COOK'S FRIEND BAKING POWDER.—See advert. page 2.

PART OF THE SECRET.—Taraxacum (Dandelion) is slightly tonic, diuretic and aperient, and is thought to have a specific action upon the liver, exciting it when languid to secretion and resolving its chronic engorgement. The diseases to which it appears to be especially applicable are those connected with derangement of the hepatic apparatus and of the digestive organs generally. In congestion and chronic inflammation of the liver and spleen, in cases of suspended or deficient biliary secretion and in dropsical affections dependent on obstruction of the abdominal viscera." Vide U. S. Dispensatory.
