

Oregon Short Line
Railway Depots

Built with
IDEAL
Concrete
Machinery

For all Building

There is no guess work about the superiority of the IDEAL Concrete Machine. Great railroads use it because it produces the best building material (see cut). Leading contractors and concrete block makers use it because of its wonderful adaptability to different sizes and designs of blocks, remarkable speed in operation, simplicity and durability.

IDEAL Face Down Interchangeable Concrete Machines

are adaptable to the manufacture of blocks for any building requirements. The interchangeable features found in the "IDEAL" alone more than double its range of use and profit. The same machine makes blocks of any length within capacity, any desired design of face, and various widths and heights.

Our catalogue contains full information on everything pertaining to the concrete industry. Tells how to figure cost, selling price and profit. Gives valuable comparisons of concrete with other materials. Sent FREE on application.

Stackpole
Patent Improved **Street Sweeping Machine**
Is the Standard of
Perfection

BECAUSE no sweeper so effectually does the work for which it is designed as "The Studebaker." It sweeps clean. No sweeper is constructed with the same degree of care and mechanical precision. It wears well. "The Studebaker" has the smallest number of working parts, and has less gearing than any other sweeper made. It is free from all unnecessary complications. With reasonable care it does not get out of order. Send for complete descriptive catalogue.
