Milne's Manure and Gravel Loader

To operate a platform is let down to the ground, gravel or dirt is hauled on to platform with large road shovel sufficient for a two-horse load, which is quickly lifted and automatically slipped into wagon. Time is saved, as team does not have to stand in pit. In handling manure a 9 horse fork is used instead of shovel. To use fork as litter carrier, strong horse is attached, and will wipe out the stable as fast as horse can walk, depositing wherever wanted.
