TI Business Analyst-II

Common. Uncommon.

Anything you can do with numbers,
 Texas Instruments can help you do better.

Every year of school or work brings new problems, new challenges. And having the right calculator for the job will make solving these problems easier, and faster. That's why Texas Instruments makes so many different kinds of calculators.

Take the TI-35 Galaxy Solar. This 62 function scientific student calculator has an advanced keyboard design, with new, patented display indicators that show pending operations. Powers, roots,

reciprocals, logarithms, trig functions, degree/radian/grad conversions and others are at your fingertips. It even comes with a guidebook that provides instructions, information, examples and problem solving specifics.

For professional engineering, math, and science applications, the TI-56 provides the most needed statistical functions for better data analysis.

And the BA-35 is a complete business math system in one neat package.

No wonder Canada's largest-selling line of scientific and financial calculators is Texas Instruments.

The uncommon answer to your everyday problems. By the way, Texas Instruments calculators have the common keys too.

TEXAS INSTRUMENTS
