. a piece; tomatoes, 40c. per lb.; spinach, 12c. bunch; potatoes, 25c. per pack; tuce, 10c. a bunch; radish, 10c. bunch.

Those Nasty Little Pimples That Come On The Face Are Caused By Bad Blood

Many an otherwise beautiful and attractive face is sadly marred by unsightly pimples and various other skin troubles, caused wholly by impure blood.

Many a cheek and brow cast in shadow of beauty has been sadly disfigured, their attractiveness lost, by the presence of the "pimples" that render unhappy for years.

Their presence is a source of constant embarrassment to those afflicted as well as pain and regret to their friends. There is an effectual remedy for these facial defects and that is BLOOD PURIFIER, the old reliable medicine that has been on the market for over 40 years.

It drives out all the impurities from the blood, and leaves the complexion clear and healthy.

Mrs. James Williams, Waterford, Ont., writes—"My face was covered with pimples for nearly a year, I used different kinds of remedies to get rid of them and finally thought there was no relief. A friend dropped in one day and told me I should try BLOOD PURIFIER. I did so and used three bottles, and found the pimples were all disappearing from my face, and now I have a clear complexion again. B. B. P. is manufactured only by The T. M. B. Co. Limited, Toronto.
