The hens that flourish in the good old county of Kings appear to have a strange tendency in going to extremes—in the egg lying line. Not long since, the village of Rothesay, so it is affirmed, tasted the sweets of fame, through the fact that somewhere in the parish, could be seen an egg which in size, was anywhere from a lemon to a football, But now, it would appear, Hampton has produced a David to do battle with Rothesay's Goliath. It is from the ferm of George Raymond—is about the size of a marble; weigns three sixteenths of an ounce and rests easily in a little pill box.

At a meeting of the council of the municipality of the city and county of St. John, held at the court house in the city of St. John on the 20th day of January, A. D. 1903, the following resolution was unanimously adopted:

The municipality of the city and county of St. John, while they have been compelled with reluctance to accede to the request of William Bayard, Esquire, M. D., that his resignation of the office of commissioner of the General Public Hospital should be accepted, cannot allow the occasion to pass without a public expression of their high appreciation of the value of the services which, for more than two generations, he has rendered to the suffering poor of this community. It is not too much to say that the hospital sitself would not have come with existence as a munitage of the city of St. John, all heavily in debt and that at Queen (now King Edward) tried to raise \$15.000,000 to pay off these debts. He succeeded in getting only £124,000. And why was this so? About 80,000 beds were in these hospitals and 2,000,000 enjoyed the benefits. poor of this community. It is not too much to say that the hospital itself would much to say that the hospital itself would not have come into existence as a municipal work, but for his unwearied exertions. Voluntary efforts to provide for the afflicted having failed, the aid of the fegislature, at his instance, was invoked; and the present institution, created for the benefit of all, has been sustained by the contributions of all. While he has been connected with the hospital in an administrative capacity alone, in his general practrative capacity alone, in his general practice, the general public, for more than 65 years, has received the benefit of his medical and surgical skill, and that remark able intuition in the diagnosis of disease which could only have found adequate recognition in a wider sphere.

During his professional career, two great

improvements have tended materially to alleviate the lot of humanity: the use of anesthetics, and the application of antiseptic methods to surgical operations. While Doctor Bayard has always led the van in the use of these and all other discoveries of real utility, he has persistently opposed char atanism in every form.

A tribute of public regard and personal steem was paid to Dr. Wm. Bayard fonday afternoon, when the resolution return the public property of the best that was in him to the hospital

On invitation of Doctor Bayard all then partook of his hospitality, and a very pleasant hour was spent. Councillor Mcopposed char atanism in every form. By opposed char atanism in every form. By the consent of all he holds a commanding position in that noble profession to which he has devoted his life. That that life may long be spared is the prayer not only of the citizens of this municipality, but also of the people throughout the whole province.
